

## CONTENTS LISTS

### JOURNAL OF ENGINEERING PHYSICS

Volume V, No. 8

August, 1962

	<i>Page</i>
S. I. KOSTERIN and Y. P. FINATYEV: An investigation of heat transfer of a turbulent air flow in an annular space between rotating coaxial cylinders	3
TSAI KO-EN: Heat transfer in a turbulent liquid flow for large values of Prandtl numbers and arbitrary viscosity	10
L. N. KHITRIN, M. B. RAVICH and L. L. KOTOVA: Sorption of oxygen in the process of carbon combustion (coke)	17
Z. Z. CHUKHANOV: High speed pyrolysis of hydrocarbons in a hot layer of coke	23
V. P. POPOV: On the choice of burner design for furnaces with a checker	29
V. K. MELNIKOV and E. Y. BLUM: An experimental method of determining the integral coefficient of beam absorptivity of a furnace medium	34
A. S. GINZBURG and V. A. REZCHIKOV: A method of calculating the duration of grain drying in a fluidized layer	40
L. M. NIKITINA and M. A. KUCHMEL: Mass capacity and mass transfer coefficient of some granular materials	48
S. ANDREY, C. KULITSE and P. SBENGE: Investigations of structure during the wetting of certain Roumanian loess	53
V. Y. CHEKHOVSKOI: Heat capacity and enthalpy of corundum in the temperature interval from 500° to 2000°C	62
V. A. LEVIDOV: Principles of construction of automatic electric measuring instruments for the investigation of the kinetics of slowly proceeding thermal processes	66
G. S. NUS: Similarity conditions and modelling of processes of arcless electric melting	71

#### *Notes*

A. P. BUKHVOSTOV and W. Y. FRENKEL: The temperature distribution in round and rectangular plates cooled by radiation in a vacuum for a given temperature on the contour	78
L. G. ZABELINA, G. V. NIKITINA, V. N. ROMANENKO and V. M. TUCHKEVICH: The effect of heat removal through the ends of an ingot on the results of zonal melting	81
E. V. GARKAVY: The question of thermal equilibrium in a high temperature gas flow	84
M. V. VOLK-LEWANOVICH: The measurement of the temperature of a mercury arc by the Bartels method	87
V. V. VLASOV: An automatic device for giving quasistationary heat conditions	90
S. B. BYKOV, A. D. KARATEYEV, P. T. ORESHKIN and I. S. RAEVA: A microheat resistor for working temperatures up to 200°C	93
S. M. KOTLYAR: Heat conduction of a plane parallel layer	97
A. F. KHRUSTALEV: Heat conduction of a continuous cylinder	101
A. K. LEONTYEV: The steady-state temperature distribution in a flat wall heated by electric current	106

#### *Survey*

A. S. PREDVODITELEV: The problem of the equation of state of condensed media (Theoretical part)	108
-------------------------------------------------------------------------------------------------	-----

#### *Letter to the editor*

V. A. ARKHANGEL'SKY, N. A. KARTVELISHVILI and G. K. MIKHAILOV: Comments on E. P. KOVALENKO'S investigations into unsteady motion of water in open channels	130
E. P. KOVALENKO'S reply	132

#### *Chronicle*

V. S. ERMAKOV: The First Byelorussian Nuclear Reactor begins operation	138
L. L. VASILYEV: International Conference on Heat Transfer	140

## CONTENTS LISTS

### JOURNAL OF ENGINEERING PHYSICS

*Volume V, No. 9*

*September, 1962*

	<i>Page</i>
I. B. DANILOV and V. E. KEILIN: Heat transfer and hydraulic resistance of tubes with spiral fins in a longitudinal flow	3
M. E. SHITSMAN: On the heat transfer crisis in vapour channels	9
G. D. RABINOVICH: Methods for determination of optical characteristics of selectivity absorbing semi-transparent materials	16
A. G. TABACHNIKOV: Calculation of thermodynamic properties of real gases at high temperatures	25
V. V. PUCHKOVSKY and E. G. MYAKININ: Thermal breakdown of a two-layer dielectric	33
V. S. ERMAKOV, N. G. KONDRASHOV, T. L. PEREL'MAN, E. A. ROMASHKO and V. B. RYVKIN: The temperature field in a reactor cylindrical fuel element cooled by a turbulent liquid flow	38
L. A. LATYSHEV and N. I. KOZHEVNIKOV: Calculation of temperature fields in the wall of a finite hollow cylinder under non-uniform boundary conditions	44
L. N. ALEKSANDROV: On carbon contamination in tungsten due to diffusion from graphite oil	53
S. V. TSVINSKY: Application of capillary phenomena theory to manufacturing articles of a predetermined shape directly from the melt by A. V. STEPANOV's method	59
V. V. VLASOV: The automatic device for continuous determination of thermal diffusivity of solids under quasi-stationary thermal conditions	66
O. M. FRIDMAN: Electro-osmotic properties of brick walls	74
<i>Notes</i>	
M. G. MOISEEV: On the flow of gas into liquid through the Laval nozzle	81
S. P. KOLOSOV, I. A. OSTRYAKOV, V. A. SMIRNOV and V. M. SHELENKOV: Use of current-conducting polymers as thermal resistances	85
M. A. GOL'DSHTIK: On thin wire heating by alternating current	90
P. V. CHERPAKOV: On thermal inertia of thermoelements	94
L. K. GUSACHENKO: On the problem of the unsteady burning (melting) rate of a semi-infinite solid	99
<i>People in Soviet Science</i>	
LEV ABRAMOVICH VULIS (on his 50th birthday)	102
<i>Discussion</i>	
G. N. TRET'YACHENKO: The basic preconditions for the regular thermal regime theory	105
G. N. DUL'NEV: On regularization of temperature fields	112
A. I. CHAPLINA: On the criterion of regular thermal regime under various conditions of heating	118
<i>Chronicle</i>	
<i>International Journal of Heat and Mass Transfer</i> : A special issue dedicated to the First All-Union Conference on Heat and Mass Transfer in Minsk. A special issue in commemoration of the 70th birthday of E. O. SCHMIDT	126
<i>Readers' guide</i>	
New books	132
