M. D. Jackson and M. J. Cheadle, A continuum model for the transport of heat, mass and momentum in a deformable, multicomponent mush, undergoing solid-liquid phase change, *International Journal of Heat and Mass Transfer*, 1998, **41**, 1035-1048.

The publishers regret that the following errors occurred in the above paper :

Equation (40) on p. 1039 should read as follows :

$$\kappa_{\text{eff}} = \frac{k\tau}{\rho c_{\text{eff}} \delta^2}$$

The symbols for thermal conductivity [in equations (3), (4), (20) and (26)] and the arbitrary constant [in equations (7)-(9)] should not have been set as bold letters as they are not vectors or tensors. Instead, they should have been set as sans serif letters, as in the corrected equation (40) above.
