

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

Volume XX, No. 2

February, 1971

(Published in the U.S.S.R. in Russian with English abstracts)

	<i>Page</i>
G. V. VINOGRADOV, L. V. TITKOVA and A. S. MOROZOV: Concentrational dependence of "elastic recoil" in polymer solutions	197
S. G. GALAKTIONOV and G. N. NIKIFOROVICH: Choice of dielectric constant for calculation of complex molecular systems	200
B. I. LAPUSHINA and A. KH. KIM: Stationary isothermal flow of non-Newtonian fluid in a parabolic confusor	205
N. N. KRASIKOV: Obliteration of capillary slots in mineral oil flows	210
V. M. LEGKY and A. S. MAKAROV: Heat transfer in thermal initial section for a stabilized turbulent air flow in circular and rectangular channels	215
E. M. TYNTAREV: Effect of overradiation on temperature of finned tubes	224
L. K. TSABEK: Mass transfer in granular column with nonequilibrium sorption at the phase interface	230
R. YA. GUREVICH: Effect of longitudinal temperature gradient on separation in a flat thermodiffusional column	239
L. YU. ARTYUKH and E. A. ZAKARIN: Mixing uniform flows of dissociating air	246
V. E. MASLOV, V. D. LEBEDEV, N. I. ZVEREV and S. G. USHAKOV: Study of aerosol trajectories in an isothermal gas curvilinear flow	255
L. I. SCHMIDT, V. V. KONSETOV and V. A. PROSKURYAKOV: Formation of bubbles in throttling oversaturated liquids	261
N. N. MEDVEDEV: Differential method of determining thermophysical properties of materials	268
A. I. TAMARIN and I. I. KALTMAN: Study of effective thermal diffusivity of a vibro-fluidized bed	274
V. P. KOZLOV: Groundation of unsteady methods of determining thermophysical properties	281
A. I. CHUFAROVSKY and M. M. MAKAROV: Experimental installation for studying kinetics and dynamics of convective drying at variable parameters of a drying agent	287
E. P. DYBAN, E. G. POPOVICH and V. M. REPUKHOV: Efficiency of heat shielding of a flat wall when air is injected through a slot at an angle to the surface being protected	294
S. M. KRIZHANSKY: Calculation of thermal interaction between arc column and electrodes	299
L. I. SHARAKHOVSKY: Experimental investigation of electric arc motion in an annular ventilated gap under the action of electromagnetic forces	306
G. B. PETRAZHITSKY and A. M. PYLAEV: Axisymmetric thermal interaction between two finite cylinders	314
B. YA. LYUBOV and N. I. YALOVOI: Heat transfer in sheet rolling	321
N. YU. TAITs, A. G. SABELNIKOV and V. V. MOSHURA: Determination of maximum temperature and voltage drops for infinite cylinder heating	329
SH. SH. ABELSKY and V. K. PASHKOV: Temperature field of rotating flexible disks	338

Shorter Communications

D. A. NARINSKY: Effect of interphase heat transfer on longitudinal thermal conductivity in a granular layer	344
M. S. EPSHTEIN: The Chebyshev polynomial approximation of the roots of transcendental equation	347

Abstracts of Deposited Papers

I. I. GOGONIN: Power exponent of heat flux in experiments with heat transfer in boiling fluid	349
E. G. VELIKANOV and A. K. REBROV: Use of cryogenic evacuation in gas dynamic installation of low density	350
V. B. KHABENSKY, O. M. BALDINA, V. G. ZINKEVICH and R. I. KALININ: Effect of parameters on the boundary of flow stability in the system of parallel vapour-generating tubes	351
V. S. PIKASHOV, A. E. ERINOV, YA. B. POLETAEV and V. M. OLABIN: Determination of temperature and radiation properties of flame by the method of changing beam length	352
O. F. PUTIKOV and V. A. ROMANOV: Temperature field of rocks with regard for slit influence	353
V. YA. SMORGONSKY and YU. A. ILLARIONOV: Determination of the roots of some transcendental equations including Bessel functions of the first and second kinds and their derivatives	354
B. M. RASPOPOV: Analytic study of the possibility of temperature field control by distributed thermal resistors	355
V. S. PETROVSKY and E. E. DENISOV: Solution of an unsteady heat conduction problem for a gas turbine disk with belting blades on the leg by the grid method	355
A. YA. CHERNYAK and E. A. BONDAREV: Solution of convective diffusion problem for media with stagnation regions	357
YU. M. MATSEVITY and V. E. PROKOFIEV: An electric model for studying nonlinear heat conduction problems	357
L. I. ROIZEN and G. I. ABRAMOV: Thermal calculation of current leads in cryogenic electric devices	358
A. G. GORELIK: Unsteady thermal conductivity of coaxial insulated disks	359

