

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXI, No. 1

July, 1971

Page

YU. F. IVANYUTA and L. A. CHEKALOVA: Experimental study of a turbulent flow of dilute polymer solutions in tubes of various diameters	5
M. M. BAIDA, G. E. GORELIK, V. G. LEITSINA, T. L. PERELMAN and N. V. PAVLYUKEVICH: Combined effect of slip and permeability conditions on flow and heat transfer in the vicinity of the cylinder critical point	13
P. M. BRDLIK and I. S. MOLCHADSKY: Heat and mass transfer in a binary laminar boundary layer with free convection on a vertical porous surface	19
YU. A. POLYAKOV: The study of boundary layer stability in the presence of intense heat transfer	29
B. E. LUZHANSKY, V. P. SOLNTSEV and V. G. LIMONOV: On the calculation of heat transfer in stall regions using local flow parameters at the border of a wall boundary layer	34
A. I. BORISENKO, K. F. NECHITAILO, V. A. SAFONOV and A. I. YAKOVLEV: Hydraulic resistance and heat transfer in an annular channel with a rotating flow	38
N. V. PASHATSKY, N. I. SYROMYATNIKOV and B. A. LETNITSKY: Wearing peculiarities of nozzles using gas with solid particles	43
P. N. ROMANENKO and V. G. KALMYKOV: Establishing relationship between turbulent stresses and averaged flow characteristics in incompressible fluid flow with a positive pressure gradient	48
L. A. VULIS, V. G. ZHIVOV, O. A. KUZNETSOV and L. P. YARIN: The study of a transient flow region in free gas jets	58
B. M. BERKOVSKY and A. A. BARANOV: Free convection in strong gravity fields	63
B. M. SMOLSKY, P. A. NOVIKOV and L. A. SHCHERBAKOV: Heat and mass transfer in steam condensation from humid air in narrow channels	71
V. K. MIGAI: Peculiarities of convection heat transfer in narrow slits	75
V. V. BARELKO: Convective heat transfer of a cylinder in a transverse gas flow	78
V. P. GAVRIKOV: Heat transfer at vapour condensation on a jet	84
V. D. VORONTSOV: Wave phenomena in a two-phase fluid	92
B. L. KRIVOSHEIN and V. P. RADCHENKO: Linearization of equations for unsteady-state nonisothermal real gas flow in tubings	100
A. E. SEGALOV: Calculation of inertia effect on deformation of a polymer rod under the action of vibrational loads	109
V. P. DUSHCHENKO, B. G. IVANITSKY, O. YA. SEMKO and V. N. SMOLA: Temperature dependence of the electro-osmosis coefficient in capillary-porous bodies	114
S. S. ZABRODSKY, V. A. BORODULYA, R. L. TOFFENETS and G. G. TYUKHAI: Mechanism and efficiency of metal part cementation in an electrically fluidized bed	120
G. S. BELKIN: Thermal processes on film cathodes under electric arc effect	127
N. A. MINYAIENKO: Effect of basic factors on flow temperature in a channel being cooled	132
A. A. GUSEV: Radioisotope study of admixture transfer in air flows	136
V. N. GAVDZINSKY and D. V. MALTSEV: A dynamic thermoelasticity problem for a hollow cylinder	145
B. N. ZAMSKY: To the theory of the Soret effect in electrolytes	152
I. F. BAKHAREVA and A. F. KRYLOV: Variational method of describing nonlinear nonequilibrium processes	161
P. V. CHERPAKOV and N. G. SHIMKO: Forced fluctuations in the system of heat and mass transfer at the finite transfer rate	165
E. P. BURMINSKY, V. L. GORYACHEV and I. V. NOVOSELOV: A piezoelectric probe for pressure measurement behind the shockwave front	168
B. B. DAVYDOV and L. YA. MINKO: Destruction of plasma generating test bodies in pulse plasma accelerators	172
V. G. ANDREEV and P. I. ULYAKOV: Thermoelastic wave with account for the heat propagation velocity	176

Abstracts of Deposited Papers

S. V. STEPANOV: Estimation of thermal conductivity of ordered two-phase systems	181
A. I. LOGVINENKO and V. N. SEREBRYANSKY: Calculation of non-stationary temperature field in a hollow cylinder	182
M. K. KLEINER: Optimization of "thin" bodies heating in furnaces	183
V. E. DAVIDSON, A. P. TOLSTOPYAT and N. P. FEDORIN: Comparison of loose material flow rates from flat and cylindrical bunkers	184

Prominent Soviet Scientist

ANDREI KAPITONOVICH KRASIN (To his 60th birthday and 40th anniversary of his scientific activity)	186
---	-----

Chronicle

The Fourth All-Union Conference on Heat Transfer and Hydraulic Resistance of a Two-Phase Flow in Units of Power Machines and Apparatuses	188
--	-----

