JOURNAL OF ENGINEERING PHYSICS

Volume V, No. 1

January, 1962

	<i>Page</i>
The most urgent problems of mass and energy transfer science	3
L. N. KHITRIN, M. B. RAVICH and L. L. KOTOVA: A method and results of an investigation of the kinetic combustion characteristics of a powdered fuel in a flow	7
D. Y. MAZUROV: Gasodynamics and heat transfer in a coarse-grained fluidized bed	13
Y. V. VARANKIN: The effect of bertinization of peat on its subsequent thermal decomposition	21
NEMET ANDRASH: A study of the upper combustion limit of carbon gases as affected by pressure changes	27
S. S. KUTATELADZE and A. I. LEONTYEV: The calculation of a turbulent boundary layer where substantial positive pressure gradients are present	33
L. I. ROIZEN: Heat transfer in a doughnut-shaped channel with turbulent flow conditions	42
V. B. SHEIN: The calculation of convective processes of water evaporation from vertical hollow cylinders	52
Y. N. LIUBITOV: The calculation of rate of evaporation from a cylinder	55
E. M. KRAVCHUK: The determination of thermophysical coefficients according to type 3 regular conditions methods	59
V. V. SHAPOVALOV: The effect of the fluctuating character of the temperature conduction coefficient of ground on its temperature	64
M. A. KAGANOV and I. G. MUSHKIN: A semiconductor thermo-anemometer with temperature compensation	72
B. E. ZHELEZKO: An experimental investigation of ejector cooling of an engine	79
<i>Notes</i>	
A. A. ANDREYEVSKY and E. D. FEDOROVICH: The heat transfer of a plate and head of a cylinder streamlined by a laminar-boundary-layer of non-compressible liquid in a wide range of Prandtl numbers	85
E. P. KOVALENKO: Velocity and hydraulic resistance distribution in a uniform closed flow	88
G. N. DANILOVA and N. A. BUCHKO: A method of calculating the temperature field and average temperature in the laying of blocks in large concrete structures	92
Y. P. GUPALO: Certain regularities of a pseudo-liquefied layer and compressed drop	96
V. I. SMEKALIN: A method for the rapid determination of coefficients of temperature and heat conduction of non-current-conducting materials	99
S. G. SHULMAN: The effect of creep on the stressed state of a triangular sectional wedge	102
V. M. ABRAMOVA and P. L. KIRILLOV: On critical parameters of alkali metals	108
A. K. REBROV: Free-molecular heat transfer near a wall	111

Survey

A. G. SHASHKOV, O. I. YASKO, V. L. SERGEYEV and F. B. YUREVICH: Electric arc heaters for obtaining high temperature streams	115
---	-----

Discussion

Mitor's article "The temperature field of the masonry of semi-flush baffles of steam boilers" (Readers' comment and author's answer)	130
--	-----

Chronicle

V. A. SOKOLCHIK: International Conference in Dubno on Experimental Loops of Nuclear Reactors	132
Conference of Journal of Engineering Physics Readers	135
Commission for terminology on theory and technique of drying	137

Volume V, No. 2

February, 1962

	<i>Page</i>
V. V. POMERANTSEV and Y. A. RUNDYGIN: An investigation of the nature of the mechanism of low-temperature oxidation of electrode carbon	3

	<i>Page</i>
N. V. ANTONISHIN and S. S. ZABRODSKY: Combustion of gas fuel in the pseudo-liquefied layer of an intermediate heat-transfer agent	10
Y. P. GUPALO: Motion of a body in a fluidized bed	15
B. S. SAZHIN: Principal factors determining the process of drying of chemical products in air-fountain dryers	19
Y. V. TSEKHANSKAYA and M. B. JOMTEV: A method of measuring diffusion coefficients of solid substances in compressed gases	24
V. P. SKRIPOV and P. I. POTASHEV: Heat transfer with carbonic acid along supercritical isotherms with free convection	30
V. O. FOGEL and P. G. ALEKSEYEV: A new method for the complex determination of thermophysical characteristics of polymers as they depend on parameters of the external medium, temperature and pressure	35
N. N. PONOMAREV-STEPNOI: Profiling of a thermal load along the length of a reactor channel taking into account irregularities of heating of the heat transfer agent	42
D. L. BRODER, A. A. KUTUZOV and V. V. LEVIN: Protective properties of water, polyethylene and Plexiglass	47
V. S. LUKYANOV: The application of the hydraulic analogy method to calculations on the temperature behaviour of ground taking into account heat transfer by filtration flow and to the deduction of certain criteria of similarity	52
B. I. DIDUKH: The dynamic interaction of a ramming plate with the soil being packed	58
A. I. ZHERNOVOI: The measurement of large relaxation times in a continuous liquid flow	64
N. V. KRYLOV and K. I. STRAKHOVICH: The temperature field of an insulating wall with finite transverse section traversed by a metal rod	72
N. I. GAMAIUNOV: Certain problems of heat and mass transfer	79
A. Y. PRESSMAN: The propagation in an aqueous medium of an admixture emitted by a source located above the surface of the reservoir	90
<i>Notes</i>	
S. I. DEVNIN: Oscillations of a console cylinder in a liquid flow	97
I. R. KRICHEVSKY, N. E. KHAZANOVA and L. S. LESNEVSKAYA: The Fick diffusion equation	101
A. L. VEREZOMSKAYA and M. F. KAZANSKY: Certain characteristics of the shrinkage of clays of various minerals during drying	104
Y. P. OSMININ: Thermophysical properties of molten metals	108
A. M. PODVALNY: Temperature strains and stresses in reinforced concrete caused by non-conformity of the thermophysical properties of steel and concrete	113
M. SH. MINTSKOVSKY: An elastic core in a sand base under an inclined load on an undeepened foundation	117
<i>Survey</i>	
M. P. VOLAROVICH, I. I. LISHTVAN and V. M. NAUMOVICH: Structural and rheological properties of dispersion and high-molecular systems	122
Reader's Guide	133
