

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

Volume IV, No. 7

July, 1961

	<i>Page</i>
A. S. PREDVODITELEV: The nature of heat motion in liquids. II	3
G. I. KOZLOV and V. G. KNORRE: The use of the single-impulse impact tube for the investigation of total kinetics of thermal decomposition of methane	11
G. S. AMBROK: The effect of a variable heat flow along the surface of a pipe on heat transfer with turbulent flow	19
V. M. ANTUFYEV: The effect of temperature conditions of a flow and a wall on heat transfer in a cluster of pipes washed with drop liquid	25
N. I. SEMENOV and A. A. TOCHIGIN: True steam content in steam-water flows in vertical unheated pipes	30
V. B. ZENKEVICH: The application of the corresponding states principle to the study of heat conduction of liquid fuels	35
B. F. KALUGIN: Losses of pressure from the impact of particles against the wall in pneumatic transport along horizontal pipes	40
M. E. DOGIN and A. I. KARPOV: The calculation of the resistance of the accelerating distance in pneumatic transport	47
G. V. VASILCHENKO and K. I. SHIMKO: An analogy between the solution of certain problems in the theory of elasticity and in hydrodynamics	52
V. A. BORISEVICH and V. I. MALIUKEVICH: An investigation of thermal coefficients of quartz sand as a function of temperature and porosity	60
A. V. BULYGA: A graphic analytical calculation of the dynamic parameters of a thermistor	64
V. K. SHCHITNIKOV: Heat transfer of bodies of various shapes with a forced liquid flow	73
A. S. TROFIMOV: Heat conduction of a hollow cylinder and plate with harmonic temperature oscillations	79
N. A. PROTOPOPOV and V. M. KULGAVCHUK: The pulse method of determining the energy of sublimation of metals and alloys	84
V. I. KOROTICH: Rate of propagation of water in a layer of finely crushed iron ore and concentrates	91
V. M. ELIASBERG and I. A. BUROVOY: The mathematical simulation of the dynamics of certain processes in apparatus with Fluo-solids	96

Notes

F. SHUBART: A solution of the problem of laminar convection with a linear heat source	105
S. P. BAKANOV, A. A. RUKHADZE and V. B. SANDOMIRSKY: The theory of expansion of a gas bubble in a viscous liquid	109
G. N. SIZOV: The interaction of a flow of liquid and a medium	113
Y. A. EGOROV and V. A. KUCHERYAEV: The possibility of using certain organic scintillators for dosimetry	117
On the 70th Birthday of the Academician N. I. Muskhelishvili	120

Chronicle

The First All-Union Conference on Heat and Mass Transfer	124
Journal of Heat and Mass Transfer	137

Volume IV, No. 8

August, 1961

	<i>Page</i>
A. S. PREDVODITELEV: The nature of heat motion in liquids. III	3
V. V. POMERANTSEV, Y. A. RUNDYGIN and Y. A. SOKOVISHIN: An approximate theory of burning-out and gasification of a fuel layer	11
TSAI KO-EN: Heat transfer in turbulent motion of fluid for large Prandtl numbers	20
I. T. ELPERIN: Heat transfer of a two-phase flow with a cluster of pipes	30
V. M. KAZANSKY: The determination of heat of evaporation of moisture contained in a porous body	36
B. A. VOLCHOK and V. Y. FRENKEL: Elements of thermal calculation of the zone-melting process	43

	<i>Page</i>
I. I. MOROZOV: The stability of the process of steam formation in a unit turn of a single-pass boiler	49
A. V. BONDARENKO, Y. A. VOZNESENSKY, M. E. MENASHIN, I. I. SIDOROVA and V. N. SHARAPOV: An investigation of the system of automatic regulation of the power level of a nuclear reactor	54
A. I. LEONTYEV and V. K. FEDOROV: The effect of input conditions on the law of heat exchange in the initial section of a cylindrical pipe	63
Z. P. SHULMAN: The approximate calculation of a laminar boundary layer in an incompressible liquid when heat and mass exchange are present	69
E. I. SLAVNOVA: The cellular structure of a convection flow in a vertical cylinder of round section	80
A. G. SHASHKOV: The determination of the thermal time constant of a thermistor	87
M. E. DOGIN and V. P. LEBEDEV: The dependence of the resistance of pneumatic transport pipes on basic parameters of a two-phase flow	93
V. I. MAKHOVIKOV: The solution of problems of heat transfer and thermal elasticity for a cylinder of a multiply connected boundary section	99

