## Editorial

The *International Journal of Environmental Analytical Chemistry* continues to be a high quality, carefully refereed scientific journal covering all aspects of environmental analytical chemistry. In order to enhance the journal's international flavour, increased emphasis is now being placed on the importance of the regional editorial structure.

Professor Juan Albaigés takes over as editor-in-chief, renewing the close links with the International Association of Environmental Analytical Chemistry enjoyed in the past during the editorship of the late Roland Frei, and Professor Udo Brinkman will continue in his long-standing role of regional editor for Western Europe following his successful term as editor-in-chief. Increased activity will also be encouraged in the other regions.

In the future the journal will continue to publish the highlights of important meetings and workshops, as well as submitted papers from around the world, promoting the increasingly important role analytical chemistry plays in our understanding of the environment.

Professor Juan Albaigés

Professor Udo A. Th. Brinkman
