Book Reviews

ENVIRONMENT AND MAN VOL AND (MEASURING AND MONITORING THE ENVIRONMENT) by Lenihan and Fletcher. Blackie and Son Ltd. £8.00 (cased). £4.00 (limp) 1978.

This edited volume consists of contributions from five different authors. The subjects include biological methods of environmental monitoring; analysis of food for environmental contaminants and additives; some aspects of water quality control; hair as mirror of the environment; drug toxicity. A further reaching section at the end of each chapter provides additional material for those who wish to look more deeply into a particular area. However, this section is rather limited. All chapters are well written and should make interesting reading for those with a general interest in environmental problems.

POLLUTION COMPENDIUM '78 is the first edition of a user-oriented volume listing over 1,200 products, systems and services in pollution control, energy management and health and safety at work, together with the names of companies from whom they are available in, or from, the U.K. The companies (and other organisations) are listed alphabetically in a second section, together with their addresses, telephone numbers and telexes. It is well laid out and easy to consult.

Available from Wealden Press Limited, South Park Lodge, Mayfield Lane, Wadhurst, East Sussex TN5 6JE, England, price £20.00 (14.00 if purchaser's company is a subscriber to the bi-monthly *Pollution Monitor*).
