

# The International Journal of Heat and Fluid Flow

For many years the Chairman, Vice-Chairman, and immediate Past Chairman of the Thermodynamics and Fluid Mechanics Group of the Institution of Mechanical Engineers have been responsible for the selection of Institution papers for publication in the Group's journal, *Heat and Fluid Flow*. The Group now wish to broaden and improve this publication by encouraging authors world wide to submit original papers for consideration. The emphasis of the new Journal will be towards meeting the needs of practising engineers whose design problems lie in the heat and fluid flow fields.

The new Journal will continue to maintain close links with the Group and the editorial panel will include engineers of international reputation. We are particularly fortunate in that Professors Martin and Marsh have agreed to act as Editors in Chief. With the support of Mechanical Engineering Publications Ltd, we are confident the new Journal will quickly establish an enviable reputation.

B. N. Furber

*Chairman TD & FM Group Committee*
