

CONTENTS

Including Special Issue of
the ECI International Conference on
Heat Transfer and Fluid Flow in Microscale – HTFFM-05

Special Section: HTFFM-05

| | |
|---|-----|
| Preface | 1 |
| Single phase pressure drop in microchannels P. Hrnjak and X. Tu | 2 |
| Effects of viscous dissipation and temperature dependent viscosity in thermally and simultaneously developing laminar flows in microchannels S. Del Giudice, C. Nonino and S. Savino | 15 |
| Experimental study on compressible flow in microtubes G.P. Celata, M. Cumo, S.J. McPhail, L. Tesfagabir and G. Zummo | 28 |
| Near-wall effects in rarefied gas micro-flows: some modern hydrodynamic approaches L. O'Hare, D.A. Lockerby, J.M. Reese and D.R. Emerson | 37 |
| On the out-of-plane divergence of streamtubes in planar mini-scale flow focusing devices P.A. Walsh, E.J. Walsh and M.R.D. Davies | 44 |
| Review on two-phase flow instabilities in narrow spaces L. Tadrist | 54 |
| Experimental investigation of R-134a and R-245fa two-phase flow in microchannels for different flow conditions R. Revellin and J.R. Thome | 63 |
| Numerical simulation of gas–liquid two-phase flow and convective heat transfer in a micro tube K. Fukagata, N. Kasagi, P. Ua-arayaporn and T. Himeno | 72 |
| A model for the residence time distribution of bubble-train flow in a square mini-channel based on direct numerical simulation results M. Wörner, B. Ghidersa and A. Onca | 83 |
| Experimental investigation of transient boiling heat transfer in microchannels M.C. Díaz and J. Schmidt | 95 |
| Locally heated shear-driven liquid films in microchannels and minichannels O.A. Kabov, Yu.V. Lyulin, I.V. Marchuk and D.V. Zaitsev | 103 |

Regular papers

| | |
|--|-----|
| Large eddy simulation of the generation and breakdown of a tumbling flow M.S. Toledo, L. Le Penven, M. Buffat, A. Cadiou and J. Padilla | 113 |
| Interface–turbulence interactions in large-scale bubbling processes P. Liovic and D. Lakehal | 127 |
| Experiments on the turbulent wake of a flat plate in a strong adverse pressure gradient M.J. Tummers, D.M. Passchier and P.G. Bakker | 145 |
| An evaluation of bypass transition models for turbomachinery flows L. Cutrone, P. De Palma, G. Pascazio and M. Napolitano | 161 |
| Convective heat transfer characteristics from combined mechanical and supply pulsed radial reattaching jets J.S. Furlow and D.L. James | 178 |
