

ERRATA CORRIGE

THE CIRCULAR DICHROISM AND ABSOLUTE CONFIGURATION OF *ENDO*-DICYCLOPENTADIENE

(Inorg. Chim. Acta), 3, 175 (1969) by

B. Bosnich, A. De Renzi, G. Paiaro, J. Himmerleisch and G. Snatzke.

« The circular dichroism spectrum and the absolute configuration of *endo*-dicyclopentadiene shown in figure 2 are correct but refer to the (+) isomer and *not* as is written the (—)-isomer of *endo*-dicyclopentadiene. Thus the arguments and conclusions of the paper are correct if (—)-*endo*-dicyclopentadiene (appearing in the legend of figure 2 and on pages 176 and 177) is made to read (+)-*endo*-dicyclopentadiene. We apologise for the inconvenience and confusion this has caused ».
