Information and Book Review Editor

E. Merian, *Im Kirsgarten 22, 4106 Therwil, Switzerland*

Regional Editor for North America

J. F. Lawrence, *Food Directorate, Health Protection Research, Ottawa, Ontario, K1A 0L2, Canada*

Regional Editor for Western Europe

U. A. Th. Brinkman, *Department of Analytical Chemistry, Free University at Amsterdam, De Boelelaan 1083, Amsterdam, The Netherlands*

Regional Editor for Eastern Europe

Y. A. Zolotov, *Kurnakov Institute of General and Inorganic Chemistry, 31 Lenin Avenue, 117907 Moscow V-71, USSR*

Regional Editor for Japan

K. Fuwa, *National Institute for Environmental Studies, 16-2 Onogawa, Yatabe, Tsukuba, Japan*

GENERAL INFORMATION

Aims and Scope

The scope of the *International Journal of Environmental Analytical Chemistry* comprises such subjects as original research on all aspects of analytical work related to environmental problems such as analysis of organic, inorganic and radioactive pollutants in air and water; determination of harmful substances, including their metabolic breakdown products; and analytical methods for metabolic breakdown patterns or other chemical degradation patterns in the environment and in biological samples.

The journal also covers the development of new analytical methods or improvement of existing ones useful for the control and investigation of pollutants or trace amounts of naturally occurring active chemicals in the environment, or methods that help to gain more insight into our environment. Development, modification and automation of instruments and techniques with potential in environmental sciences will also be part of the journal.

The fields of science covered with regard to analytical aspects include organic and inorganic analytical, applied physical, pharmaceutical and agricultural chemistry, biochemistry, radiochemistry, geochemistry, food chemistry etc.

Owing to the interdisciplinary nature of this journal, it will also include certain topics in the fields of medical science (health sciences), toxicology, forensic sciences, oceanography, food sciences, biological sciences and other fields that in one way or another contribute to the knowledge of our environment and for this purpose have to make use of analytical chemistry.

Notes for contributors can be found at the back of the journal.

All rights reserved. No part of this publication may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and recording, or by any information storage or retrieval system, without permission in writing from the publisher.

ORDERING INFORMATION

Issues are published monthly. Subscriptions are renewed on an annual basis. Current volume block: Volumes 38(1)–40(4).

Orders may be placed with your usual supplier or directly with Gordon and Breach Science Publishers, Inc., c/o STBS Ltd., P.O. Box 197, London WC2E 9PX, U.K. Journal subscriptions are sold on a volume basis only; single issues are not available separately. Claims for nonreceipt of issues should be made within three months of publication of the issue or they will not be honored without charge. Subscriptions are available for microform editions. Details will be furnished upon request.

SUBSCRIBER INCENTIVE PLAN (SIP)

SIP offers a system of discounts to university libraries that maintain a continuous subscription to our journals. Prices to SIP members are at least 10% lower than the 1990 university price. For details on SIP and the range of benefits it offers, please write to STBS.

LICENSE TO PHOTOCOPY

This publication is registered for copyright in the United States of America, and is protected under the Universal Copyright Convention and the Berne Convention. The Publisher is not a member of the Copyright Clearance Center, and has not entered into agreement with any other copyright payment centers in any part of the world. Accordingly, permission to photocopy beyond the "fair use" provisions of the USA and most other copyright laws is available from the publisher by license only. Please note, however, that the license does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale. It is also expressly forbidden for any individual or company to copy any article as agent, either express or implied, of another individual or company. For licensing information, please write to P.O. Box 161, 1820 Montreux 2, Switzerland.

REPRINTS OF INDIVIDUAL ARTICLES

Copies of individual articles may be obtained from the Publisher's own document delivery service at the appropriate fees. Write to: Document Delivery Service, P.O. Box 786, Cooper Station, New York, NY 10276, USA or P.O. Box 197, London WC2E 9PX, UK.

