

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVIII, No. 2

February, 1970

Page

V. S. AVDUESKY and G. A. GLEBOV: Heat transfer at a front stagnation point of nondestructible body in flow of partially ionized air	201
L. A. SERGEEVA: Comparison of heat transfer intensity under steady and unsteady conditions	210
N. A. RUBTZOV and P. I. STEPANENKO: Radiant-conductive heat transfer in plane ammonia layer	216
A. SH. DORFMAN and O. D. LIPOVTSKAYA: Approximate solution of internal problem for a turbulent boundary layer	224
A. N. TIMOSHIN: The study of flow in a supersonic nozzle near its exit at different degrees of uncalculability	233
N. V. ROZE: Hydrodynamic analysis of rolling of some polymer materials	237
S. V. STEPANOV: Thermal conductivity of two-phase systems	247
G. G. SPIRIN, YU. A. POLYAKOV and S. D. SOLOMONOV: Pulse method for study of thermal activity of dielectric fluids	253
V. A. MALKOV: Thermal resistance of contact of furnished metal surfaces in vacuum	259
E. A. VLADIMIROV: Experimental determination of heat fluxes in walls of crystallizers for continuous teeming of metals	270
G. D. RABINOVICH: Convective drying of disperse material in the bed being mixed at cross motion of heat carriers	278
L. YA. VOLOSAN and I. V. CHERNYSHEVICH: Analytical study of heat and mass transfer in the solidification kinetics of concrete being treated in an electromagnetic field	286
A. D. MOLCHANOV, G. A. AKSELRUD, A. I. CHERNYAVSKY and I. N. FIKLISTOV: Method of spark discharges for mass transfer acceleration in solid-liquid system	293
M. K. KLEINER: Approximate methods applied to the problem of massive bodies heating for constant and variable aqueous number of gases	299
A. I. KAIDANOV: Choice of coordinate functions in solution of boundary-value problems by the Galerkin method	309
YU. S. POSTOLNIK: One-dimensional convective heating with time-dependent transfer coefficient	316
I. M. PRIKHODKO: Thermal conductivity of bilayer wall with time-variable heat transfer coefficient and temperature of ambient medium	323
Y. M. MATSEVITY: Solution of non-linear heat conduction problem at boundary conditions of the 4th kind	328
L. A. GORYAINOV: Heat conduction in a variable-length rod extracted out of the melt at constant velocity	333

Shorter Communications

A. K. POLUBOYARINOV and N. I. SPIRIN: The displacement law of central shock in underexpanded jet under action of obstacle	340
S. I. BALASHOVA, D. K. BERIDZE and V. S. BRONSHWAGER: Thermostat for the study of light dissipation in the vicinity of the critical point of solution lamination	343
N. I. INSAROVA: Viscosity of oriented solutions	347
I. A. TRUB: Methods of thermal calculation of multi-zone furnace for endothermal roasting in a fluidized bed	351
A. YA. INAYATOV: The study of heat transfer of a tube bundle in a longitudinal flow with transient conditions	353

Reader's Guide

Contents List of the <i>International Journal of Heat and Mass Transfer</i> 12, (8, 9) (1969)	358
Heat and Mass Transfer Bibliography	364

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVIII, No. 3

March, 1970

	Page
V. I. GOLDSHLEGER and V. V. BARZYKIN: Heat and mass transfer study of transverse high-temperature dust-gas flow over a cylinder	397
V. A. SYROMYATNIKOV and Z. R. GORBIS: Study of motion of transverse-blown layer on inclined surface	403
V. V. PERMYAKOV and A. M. PODSUSHNY: Hydraulic resistance of annular and disperse-annular regimes of two-phase mixture motion	409
V. I. YANKELEVICH: Effect of air-permeability on heat-insulating properties of porous envelopes	414
N. I. ZVEREV and S. G. USHAKOV: Physical and mathematical modelling of centrifugal separation of dust	422
A. M. TIKHONOV: Heat transfer study in Z-shaped heat exchangers	427
E. V. SMIRNOV and V. E. IONIN: Kinds of heat energy transfer in metal plasma-dusted coatings and some qualitative estimation of their thermal conductivity	436
E. P. DOBROVLSKAYA: Temperature field of spherical thermoacoustic probe	442
B. N. STADNIK and M. F. KAZANSKY: Effect of porous structure and absorbed moisture on ultra-sound propagation in models of capillary-porous bodies	449
B. A. BALANIN: Study of entrained super-sonic jet mass flowing out of a nozzle with uncalculable regimes	453
V. A. USPENSKY and V. I. SOLOVIEV: Calculation of eddy-dust-absorbing apparatus	459
A. G. BLOKH, S. M. BAZAROV and S. V. VARVARIN: Rate of generation of condensation germs in oversaturated vapour	467
A. A. MEN: An integral radiant-conductive heat transfer coefficient	474
R. S. MIKHALCHENKO, V. F. GETMANETS and B. YA. SUKHAREVSKY: Heat transfer mechanism in vacuum-laminated insulations	481
V. V. IVANOV and G. G. MEDVEDEV: Radiation heat transfer to a laminar fluid flow	487
E. M. GOLDFARB and B. I. SHERSTOV: Heat and mass transfer of scrap melting in oxygen converter	492
M. N. SHAFEEV, V. I. METENIN and A. T. SHMAREV: Determination of time of ground freezing by the method of concentric isotherms	499
A. M. FAIN: Approximate determination of temperature field in heat-transfer agent flow with account for axial thermal conductivity and internal sources	508
G. L. DOBROEDOV and V. I. KRYLOVICH: Thermal calculation of combined transpiration-liquid cooling the walls of discharge chamber of electric-arc heater	512
P. M. KOLESNIKOV and N. N. STOLOVICH: Relaxation processes in electrodynamic plasma acceleration	517