Notes

M. P. SOROKIN: Free convection of liquid in a cavity in boundary layer conditions	107
I. A. JOFFE: Stationary heat transfer in a half-limited body with inner cylindrical heat sources	111
L. Y. ZHIVAIGIN and B. P. VOLGIN: The determination of the amount of liquid carried away from the surface of a film of a gas flow	114
V. K. SHCHITNIKOV: The effect of form on the process of external heat transfer in forced convection	117
T. L. PERELMAN: A boundary value problem for equations of the mixed type in the theory of heat transfer	121
A. G. BELKIN and Y. N. SULOEV: The temperature field with maximum speed of polymerization	126
Y. A. EGOROV and E. A. PANOV: The measurement of a dose of gamma radiation with a scintillation dosimeter	130

Criticism and Bibliography

G. N. TRETYACHENKO and L. V. KRAVCHUK: Regular heat conditions of solids of complex shapes	132
Reader's Guide	138

Volume IV, No. 9

September, 1961

	<i>Page</i>
L. A. VULIS and I. B. PALATNIK: The mechanism of turbulent mixing in gas flows	5
A. M. MKHITARYAN, V. S. MAKSIMOV, V. Y. FRIDLAND and S. D. LABINOV: A method for investigating the boundary layer in a working section of a new type	12
A. V. CHECHETKIN: The question of the aerodynamic resistance of a pseudo-liquefied layer	17
G. N. DEN: The flow of gas between parallel rotating disks and heat transfer between neighbouring channels	24
A. K. REBROV: Heat transfer with free motion about a horizontal cylinder in rarefied air	32
M. S. SMIRNOV: A system of differential equations of the drying process	40
A. G. TEMKIN: Inverse problems of heat conduction in a symmetrical field	45
I. P. FADDEYEV: The determination of the velocity of a drop of condensate of average size in a flow of saturated steam	56
L. O. MELESHKO: An investigation of phase transformations in pores of building materials	61
A. K. LEONTYEV: The minimum thickness of a heat-transfer wall heated by an alternating current	67

Notes

A. A. GUKHMAN and A. F. GANDELSMAN: The application of the entropy method to the determination of displacement thickness for adiabatic flow in a supersonic nozzle	73
G. T. SERGEEV: Application of similarity theory to investigation on heat and mass transfer processes at liquid vaporization	76
M. E. SHITSMAN and I. L. MOSTINSKY: Temperature conditions in pipes of small diameter when water and a steam-water mixture are moving at high speed	80
D. A. LABUNTSOV: Critical thermal load in the boiling of subcooled water under non-stationary thermal conditions	83
A. A. TARZIMANOV: Heat conduction of monoatomic gases	86
S. N. PLYAT: III. Admissible temperature jumps in the medium during the firing of abrasive workpieces	90
M. S. YAGFAROV: The practical effectivity of quasi-stationary heating conditions	94
A. T. LISOVENKO and A. A. MIKHELEV: An automatic setup for the simultaneous recording of weight and temperature	98

	<i>Page</i>
N. A. PROTOPOV and V. M. KULGAVCHUK: The determination of energy of sublimation of the system Pd-H by the pulse method	102
B. S. BELOSELSKY, B. TSZIN-TSZIN and V. K. SOLYAKOV: Thermal capacity and desorption capacity of aluminium silicate catalyzers	104
M. A. LUKOMSKAYA: The solution of a system of equations of plastic equilibrium for a flat stressed state by means of inclusion of a cycle	108

