

CORRIGENDUM

E. NAITO and Y. NAGANO, The effect of buoyancy on downward and upward laminar-flow convection in the entrance region between inclined parallel plates, *Int. J. Heat Mass Transfer* **32**, 811–823 (1989).

Figure 8(a) on p. 817 indicates the skin-friction coefficient when only the upper wall is heated. The corresponding results for only the lower wall heated are given below.