Shorter Communications

V. S. NESHPOR, B. A. FRIDLENDER and B. N. SHARUPIN: Thermal diffusivity of pyrolytic zirconium diboride at high temperatures	527
L. N. POLYANIN: Solution of the third boundary-value problem for axi-symmetric regions	531
V. P. RUSANOV, B. G. SAFRONOV, V. L. VERESHCHAGIN and N. P. POPOV: Study of heat fluxes in a plasma accelerator	534
YU. V. IVANOV, M. K. LAATS and F. A. FRISHMAN: Dissipation of heavy admixture in a two-phase jet	538
A. G. GABRILIANTS: Choice of pitches in space-time grid when calculating temperature fields	542

Prominent Soviet Scientist

ISAAK PAVLOVICH GINZBURG (to his 60th birthday and 40th anniversary of his scientific and pedagogical activity)	546
FEDOR PETROVICH VINOKUROV (to his 70th birthday and 47th anniversary of his scientific and practical activity)	548

Letter to Editor

R. S. KUZNETSKY: Temperature distribution in liquid layer on a horizontal solid surface	550
---	-----

Abstracts of Deposited Papers

G. A. MOSTOVOY: Unsteady-state heat transfer in under-ground channels and tubes	551
---	-----

Reader's Guide

Heat and Mass Transfer Bibliography	552
-------------------------------------	-----

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English Abstracts)

Volume XVIII, No. 4

April, 1970

	<i>Page</i>
S. G. SUVOROV: Lenin's teaching of knowledge and physics	585
A. V. LUKOV: Prognosis on development of the science of drying of capillary-porous colloid bodies	609
P. M. BRDLIK, V. A. MOCHALOV and V. G. SUGAK: Porous blowing and suction with free convection on a horizontal permeable surface	617
V. V. YAGOV, A. K. GORODOV and D. A. LABUNTSOV: Experimental study of heat transfer in liquid boiling at lower free pressures	624
A. A. ANDREEV, V. N. DAKHNO, V. K. SAVIN and B. N. YUDAEV: Study of heat transfer in gradient flow with a plane turbulent jet impinging a plate normal to flow	631
S. P. DETKOV: One characteristic of gas radiation with respect to full spectrum	638
M. K. LAATS and F. A. FRISHMAN: Dissipation of inertia admixture in two-phase axisymmetric jet	643
N. V. PASHATSKY, N. I. SYROMYATNIKOV and A. N. KOVSHOV: Gas outflow with solid particles out of tubes at critical velocities	648
A. A. BOCHKAREV, V. A. KOSINOV, V. G. PRIKHOD'KO and A. K. REBROV: Outflow of rarefied gas mixtures out of an orifice	653
V. F. DUNSKY and L. M. MONDRUS: Structure of turbulent jet to semipermeable wall (flat grid)	661
B. P. USTIMENKO and V. N. ZMEIKOV: Energy balance of averaged and oscillation motion in circular turbulent flows	664
A. L. STASENKO: Anisotropy of free path length in steady-state gas flows	671
A. M. TIKHONOV: Effect of flow rate nonuniformity on heat exchanger efficiency	678
S. G. ILIASOV and V. V. KRASNIKOV: Double-beam method of determination of thermoradiation properties of materials dissipating radiation	688
E. A. BELSKAYA and A. S. TARABANOV: Experimental study of thermal conductivity of highly porous carbon-graphite materials	696
P. N. PLATONOV, V. E. GLUSHKOV, L. I. KARNAUSHENKO and N. V. NAUMENKO: Study of physico-mechanical properties of loose materials	702
KH. M. GEIMAN and L. I. RUBINSHTEIN: Numerical solution of a three-dimensional Stefan problem	709
V. P. KOZLOV, A. G. SHASHKOV and G. M. VOLOKHOV: Analysis of a two-dimensional temperature field of a finite cylinder with a plane internal heat source of constant power at boundary conditions of the first kind	720

