

Volume 31, issue 1, February 2010

CONTENTS

*Articles*

Effect of Coriolis forces in a rotating channel with dimples and protrusions M.A. Elyyan and D.K. Tafti	1
Heat transfer and pressure drop in two-pass rib-roughened square channels with bleed from sharp bend S.W. Chang and Z.-X. Cai	19
Experimental study and large eddy simulation of turbulent flow around tube bundles composed of wavy and circular cylinders K. Lam, Y.F. Lin, L. Zou and Y. Liu	32
Swirl and buoyancy effects on mixing performance of baffle-plate-type miniature confined multijet K. Tatsumi, M. Tanaka, P.L. Woodfield and K. Nakabe	45
Analysis of thermal dispersion in an array of parallel plates with fully-developed laminar flow J. Xu, T.-J. Lu, H.P. Hodson and N.A. Fleck	57
Three-dimensional numerical study of natural convection in an inclined porous cavity with time sinusoidal oscillating boundary conditions Q.W. Wang, J. Yang, M. Zeng and G. Wang	70
Modelling of combined surface radiation and natural convection in a vented "T" form cavity A. Mezrhab, S. Amraqui and C. Abid	83
Large Eddy simulation of a droplet laden turbulent mixing layer W.P. Jones, S. Lyra and A.J. Marquis	93
Modelling bubbly flow and its transitions in vertical annuli using population balance technique A.K. Das and P.K. Das	101
A heat transfer model for evaporation of coalescing bubbles in micro-channel flow L. Consolini and J.R. Thome	115
Heat transfer modelling of gas-liquid slug flow without phase change in a micro tube Q. He, Y. Hasegawa and N. Kasagi	126
Acknowledgment of reviewers	137
