Inorganica Chimica Acta, 78 (1983) L35–L36

Peptide Cluster Analogue of Two Iron Ferredoxin

A. BALASUBRAMANIAM and D. COUCOUVANIS (*Iowa City, Iowa, U.S.A.*)

The authors wish to have pointed out the following corrections to their paper:

Second author's name COUCOUVANIS and not COCOUVANIS as originally printed.

Page L35, l.h. column, line 1, should read: The synthesis of simple alkyl and aryl thiolate...

Page L36, l.h. column, line 12 should read ... A_{330} for *Spirulina Maxima* Fd is 0.69). These; ... l.h. column, lines 22–24 should read: ...for pure $[\text{Fe}_2\text{S}_2(\text{SPh})_4]^{2-}$ (1.01) [7]. This particular ratio of absorbance (A_{540}/A_{440}) of $[\text{Fe}_2\text{S}_2(\text{SPh})_4]^{2-}$ and $[\text{Fe}_4\text{S}_4(\text{SPh})_4]^{2-}$ (0.53) has been used...

The equation should read

The acknowledgement should state that the grant was awarded to D.C.