Shorter Communications

M. V. SUSHCHIKH and E. F. MOSIN: Problem of free convection near a horizontal cylinder with a constant heat flux on the surface	727
A. D. ALTSHUL and M. SH. MARGOLIN: Generalized formula of circumferential velocity distribution in eddy funnels	731
V. S. BATALOV: Determination of local heat transfer coefficient by dilatometric methods	734
YU. G. ZHULEV and YU. F. POTAPOV: Heat-removing radiation system for cooling short cylindrical bodies	737

Survey

B. A. KHRUSTALEV: Radiation properties of solid bodies	740
--	-----

Reader's Guide

Contents List of the <i>International Journal of Heat and Mass Transfer</i> 12, No. 10 (October (1969))	763

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English Abstracts)

Volume XVIII, No. 5

May, 1970

	<i>Page</i>
V. S. AVDUEVSKY and G. A. GLEBOV: Heat transfer in the vicinity of a stagnation point on permeable surface	777
G. A. BABALYAN, M. KH. AKHMADEEV and T. V. STARTSEVA: Measurement of surfactants diffusion in liquids at low concentrations	783
B. I. NIKOLAEV and A. A. TUBIN: Effect of density change due to concentration on separation of liquid mixtures in thermodiffusional columns.	790
A. V. ROKHLENKO and V. A. LAVRENKO: Measurement of liquid in absorption of diffusing particles by moving thermometer	795
V. G. LITVINOV and V. M. GONCHARENKO: Non-Newtonian fluid flows under conditions of nonuniform temperature distribution	802
I. P. GRINCHIK and A. KH. KIM: Screw motion of a cylinder in power law non-Newtonian fluid	810
O. M. TODES, N. V. ANTONISHIN, L. E. SIMCHENKO and V. V. LUSHCHIKOV: Possibility of describing the process of unsteady-state heat conduction of dense disperse systems by differential equations allowing for the peculiarities of phase interaction	815
A. I. TAMARIN: Effective thermal conductivity of disperse fillings	823
G. P. YASNIKOV and N. I. SYROMYATNIKOV: Entropy losses when gas-dust suspension flows in a nozzle	828
S. E. SAKS: Determination of critical velocity of a suspension flow	832
M. S. VOLYNSKY and A. S. LIPATOV: Deformation and breaking of drops in a gas flow	838
V. F. PRISNYAKOV: Growth of bubbles in liquid	844
G. N. DULNEV, YU. P. ZARICHNYAK and B. L. MURATOVA: Calculation of thermal conductivity of binary gas mixtures	849
M. M. REVYAKO, L. L. VASILIEV, A. I. ZELENSKY, A. A. ZHERKO, I. I. BATYUTA, L. F. PETROVA and V. V. ZHUK: Dielectric and thermophysical properties of filled polyethylene	856
M. A. FIALKOV and T. A. FIALKOVA: Calculation of dynamic characteristics of turbulent heaters	860
L. S. SLOBODKIN and G. N. LEBEDEVVA: On temperature field in technical cloth in a three-layer system	865
P. A. NOVIKOV and E. A. VAGNER: Determination of probable local vapour flow velocities near subliming ice in rarefied gas	873
I. L. SHLEIFMAN: Temperature calculation of contact surface in powerful electric arc of power frequency	878
P. Z. LIVSHITS: Thermo-elastic stresses in a long hollow cylinder at local heating of side surface by the Newton law	883
N. A. YARYSHEV: Transition functions for temperature of a body under total thermal effects	892
B. M. BERKOVSKY and V. G. BASHTOVOI: Waves in ferromagnetic fluids	899
V. N. ZALESOV: Extension of the limit analysis method to the study of plastic flow of bodies of varying geometry	905
V. Z. BORISOV and P. L. KIRILLOV: Experimental study of heat transfer mechanism with a single centre of bubble generation	910
<i>Shorter Communications</i>	
L. I. SKURIN: Analytic presentation of fluctuation energy in a wake	916
A. N. SEKUNDOV: Propagation of a plane turbulent jet from a linear source at a wedge top	919
I. A. CHUCHKALOV and S. A. ABRUKOV: Remarks to theoretical analysis of vibrational flame propagation	924
O. A. E. EISMONT: Solution of nonlinear heat conduction equation in the presence of volume heat generation sources	927
V. S. SHKLYAR: Electric model for solution of heat and mass transfer problems	931
LEON GUSTAV HAMBURGER: Obituary.	935
<i>Reader's Guide</i>	
Contents List of the <i>International Journal of Heat and Mass Transfer</i> 12, No. 11, 1969.	937
Heat and Mass Transfer Bibliography	940