Reader's Guide

Contents List of the <i>International Journal of Heat and Mass Transfer</i> , Vol. 13, No. 12, (December 1970)	190
--	-----

JOURNAL OF ENGINEERING PHYSICS*(Published in the U.S.S.R. in Russian with English abstracts)*

Volume XXI, No. 2

August, 1971

	Page
S. P. DETKOV: Emissivity of volumes and angular coefficients in the systems with real medium	205
A. G. GOLUBCHIN: Radiative and conductive heat transfer in parallel plates with lateral supply (removal) of heat	213
SH. G. KAPLAN and R. E. TOLCHINSKAYA: Heat transfer and hydraulic resistance laws under forced motion of liquid at super-critical pressure	219
V. I. DUBOVIK: Combined laminar convection heat transfer at injection (suction)	225
V. I. BLINOV and V. V. DOBRYNINA: On evaporation of emulsion drops in calm air	229
I. L. POVKH, E. M. LEVIN and YU. V. SUSLIN: Peculiarities of propagating annular free turbulent jets	238
V. I. BRONSHTEIN, B. N. YUDAEV and T. L. PERELMAN: A blunt body in a supersonic flow of gas mixture including chemical reactions	242
A. K. POLUBOYARINOV and N. I. SPIRIN: Shock wave and tangential discontinuity interaction	251
E. E. DENISOV and V. S. PETROVSKY: Statement of two-dimensional unsteady-state heat conduction problem for the blade disk of a gas turbine	257
A. G. GORELIK: Temperature field in a tube section with heat-generating granular bed	265
G. F. SMIRNOV and V. I. BARANENKO: Experimental study of temperature profiles in a thermal boundary layer at free liquid boiling	271
YU. A. KIRICHENKO, V. V. TSYBULSKY and A. V. KOSTROMEYEV: Heat transfer at pool boiling of liquid oxygen	276
D. P. LEBEDEV and V. V. SAMSONOV: Temperature discontinuity and mechanism of external heat and mass transfer over a permeable surface with ice-water sublimation into vacuum.	283
V. M. KOSTYLEV and V. YA. BELOSTOTSKAYA: Radiative and molecular heat transfer in heat-insulating materials of low volumetric densities	290
P. A. NOVIKOV and B. G. MIKHNYUK: Thermal conductivity of porous materials depending on moisture content	296
L. E. KRIGMAN and A. P. BASKAKOV: The study of horizontal effective thermal conductivity of an alumina fluidized bed in a stationary regime	301
V. YA. CHEKHOVSKOY and B. YA. BEREZIN: Application of an electromagnetic "crucible" when measuring metal enthalpy	309
Z. F. KARIMOV: On two fluid mixing in a developed turbulent flow in the presence of a shield with low permeability at the interface	313
A. V. CHACHATURYANTS and M. K. ZAITSEVA: The study of heat transfer in a tubular reactor for high-pressure polyethylene	318
S. A. BOSTANDZHIAN, V. I. BOYARCHENKO and G. N. KARGAPOLOVA: Nonisothermal extrusion of anomalous-viscous fluids at combined shift	325
A. I. NARBEKOV and A. G. USMANOV: The study of thermal diffusion in fluids	334

G. D. RABINOVICH and R. YA. GUREVICH: Transient process in a thermodiffusional column with temperature asymmetry	341
V. P. KUCHINOV, B. I. NIKOLAEV and A. A. TUBIN: Separation of binary liquid mixtures in thermodiffusional columns with filling	347

Shorter Communications

A. N. GLUSHAKOV and V. I. VORONIN: Unsteady temperature field in a porous body with gas filtration	354
V. G. LEITSINA and N. V. PAVLYUKOVICH: Unsteady-state temperature discontinuity	357
G. F. GORELIK and S. G. ROZIN: The use of Haudsmith-Saunders theory with the energy range from 1 to 20 keV	359

