CONTENTS

Special Issue
Selected Papers from the 3rd International Symposium on
Turbulence and Shear Flow Phenomena (TSFP-3)
Sendai, Japan, 25–27 June 2003

Preface
N. Kasagi, B.E. Launder and F.W. Schmidt 329

In Memoriam – Professor William C. Reynolds 330

Turbulence structures and control

Scaling law of fine scale eddies in turbulent channel flows up to $Re_\tau = 800$
M. Tanahashi, S.-J. Kang, T. Miyamoto, S. Shiokawa and T. Miyauchi 331

Suboptimal control for drag reduction via suppression of near-wall Reynolds shear stress
K. Fukagata and N. Kasagi 341

Low-dimensional analysis, using POD, for two mixing layer–wake interactions
C. Braud, D. Heitz, G. Arroyo, L. Perret, J. Delville and J.-P. Bonnet 351

Roughness and obstacles

Vortex shedding from two surface-mounted cubes in tandem
R.J. Martinuzzi and B. Havel 364

DNS of turbulent flow in a rod-roughened channel
A. Ashrafian, H.I. Andersson and M. Manhart 373

Structure of turbulent channel flow with square bars on one wall
S. Leonardi, P. Orlandi, L. Djenidi and R.A. Antonia 384

DNS of velocity and thermal fields in turbulent channel flow with transverse-rib roughness
Y. Nagano, H. Hattori and T. Houra 393

Heat transfer

Surface heat-flux fluctuations in a turbulent channel flow up to $Re_\tau = 1020$ with $Pr = 0.025$ and 0.71
H. Abe, H. Kawamura and Y. Matsuo 404

A study of the influence of buoyancy on turbulent flow in a vertical plane passage
J. Wang, J. Li and J.D. Jackson 420

Direct numerical simulation of momentum and heat transport in idealized Czochralski crystal growth configurations
C. Wagner and R. Friedrich 431

Separated shear layers

Parameters controlling roughness effects in a separating boundary layer
C.D. Aubertine, J.K. Eaton and S. Song 444

Continued

doi:10.1016/S0142-727X(04)00064-5

Numerical and experimental study of separated flow in a plane asymmetric diffuser
J. Gullman-Strand, O. Törnblom, B. Lindgren, G. Amberg and A.V. Johansson 451

Direct numerical simulation of oblique vortex shedding from a cylinder in shear flow
J.H. Silvestrini and E. Lamballais 461

Multiphase flows

The modifications of near-wall turbulence structure and heat transfer by immiscible droplets in turbulent liquid–liquid two-phase flow
T. Yuge and Y. Hagiwara 471

Effect of bubble diameter on modification of turbulence in an upward pipe flow
A. Fujiwara, D. Minato and K. Hishida 481

Turbulence modification in gas–liquid and solid–liquid dispersed two-phase pipe flows
S. Hosokawa and A. Tomiyama 489

Modeling and predictive computation

Modelling two- and three-dimensional separation from curved surfaces with anisotropy-resolving turbulence closures
C. Wang, Y.J. Jang and M.A. Leschziner 499

Toward the simulation of complex 3D shear flows using unsteady statistical turbulence models
J. Paik, L. Ge and F. Sotiropoulos 513

Assessment of unsteady RANS in predicting swirl flow instability based on LES and experiments
B. Wegner, A. Maltsev, C. Schneider, A. Sadiki, A. Dreizler and J. Janicka 528

LES

LES of the flow around a circular cylinder of finite height
J. Fröhlich and W. Rodi 537

LES of transitional flows using the approximate deconvolution model
P. Schlatter, S. Stolz and L. Kleiser 549

Numerical simulation of magnetic control of heat transfer in thermal convection
S. Kenjereš and K. Hanjalić 559
