

## CONTENTS LISTS

### JOURNAL OF ENGINEERING PHYSICS

*Volume IV, No. 11*

*November, 1961*

	<i>Page</i>
E. P. DYBAN, S. K. RUDKIN, M. V. STRADOMSKY, I. T. SHVETS and E. Y. EPIK: An investigation of the radial component of velocity pulsations with turbulent flow of air in relatively short pipes with different levels of initial disturbance	3
V. P. MOTULEVICH: Heat and mass transfer at the central point of a blunted solid with heterogeneous chemical reactions	10
Z. P. SHULMAN: An approximate calculation of a laminar boundary layer in a non-compressible liquid where heat and mass transfer exist	19
N. I. SEMENOV and A. A. TOCHIGIN: An analytical investigation of laminar split flow in a two-phase mixture in inclined pipes	29
G. D. RABINOVICH: Stationary heat transfer between three heat transfer agents with parallel flow in a recuperative apparatus	37
N. V. CHURAEV and N. I. ILYIN: The effect of structure on the processes of motion of water in capillary-porous solids	44
P. T. SMENKOVSKAYA: On some results of experimental investigations of drying by sublimation in vacuum	51
L. P. FILIPPOV: Relative methods of measuring thermal properties of liquids	55
V. A. ZAGORUCHENKO and A. A. VASSERMAN: The equation of state and thermodynamic properties of methane	59
M. P. KOROBKOVA: The rate of heat liberation on the boundaries of a flame propagated by vibration	64
E. I. ANDRIANKIN: On the influence of radiative heat conduction on gas flow in a strong explosion	68
Y. A. SAMOILOVICH: Calculation of the heating of rectangular solids from technological conditions	73
A. F. KHRUSTALEV: The temperature field of an unlimited flat wall	81
M. I. DUBOVIS: The evaluation of temperature on the plane of contact in systems with heat removal in a semi-infinite medium	89
L. A. KOZDOBA and V. I. MAKHNENKO: Electrical modelling on ohmic resistance grids of mobile temperature fields	94
G. M. STRUCHINA: The problem of the conjugation of two equations	99

#### *Notes*

A. A. ZHUKAUSKAS and I. I. ZHUIGZHDA: An experimental investigation of heat transfer of a longitudinally streamlined plate with a laminary boundary layer	105
G. F. SHAIDUROV: Thermal instability of a liquid in a horizontal cylinder	109
A. A. DMITRIEV: The application of the thermodynamic determination of entropy in the presence of the field of gravitation force	114
L. A. DUDNIK: The measurement of the temperature of electrodes of miniature tubes by means of thermocouples	117
M. V. VENEDIKTOV and V. P. BIBIK: The determination of coefficients of heat conduction and ultrasonic absorption for moist capillary-porous solids	120
V. A. LIKHACHEV and G. A. MALYGIN: An investigation of irreversible changes in a form of bismuth	123
V. S. KAKHANOVICH: A method of measuring expenditure of heat with correction for several parameters	125
L. K. VODOPYANOV and V. V. KRASNOPEVTSEV: The method of irradiation of solid dielectrics in nuclear reactors	129
N. P. UDALOV: An approximate determination of the temperature of a non-linear resistor of the thermistor-varistor type	132

#### *Chronicle*

A. N. DEVOINO: The International Journal of Heat and Mass Transfer	135
--	-----

*Volume IV, No. 12*

*December, 1961*

	<i>Page</i>
Achievements of physics into engineering practice	3
N. F. ERMOLENKO and I. I. BARDICHEV: M. V. Lomonosov, the great Russian scientist	4

V. I. AVDONIN and I. I. NOVIKOV: The propagation of sound in saturated steams of liquids	11
Y. Z. KAZAVCHINSKY, P. M. KESSELMAN and V. A. RABINOVICH: The second virial coefficient and its extrapolation into the high-temperature field	16
A. V. LUIKOV and E. A. ZHIKHAREV: The new separation method of molecular solutions and gas mixtures	22
V. S. PELEVIN: An electric arc device on alternating current for obtaining a high-temperature gas flow	32
G. B. PEKELIS: The determination of parameters of a gas and liquid on the boundaries of zones in a scrubber for heating liquid	37
N. E. KHAZANOVA and M. V. KALSINA: Diffusion near the critical point of lamination of a system of triethylamine-water-phenol—1. Diffusion in a double system of triethylamine-water	43
A. S. PENKO: Atomization of liquids	47
V. P. DUSHCHENKO and P. P. LUTSIK: A non-stationary temperature field in a three-layered medium where phase transformations are present	52
P. V. TSOI: The boundary value problem for a system of differential equations of the parabolic type	61
P. I. KHRISTICHENKO: The non-stationary temperature field of a spherical shell	70
M. Y. BROVMAN and E. V. SURIN: An approximate solution of equations of the parabolic type applicable to problems of heat conduction	75
V. A. KUDINOV and B. V. NIKITIN: The calculation of the frequency characteristic of an elastic mechanical system	83

*Notes*

V. E. MIKRIUKOV and A. G. KARAGEZYAN: Thermal and electrical properties of alloys of Al-Mg and Al-Cu systems	90
I. I. VISHNEVSKY, A. N. LULICHEV and B. Y. SUKHAREVSKY: Evolution of gases from refractory ceramics when heated in a vacuum	94
A. F. KHRUSTALEV: Transmission of heat through a cylindrical wall	98
SHI YAN-FU and P. G. ROMANKOV: On the number of dimensionless complexes and simplexes obtained by the method of analysis of dimensions	102

*Personalities in Soviet Science*

ALEXANDER SAVVICH PREDVODITELEV	106
---------------------------------	-----

*Lectures of Byelorussian Scientists at International Scientific Conferences*

V. S. ERMAKOV and V. A. SOKOLCHIK: An experimental organic loop on an IRT-2000 Reactor. (Lecture read at the International Conference on Experimental Loops of Nuclear Reactors in Dubno)	109
---	-----

*Survey*

D. L. BRODER and K. K. POPKOV: Journal of Engineering Physics report on biological protection from radiation by nuclear reactors	118
Contents of the Journal of Engineering Physics for 1961	131