Chronicle

361

Abstracts of Deposited Papers

E. N. KONSTANTINOV, V. F. PETIN, V. A. KUZNECHIKOV and E. SH. TELYAKOV: Gas-phase mass transfer at non-equimolar substance transfer in a film column	362
G. F. SMIRNOV and V. G. LUNEV: Measurement of the critical intensity of an electrostatic field for a falling liquid dielectric film	362
L. I. ROIZEN, YU. V. PETROVSKY and G. R. RUBIN: Measurement of heat influxes in a vessel throat with cryogenic liquid	364
R. S. KUZNETSKY: The effect of temperature dependence of the conductivity on distribution of temperature, current and electromagnetic field in a flat layer	365
B. P. USTIMENKO and N. D. GOBYZOVA: Calculation of turbulent flow characteristics in a flat curvilinear channel	367
I. V. DOMANSKY: Heat transfer at nucleate boiling of free running out film	368
T. V. GUREKOVA, P. A. NORDEN and A. G. USMANOV: Experimental study of radiation effect on heat transfer in flat liquid layers	369
A. I. BERTINOV, O. M. MIRONOV, V. N. BAZAROV and V. F. IVANOV: Experimental study of equivalent thermal conductivity of sheet electrotechnical steel packets	370
V. E. VOLKOV, R. A. RYABOV and P. V. GELD: Determination of hydrogen diffusivity in metals by the method of steady-state flow development	372
O. F. TITOVA and A. S. TROFIMOV: An approximate solution of a thermal problem	372
N. M. BELYAEV and A. A. RYADNO: Calculation of temperature fields of solids in a container at nonlinear boundary conditions	373
A. P. BARANOV, YU. G. MANASYAN and A. E. SOLOVIEV: Mathematical description of unsteady-state processes in thermal electric generators with account for parameter distribution	374
V. F. DUNSKY and L. I. MONDRUS: Turbulent air jet through semi-permeable wall	375
V. A. SHUVALOV: The study of parameters of non-equilibrium high-frequency discharge plasma flow in helium	376
S. I. MESHKOV and YU. A. ROSSIKHIN: Temperature dependence of damping coefficients of dynamic system with singular heredity nuclei	377

Reader's Guide

Heat and Mass Transfer Bibliography	379

JOURNAL OF ENGINEERING PHYSICS*(Published in the U.S.S.R. in Russian with English abstracts)*

Volume XXI, No. 3

September, 1971

Page

S. L. RIVKIN, A. YA. LEVIN, L. B. IZRAILEVSKY and K. G. KHARITONOV: On the relationship between liquid viscosity and liquid thermal properties	405
V. I. BABII and I. F. POPOVA: Some peculiarities of burning out of fine fractions of coal dust	411
F. V. SHUGAEV and YU. G. LISIN: The study of a flat shock wave interaction with a blunt body in a supersonic flow	419
V. L. LELCHUK: A compressed gas flow in a circular tube of constant section with impermeable adiabatic wall	423
SH. G. KAPLAN: On the heat transfer mechanism in a turbulent liquid flow under supercritical pressures	431

N. P. KRUPSKY, A. V. CHALYI and YU. I. SHIMANSKY: Substance distribution along the height near the critical state of binary mixture vapour generation	438
G. A. AKSELUD, E. M. SEMENISHIN, R. P. DATSKO and K. I. DURANDIN: Mass transfer at sulfur extraction from a layer of sulfur ore particles	447
N. V. OLOVYANOVA and V. A. NELIDOV: The study of granular medium hydrodynamics	452
A. AKAEV and G. N. DULNEV: Kantorovich's generalization method in application to the boundary-value problems	460
P. F. FILCHAKOV and I. A. DRAITSUN: The Couchi problem for a nonlinear heat conduction equation encountered in the combustion theory and gas dynamics	467
YU. YA. IOSSEL: A combined plane heat conduction problem for a cylinder	476
L. YA. VOLOSAN, V. P. ZHURAVLEVA and I. S. YURKEVICH: Governing criterial relationships in the kinetics of cement material thermal treatment	480
N. B. VARGAFIK and L. V. YAKUSH: Experimental study of thermal conductivity of neon, krypton, xenon in a wide temperature range	491
A. L. MOSSE: Some heat transfer problems in a plasma-chemical reactor	500
N. F. ALESHIN, V. A. VASHKEVICH, A. S. SHABOLTAS and O. I. YASKO: The study of heat transfer in a cathode spot of electric arc in argon	505
B. M. BERKOVSKY and N. A. CHAMEEVA: Free convection in a vertical channel in an inhomogeneous magnetic field	510
L. A. BYCHKOVA: Experimental study of diffuser channels with a turbulent boundary in a pre-separation state	518
L. N. SRETENSKY: On the Couchy-Poisson problem	524
A. M. TOPUNOV, R. D. IOSIFOV and N. G. RODIONOV: Solution of direct problem of heat transfer between turbine blade under cooling and gas by the trial method	531
A. M. MAKAROV, V. V. LEONOV, V. I. DUBIVIK and G. N. SHVEDOVA: The problem of freezing liquid flowing onto a flat wall	537

Shorter Communications

G. A. AKSELUD, D. D. DRAGOMIRETSKY, S. I. BEREZOVSKAYA and V. A. EZHIZHANSKY: Mass transfer between solid particles and rotating liquid flow	547
YU. V. ABRAMOVICH, P. N. KOBTSEV: An analytical formula for equilibrium temperature	550

Surveys

L. N. AKSYUTOV, A. K. PAVLYUKOV and G. K. KHOLOPOV: Measurement of spectral radiation coefficients of materials by the method of comparison with a blackbody	553
L. P. FILIPPOV and R. P. YURCHAK: High-temperature study of solid thermal properties	561
