JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XV, No. 6

December, 1968

	<i>Page</i>
A. V. LUIKOV and B. M. BERKOVSKII: Onset of convection in cavities with variable wall temperatures	389
B. M. GALITSEISKII, YU. I. DANILOV, G. A. DREITSER, E. K. KALININ and V. K. KOSHKIN: Study of effect of heat transfer coefficient in tube	975
YU. P. FINATIEV, L. A. SHCHERBAKOV and N. M. GORSKAYA: Mach number distribution along the axes of supersonic jets	982
A. I. BORISENKO, V. A. SAFONOV and A. I. YAKOVLEV: Effect of geometric parameters upon the properties of a conic eddy refrigerator	988
P. M. GOFMAN-ZAKHAROV, K. V. DEMENT'EVA, A. M. MAKAROV and E. P. KARPOV: Vapour condensation on a cold liquid jet	994
A. G. GOLOVEIKO: Thermal processes on anode under conditions of a powerful pulse discharge	1000
A. S. SHABOLTAS and E. A. BOROVCHENKO: Study of heat removal into a cathode spot of a quick-flow electric arc	1009
G. D. RABINOVICH: Approximate estimation of the thermodiffusional constant value in isotopic liquid mixtures	1014
N. E. GOROBTSOVA: Study of moisture diffusion in moist materials	1019
V. M. KAZANSKII: Drying thermo- and energograms in application to determination of moisture of weak chemical bond with disperse bodies	1027
V. L. MEL'TSER, I. T. EL'PERIN and D. M. GALERSHTEIN: Flow of solid phase particles in counter gas-suspension jets	1034
A. L. MOSSE, V. V. PECHKOVSKII, V. A. MENKH and I. A. DVINDENKO: The possibility of thermal decomposition of phosphates in low-temperature plasma jet	1041
N. G. KONDRASHOV, T. L. PEREL'MAN, V. B. RYVKIN and M. M. BAYDA: Realization of a numerical solution to one heat transfer problem	1047
L. A. KOZDOBA and V. I. LEGENCHUK: Solution of reverse and inverse problems in metallurgic thermal engineering with the help of electric models	1059
A. G. GORELIK: Unsteady thermal conductivity of moist bodies	1067
Y. P. RASPUTIN: Heat flux from the region of chips formation to an article	1074
Y. A. SHUKEILO: Nonaxisymmetric temperature field of an infinite cylinder with a moving heating boundary	1080
O. T. IL'CHENKO and L. G. VORONOVICH: Presentation of an unsteady temperature field of a vapour turbine rotor by generalized functions	1086
V. G. ANDREEV and P. I. ULYAKOV: Thermoelastic destruction of transparent media by radiation of optical quantum generators	1093
S. I. MOROZOV and E. D. NAUMOV: Determination of heat inertia of thermocouples in an axisymmetric air jet	1100
V. V. VLASOV and V. A. SHACHNEV: One quasi-stationary method of determination of thermal properties of materials	1106
A. V. LOGUNOV and A. F. ZVEREV: Study of thermal conductivity and electric resistance of aluminum and aluminium alloy group	1114
A. G. ZHDANOV, V. E. LYUSTERNIK and D. L. TIMROT: Capillary viscosimeter for determination of vapour viscosity by a closed scheme	1120
A. A. BERKENGEM: Experimental study of heat transfer by convection in a closed cavity	1124
Y. F. TAINOV: Dielectric destruction by a pulse electric discharge in channels with ablating walls	1128
<i>Book Reviews</i>	
A. G. TEMKIN: On the book by A. V. Luikov <i>Heat Conduction Theory</i> , Vysshaya Shkola	1132
SH. N. PLYAT: On the book by A. I. Pekhovich and V. M. Zhidkikh <i>Calculations of Thermal Regime of Solid Bodies</i> , Energia (1968)	1135
Contents of the <i>Journal of Engineering Physics</i> , Vol. 15 (1968)	1137

