

ERRATUM

E. CITAOKOGLU and J. W. ROSE: Dropwise condensation—The effect of surface inclination, *Int. J. Heat Mass Transfer* 12, 645–651 (1969).

Figures 2, 3 and 4 of the above-mentioned article were inadvertently published containing errors and omissions. The Publisher apologises to the authors for any inconvenience incurred.

In each case the ordinate should read:

$$\alpha, \text{ MW/m}^2 \text{ degC.}$$

FIG. 3: The following information was omitted:

Heat flux 0.84 MW/m^2 ; Plate thickness 0.5 in.

The open circles should be black dots to correspond with the caption.

FIGS. 2 and 4 are reproduced correctly below:

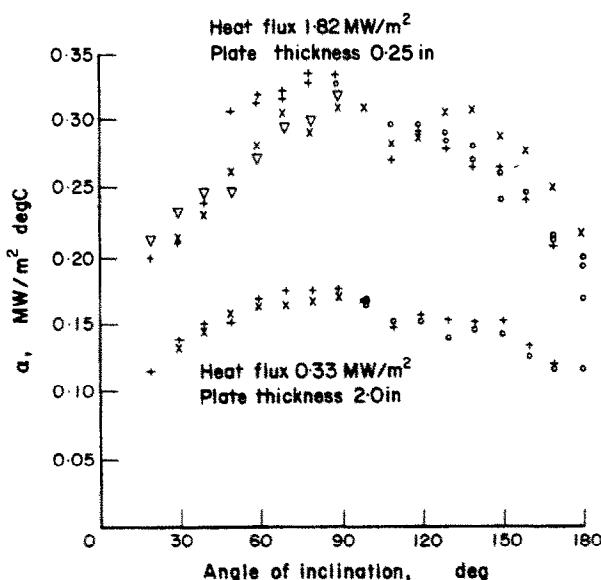

FIG. 2. Variation of the steam-side heat-transfer coefficient with surface inclination.

Sequence of observations: $\circ 90^\circ \rightarrow 180^\circ$
 $+ 180^\circ \rightarrow 20^\circ$
 $\times 20^\circ \rightarrow 180^\circ$
 $\nabla 90^\circ \rightarrow 20^\circ$

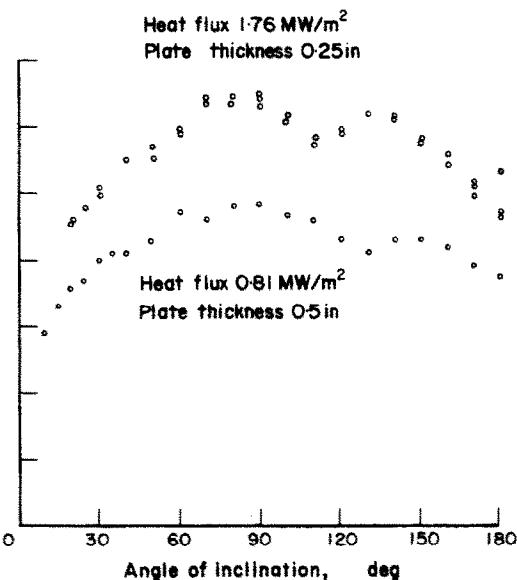

FIG. 4. Variation of steam-side heat-transfer coefficient with surface inclination.
