INTERNATIONAL CENTER FOR HEAT AND MASS TRANSFER

1970 INTERNATIONAL SEMINAR
September 8–12, Herceg-Novi, Yugoslavia

HEAT AND MASS TRANSFER IN RHEOLOGICAL FLUIDS

The International Center for Heat and Mass Transfer was created in 1968 with the general objective of promoting and fostering international cooperation in the field. Special emphasis is placed upon research and its application. A major activity of the Center is the organization of the 1970 Seminar.

Invited lectures on rheological fluids will be given by a number of outstanding authorities drawn from Europe, the USSR, and North America. Shorter communications on current research in heat and mass transfer in rheological fluids are also invited. Authors wishing to present such shorter communications are asked to submit a single page abstract to one of the following members of the seminar committee:

Professor A. V. Luikov,
Heat and Mass Transfer Institute,
Academy of Sciences,
Minsk, BSSR, USSR.

Professor William R. Schowalter,
Dept. of Chemical Engineering,
Princeton University,
Princeton, New Jersey, USA.

Dr. Naim Afgan,
Boris Kidric Institute of Nuclear Studies,
Beograd, Yugoslavia.

A modest exhibition of scientific equipment used for the study of rheological systems is planned for the seminar. Manufacturers of scientific equipment are invited to participate.