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVI, No. 1

January, 1969

	<i>Page</i>
Sum total of the work of Byelorussian thermal physicists to the 50th Anniversary of the Soviet Byelorussia	5
A. L. STASENKO: Criteria for determination of the "boundary" of a solid flow in a free expanding jet	9
I. S. OLONICHEV: Calculation of a heat exchanger and hydraulic drag in a laminar dissociating gas flow in a circular tube	15
V. M. LEGKII and YU. D. KOVAL: Heat transfer of a plate under conditions of hydrodynamically stabilized turbulent flow of a boundary layer	22
N. P. IKRYANNIKOV: Temperature distribution in a laminar incompressible fluid flow in a rectangular channel at boundary conditions of the second kind	30
D. F. BOZHKO, E. I. MOLODYKH and A. V. PUSTOGAROV: Temperature distribution in a gas pipe heated by direct current	38
N. I. ZVEREV and S. G. USHAKOV: Stability of solid particle motion in a plane rotating body	43
E. K. KALININ, G. A. DREITSER and A. K. KOZLOV: Heat transfer for staggered bundles of tubes with various relative spacings in a longitudinal flow	47
N. G. STYUSHIN and L. M. ELINSON: Study of heat transfer intensity to boiling fluids at atmospheric and lowered pressures under free convection	54
K. Z. USHAKOV, V. YA. VOLK and R. T. POZVONKOVA: Turbulent diffusion of active admixtures	59
V. P. DUSHCHENKO, M. S. PANCHENKO and S. F. D'YACHENKO: Some aspects of temperature dependence in sorption of water vapours by capillary-porous bodies	67
V. A. MAKOVSKII: Frequency analysis of unsteady heat transfer in a disperse layer with a heat source	72
L. S. SLOBODKIN, S. G. KRASNICH and V. G. MANUSHIN: Effect of thermal radiation heating upon solidification of epoxy enamels	77
JARL SALIN: Projectively transformed scales of composition in charts of states of binary mixtures	83
G. M. VOLKOV and A. S. ZELEPUGA: Combined determination of thermal properties of solid and loose materials at room temperatures	95
E. M. TYNTAREV: Integral radiation coefficients of multirow tubular heat exchangers	101
M. P. KUZMIN and V. G. BASHUTSKII: Electric modelling of unsteady thermal processes in multilayer plates	106
S. K. MAMONOV: Thermal regime and thermomechanical strength of glass active elements of optical quantum generator	111
P. V. TSOI: Approximate calculation of thermo-elastic stresses under unsteady-state conditions	117
V. N. KOZLOV: Calculation of temperature field in an infinite plate with variable heat transfer coefficient	125
A. A. TSERFAS: Mass and heat transfer in capillary-porous materials in intensive convective heat transfer	129
M. D. MIKHAILOV: Dynamic problems of thermoelasticity	132
A. I. NARBOKOV, P. A. NORDEN and A. G. USMANOV: Application of an optical quantum generator as a light source when studying temperature fields and concentrations in liquids by interference method	136
E. G. YORONTSOV: Peculiarities of wave flow with varying free path of film	140
V. E. KUKONIN: Determination of temperature pulsations in cross-section of plasma jet	145
<i>Shorter Communications</i>	
R. S. KUZNETSKII: Temperature distribution in liquid layer on horizontal solid surface	148
V. F. PRISNYAKOV: Equation of state for boiling liquid	151
<i>Letter to the Editor</i>	
I. Y. KOLESNIK: Correction of the error in <i>On One of the Methods of Solving a Diffusion Equation</i> published in the <i>Journal of Engineering Physics</i> , Vol. 12, No. 2, 234 (1967)	154

CONTENTS LISTS

Book Review

L. L. VASILIEV: Review of *Progress in Aeronautical Sciences* Vol. 9, edited by D. Küchemann *et al.* (1968) 155

Chronicle

Z. P. SHULMAN: The 4th All-Union Conference on Physico-Chemical Mechanics 157

Reader's Guide

Contents list of the *International Journal of Heat and Mass Transfer*, Vol. 11, Nos. 7-9 (1968) 158