Review

A. G. SHASHKOV, Y. E. FRAIMAN, A. B. VERZHINSKAYA and E. V. KATIBNIKOVA: Certain methods for determining thermophysical characteristics of materials at room and average temperatures	111
---	-----

Discussions

Standards and regulations for building heat engineering should be revised. (Comments of readers on the paper by A. N. Borshchevsky "The contemporary state of building heat engineering", <i>Journal of Engineering Physics</i> , No. 4, 1961)	120
--	-----

Criticism and bibliography

V. V. SYCHEV: A theory of the critical zone	127
A. A. MIKHELEV, M. F. KAZANSKY and V. P. DUSHCHENKO: Review of book by A. S. Ginzburg: <i>Drying of food products</i>	132
V. S. ROSSIKHIN, A. K. PROTOPOVA and N. V. MOKHOVA: Review of book by I. V. Radchenko: <i>Molecular physics</i>	134

Chronicle

I. T. ELPERIN: Journal of Heat and Mass Transfer	136
--	-----

Volume IV, No. 10

October, 1961

	<i>Page</i>
A. S. IPPOLITOV: Speed of propagation of a flame front in a turbulent air-dust torch	3
G. P. FILIPPOVA and I. P. ISHKIN: Calculation of the viscosity of compressed gases by the similarity method	9
M. P. KUZMIN: Electric simulation of non-stationary thermal processes in a flat wall	15
L. I. KUDRYASHEV and A. A. SMIRNOV: The effect of non-stationary heat on the heat transfer coefficient in the case of external streamlining of solids	21
M. G. MURASHKO: An investigation of filtration motion of liquid with calculation of the effect of the phenomena of heat and mass transfer	30
P. A. NOVIKOV: An investigation of the process of sublimation in vacuum conditions with motion of solids	36
E. A. ROMASHKO: A non-stationary problem of heat and neutron transfer in a non-multiplying medium	40
V. P. MOTULEVICH: A complete system of equations of a laminar boundary layer and boundary conditions in the presence of sources of substance and energy in the flow and on the surface of the solid	44
A. G. TEMKIN: Inverse problems of thermal conduction of an axisymmetrical field	52
M. S. POVARNITSIN: An investigation of the temperature field in a sandwich plate with honeycomb core having asymmetrical heating	64
N. I. GAMAYUNOV and B. S. SHERZHUKOV: The determination of the permeability of ground to water in field conditions	71
V. A. GRISHIN: A method of fluid compensation in thermal measurements and its theory	79
L. I. SLOBODYANUK and A. A. SENDETSKY: The question of the determination of the heat conduction coefficient of building materials in conditions of a space heat flow	84
G. E. OZHIGOV, V. G. SMIRNOV and Y. A. SOKOVISHIN: The production of a thermopile and a method of experimentally determining its relaxation	90
V. A. KOLOTY and D. S. GERCHIKOV: The effect of the material of the electrodes on ignition of explosive gas mixtures by a spark discharge	97

Notes

A. K. LEONT'EV: The effect of thermal skin effect on the distribution of temperature in a cylindrical conductor heated by an electric current	101
---	-----

	<i>Page</i>
M. F. KAZANSKY and A. L. VEREZOMSKAYA: An investigation of the kinetics of compression of colloidal capillary-porous solids in drying	104
V. M. KAZANSKY: The application of a galvanometric amplifier for the recording of drying thermograms	108
V. A. LIKHACHEV and A. I. MOSKVIN: The change in density of aluminium during thermal changes	111
L. O. MELESHKO: The theory of formation of nuclei of a new phase	115
V. P. BAKALEEV: The possibility of solving non-linear problems of heat conduction	119
Y. A. DUSHIN: The rate of decomposition of polymers in a high-temperature medium	123
E. P. ZIMIN: Heat transfer during flow of liquid in a pipe with distributed sources	127
A. I. BORISENKO, E. P. ZIMIN and A. I. YAKOVLEV: Liquid and heat transfer flow in a channel formed by rotating cylinders	129
Assistance to readers	134
