

## CONTENTS

Special Issue  
The Fourth International Symposium on  
Turbulence and Shear Flow Phenomena – 2005

Preface	533
<i>Turbulent Boundary Layers</i>	
Length and time scales of the near-surface axial velocity in a high Reynolds number turbulent boundary layer M. Metzger	534
On the merging of turbulent spots in a supersonic boundary-layer flow L. Krishnan and N.D. Sandham	542
LES of open rotor–stator flow H.I. Andersson and M. Lygren	551
Measurements of velocity–acceleration statistics in turbulent boundary layers K.T. Lowe and R.L. Simpson	558
Reynolds number scaling in a non-equilibrium turbulent boundary layer with mild adverse pressure gradient C.D. Aubertine and J.K. Eaton	566
<i>LES</i>	
Generation of turbulent inflow conditions for large eddy simulation from stereoscopic PIV measurements L. Perret, J. Delville, R. Manceau and J.-P. Bonnet	576
A synthetic-eddy-method for generating inflow conditions for large-eddy simulations N. Jarrin, S. Benhamadouche, D. Laurence and R. Prosser	585
A new approach to LES based on explicit filtering J. Mathew, H. Foysi and R. Friedrich	594
Large eddy simulations of round free jets using explicit filtering with/without dynamic Smagorinsky model C. Bogey and C. Bailly	603
<i>Multiphase</i>	
An experimental study on turbulent swirling water flow with immiscible droplets T. Kouda and Y. Hagiwara	611
LES–DPS of the effect of wall roughness on dispersed-phase transport in particle-laden turbulent channel flow K.D. Squires and O. Simonin	619
<i>Scalar Transport</i>	
A subgrid Lagrangian stochastic model for turbulent passive and reactive scalar dispersion C. Aguirre, A.B. Brizuela, I. Vinkovic and S. Simoëns	627
Mixing analysis of a swirling recirculating flow using DNS and experimental data M. Freitag, M. Klein, M. Gregor, D. Geyer, C. Schneider, A. Dreizler and J. Janicka	636

*Continued*

The role of nonlinearity in turbulent diffusion models for stably stratified and rotating turbulence	644
L. Liechtenstein, F.S. Godeferd and C. Cambon	
<i>RANS</i>	
A simplified structure-based model using standard turbulence scale equations: computation of rotating wall-bounded flows	653
S.C. Kassinos, C.A. Langer, G. Kalitzin and G. Iaccarino	
Numerical prediction of shock induced oscillations over a 2D airfoil: Influence of turbulence modelling and test section walls	661
M. Thiery and E. Coustols	
Nonlinear eddy diffusivity models reflecting buoyancy effect for wall-shear flows and heat transfer	671
H. Hattori, A. Morita and Y. Nagano	
A computational study of the near-field generation and decay of wingtip vortices	684
T.J. Craft, A.V. Gerasimov, B.E. Launder and C.M.E. Robinson	
Compressibility effects in the solenoidal dissipation rate equation: A priori assessment and modeling	696
J. Kreuzinger, R. Friedrich and T.B. Gatski	
<i>Separated and Unsteady Flows</i>	
Computational analysis of locally forced flow over a wall-mounted hump at high- <i>Re</i> number	707
S. Šarić, S. Jakirlić, A. Djugum and C. Tropea	
The influence of disturbances carried by periodically incoming wakes on the separating flow around a turbine blade	721
J.G. Wissink, W. Rodi and H.P. Hodson	
<i>Free Shear Flows</i>	
Radiated sound and turbulent motions in a blunt trailing edge flow field	730
D.W. Shannon, S.C. Morris and T.J. Mueller	
Simultaneous measurements of fluctuating velocity and pressure in a turbulent mixing layer	737
Y. Naka, T. Omori, S. Obi and S. Masuda
