

## ANNOUNCEMENTS

### SECOND CONFERENCE OF EUROPEAN RHEOLOGISTS

17–20 June 1986

Prague, Czechoslovakia

#### *Scope of the Conference*

The conference will be concerned with the results in the following subject areas: theory, transport phenomena in rheological systems, rheometry, solids and composites, rubber, suspensions, polymers, polymer processing, biorheology and medical applications, food rheology and processing, tribology, general.

#### *Submission of papers*

Authors should send title and short summary (about 300 words) of proposed papers to the Conference Committee as soon as possible (final

date 30 June 1985). A registration form is available on request.

#### *Language*

The official conference language is English.

#### *Address for correspondence*

2nd EURO-RHEO Conference  
Institute of Hydrodynamics  
Czechoslovak Academy of Sciences  
Podbabská 13, 166 12 Prague  
Czechoslovakia

### FEICOM-85

International Conference on

### FINITE ELEMENTS IN COMPUTATIONAL MECHANICS

ITT-Bombay, INDIA, 2–6 December 1985

#### *Themes*

- transient dynamic problems
- fluid–solid interaction problems
- soil–structure interaction and rock mechanics problems
- fluid flow
- nonlinear mechanics and plasticity problems
- modelling of reinforced and prestressed concrete for elastic and inelastic response
- fibre-reinforced composite materials
- thermal and heat transfer problems
- new computational techniques
- interactive computer graphics

#### *Further information from*

Dr Tarun Kent  
Convener, FEICOM-85  
Department of Civil Engineering  
Indian Institute of Technology  
Powai, Bombay-400 076, INDIA.

#### *Phones:*

Off (022) 586712, 581421

Res (022) 586491

#### *Gram:*

TECHNOLOGY, BOMBAY-76

Telex: 011-71385, IITB IN

### ADVANCED PHYSICAL OCEANOGRAPHIC NUMERICAL MODELLING

2–15 June 1985 in France

The NATO Advanced Study Institute will present lectures on modern numerical methods and physical parameterization for ocean circulation modelling for developing physical understanding. The models will encompass a broad range of subjects, including storm surge, mixed layer, eddy-resolving, quasi-geostrophic, primitive equation and climate models.

The ASI will be held in Banyuls-sur-mer, France from 2–15 June 1985. The director is Professor James J. O'Brien, The Florida State

University, Tallahassee, FL 32306, U.S.A. The French Organizer and Co-Director is Dr. Michel Crepon, Lab. d'Océanographie Physique, Museum National d'Histoire Naturelle, Paris, France. Principal lecturers are Dr. Alan Davies, U.K., Dr. Francois Runday, Belgium, Dr. Bert Semtner, USA, Dr. Mark Cane, USA, Dr. David Anderson, U.K. and Dr. Lars Petter Roed, Norway. Several other lecturers will be selected in the near future. Dr. Bernard Saint-Guilys is the local host.