Prominent Soviet Scientist

OSKAR MOISEVICH TODES (to his 60th Birthday and 40th Anniversary of the scientific activity)	361
--	-----

Reader's Guide

Heat and Mass Transfer Bibliography	363
-------------------------------------	-----

JOURNAL OF ENGINEERING PHYSICS

Volume XX, No. 3

March, 1971

(Published in the U.S.S.R. in Russian with English abstracts)

	<i>Page</i>
G. V. VINOGRADOV, YU. G. YANOVSKY, A. I. ISAEV, V. P. SHATALOV and V. G. SHALGANOVA: Vibrational effect on viscoelastic behaviour of monodisperse polybutadienes	389
A. SH. DOREMAN and V. K. VISHNEVSKY: Boundary layer of non-Newtonian power-law fluids at arbitrary pressure gradients	398
V. I. BALAKHONOVA, P. A. NOVIKOV and V. M. SUBACH: Effect of mass transfer on heat transfer at liquid evaporation from an open surface in rarefied gas medium	405
G. A. GEMMERLING: Calculation of a plate temperature field with internal heat sources	411
V. M. NIKOLAEV and A. N. SHERSTYUK: A developed turbulent flow and heat transfer in a diffusor formed by parallel walls	415
V. F. DUNSKY and YU. V. YATSKOV: Evaporation in a turbulent free air-drop jet	423
R. A. NORDEN and A. G. USMANOV: The study of convection onset in horizontal liquid layers	427
YU. A. GOSTINTSEV and V. M. ZAITSEV: Kinematic similarity of a turbulent swirled flow in a tube	434
V. K. ALIYAROV and Z. SAKIPOV: Application of an equivalent heat conduction theory problem to calculation of semi-infinite turbulent jets	439
V. Z. GUREVICH and F. E. GERTSENSHTEIN: Experimental study of a circulation gas lens	446
L. B. IBRAGIMOVA and S. A. LOSEV: Determination of equilibrium gas structure in reacting mixtures at high temperature	453
A. L. MOSSE, V. A. MENKH, V. K. ZABRODIN and I. A. KRYLOVA: The study of some reactor installation schemes in application to oil pyrolysis in a plasma jet	462
P. M. KOLESNIKOV and N. N. STOLOVICH: Study of the influence of triple electron and ion recombination on electrodynamic plasma acceleration	467
N. E. RAZORENOV: The "inductor-product" system as a control object for inductional continuously-successive heating	476
L. G. CHERNAYA: Thermodynamics of hygroscopic state of disperse bodies	481
E. I. POLYAK: Method of solving a reverse heat conduction problem. Decoding of heat flux measurements by calorimeters	488
L. N. KOLTUNOVA, L. S. POZIN and M. E. AEROV: Convective diffusion at mass bubbling	493
V. M. KULYAPIN: Some heat conduction problems with phase transformations	497
E. G. TUTOVA, L. N. NOVICHENOK and V. D. KONONENKO: Probe method in application to the study of thermophysical properties of biological masses	505
YU. A. NAPARGIN and V. I. SHAKHURDIN: Schlieren-method as applied to the study of temperature fields in a solid	510
V. A. KIRILLOV and YU. SH. MATROS: Transfer of substance in free volume of a fixed granular layer	515
G. P. STELMAKH, E. I. RYABTSEV, N. A. CHESNOKOV and V. A. KOSARENKO: Experimental study of gas heating efficiency in a sectioned plasma generator with channel adjustment	522
V. M. GOLTSMAN and M. G. KOMISSARCHIK: Methods of measuring thermal and electric conductivities of small cross-section samples within 80–400°K	527

P. P. SHILONOSOV and A. S. LYALIKOV: Definition of absorbing power of internal surfaces of a cylindrical vacuum chamber	534
A. A. BOCHKAREV and A. K. REBROV: A method of obtaining steady-state gas mixture flows with given concentration	539
M. A. GRISHIN and A. YA. LISTOPAD: Mass transfer coefficients of citrus fruits	543
S. O. LEKHTMAKHER: Sedimentation of particles out of a laminar flow depending on the Péclet number	546
<i>Survey</i>	
L. L. VASILIEV and S. V. KONEV: Heat transfer units	550