JUNE 1990

NOTES FOR CONTRIBUTORS

TYPESCRIPTS

Papers should be typed with double spacing on good quality paper, and submitted in duplicate to the editor, Dr Brinkman, or to the regional editors, Dr Lawrence (North America), Dr Zolotov (Eastern Europe) or Professor Fuwa (Japan). Submission of a paper to this journal will be taken to imply that it represents original work not previously published, that it is not being considered elsewhere for publication, and that if accepted for publication it will not be published elsewhere in the same form, in any language, without the consent of the editor and publisher.

Language: English is preferred, but French or German papers will be accepted if an English summary of 200 words is also supplied.

Abstract: Each paper requires an abstract of 100–150 words summarizing the significant coverage and findings. Non-English papers should contain a similar abstract in the language, but must also contain a rather larger (200 words) abstract in English. In order that the English abstract can be made available on data base, linearize mathematics within it (though not in the main body of the paper).

Key Words: Up to six key words (index words) should be provided by the author. These will be published at the front of the paper to assist indexing and information-retrieval systems.

FIGURES

All figures should be numbered with consecutive arabic numbers, have descriptive captions, and be mentioned in the text. An approximate position for each figure should be indicated in the margin.

Preparation: Figures submitted must be of a high enough standard for direct reproduction. Line drawings should be prepared in black (india) ink on white art paper or tracing paper, with all lettering and symbols included. Alternatively, good sharp photoprints ("glossies") are acceptable. Photographs intended for halftone reproduction must be good glossy original prints of maximum contrast. Each figure should be clearly labelled with the author's name and the figure number. Redrawing or retouching of unusable figures will be charged to authors.

Size: Figures should be planned so that they reduce to 10.5 cm column width. Photographs for halftone reproduction should be approximately twice the desired size.

Captions: A list of figure captions should be typed on a separate sheet and included with the typescript.

EQUATIONS AND FORMULAE

Wherever possible, mathematical and chemical equations should be typewritten, with subscripts and superscripts clearly shown. It is helpful to identify unusual or ambiguous symbols in the margin when they first occur. To simplify mathematical typesetting, please use fractional exponents instead of root signs, and use the solidus (/) in simple fractions. Complex chemical structures should be submitted as reproducible artwork.

Marking: The printer normally sets mathematical symbols in italics, except for obvious groups like sin and log. Any mathematical symbols that are to be left in roman (upright) type should be encircled in pencil in the typescript; bold symbols should be underlined with a wavy line.

TABLES

Number tables consecutively with arabic numerals, and give each a clear descriptive caption. Avoid the use of vertical rules in tables.

UNITS

Metric units are preferred. Acceptable abbreviations of units are given in the *Style Manual* of the American Chemical Society and similar publications.

REFERENCES

References are indicated in the text by consecutive superior arabic numbers (without parentheses). The full list should be collected and typed at the end of the paper in numerical order. Listed references should be complete in all details but excluding article titles in journals. Authors' initials should precede their names; journal title abbreviations should conform to *Chemical Abstracts*. Examples:

1. A. B. Smith and C. D. Jones, *J. Appl. Phys.* **34**, 296 (1965).
2. R. B. Brown, *Molecular Spectroscopy* (Gordon and Breach, New York, 1970), 3rd ed., Chap. 6, pp. 95–106.

PROOFS

Authors will receive page proofs (including figures) by air mail for correction, which must be returned to the printer within 48 hours of receipt. Please ensure that a full postal address is given on the first page of the typescript, so that proofs arrive without delay. Authors' alterations in excess of 10% of the original composition cost will be charged to authors.

Reprints: Reprints may be ordered by completing the appropriate form sent with proofs.

PAGE CHARGES

There are no page charges to individuals or to institutions.

It is a condition of acceptance by the editor of a typescript for publication that the publisher acquires automatically the copyright of the typescript throughout the world.