Heat and Mass Transfer Bibliography 163

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVI, No. 2

February, 1969

	<i>Page</i>
P. M. KOLESNIKOV, V. A. KOROTKOV and N. N. STOLOVICH: The study of the effect of mass transfer processes and resistance forces upon the electrodynamic plasma acceleration	197
A. I. GANNITSKII: Centrifugal effects in plasma rotation in a plane homopolar device	206
N. M. BELYANIN and N. A. ZYRICHEV: Correlation of the characteristics of a two-chamber electric-arc heater	212
A. AZIZOV, L. M. ZYSINA-MOLOZHEN, V. M. KUZNETSOVA and I. N. SOSKOVA: The study of effect of the temperature upon the transition from a laminar flow regime to a turbulent one in a boundary layer	218
V. P. KHARITONOV: Effect of fluid flow twisting upon intensification of convective heat transfer in a circular cylindrical tube	225
V. S. SEDACH and B. K. MUSLIN: Hydraulic resistances of orifices in a twisted flow	232
V. V. KHARITONOV: Some aspects of the similarity theory in application to the processes of the momentum transfer	240
A. R. GORDON, G. F. MUCHNIK, I. I. KOVALEV and L. A. SALNIKOV: Calculation of radiation heat transfer between two parallel infinite metal surfaces	246
R. P. DIDYK, S. S. KRASNOVSKY and A. G. TESLENKO: The methods of experimental estimation of axisymmetric motions of a tube wall in explosion deformation	251
B. A. IVAKIN and P. E. SUETIN: One problem of unsteady diffusion	257
L. S. SLOBODKIN and G. N. LEBEDEV: Mass diffusion coefficients in fillings of granulated polymers, technical cloths and ceramic materials with organic plasticator as a basis	262
S. G. ROMANOVSKII and E. A. RASKINA: Kinetics of the capillary absorption of liquids in a constant magnetic field	270
A. A. FILYUKOV: The holonomicity of Pfaffian forms of the thermokinetic potential and the properties of phenomenological coefficients symmetry	276
V. V. REVENKO: Analysis of some thermodynamic relationships at equilibrium phase conversions of the first kind	282
A. G. SHIFELBAIN: Some problems of a regular heat regime of two-compound bodies	292
M. D. MIKHAILOV: Generalized solutions of unsteady heat and mass transfer	299
V. P. RADCHENKO and B. L. KRIVOSHEIN: The application of the difference schemes of the grid method with small restrictions to the stability for the calculations of unsteady non-isothermal flows of real gases in tubes	308
A. G. GORELIK: Temperature field of a fluidized bed in a continuous apparatus	316
V. V. ALTUNIN and A. V. GVOZDKOV: One extrapolation method of p , v , T -dependence of compressed gases for higher temperatures	320
A. V. RASHKIN, N. G. SHUVALOV and Y. M. VEDYAEV: Thermal properties of thawing muds of glacial genesis	326
Y. A. POLVAKOV and G. G. SPIRIN: Determination of thermal activity of substances by a pulse method	330
I. Z. OKUN, B. S. FRAIMAN and A. F. CHUDNOVSKII: Account of the losses for radiation in measuring the thermal conductivity of thin plates and films	334
V. S. NOVOPAVLOVSKII: Estimation of the conductivity of flat bodies at boundary conditions of the third kind	342
<i>Survey</i>	
M. P. VOLAROVICH and N. I. MALININ: Investigations in the region of phenomenological rheology Konstantin Ivanovich Strakhovich*	356 373
<i>Chronicle</i>	
N. BRAZHNIKOV: Development of super-sound methods of controlling the physicochemical properties of substances * Obituary	375

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVI, No. 3

March, 1969

	<i>Page</i>
V. S. KAPLAN and V. M. SHCHEGLOVA: Three-dimensional laminar boundary layer on permeable plate	389
V. G. SHAKHOV: Slightly twisted radial-slit jet flowing out of an annular source of finite diameter	398
I. S. KOCHENOV and O. Y. NOVOSEL'SKII: Hydraulic drag in channels with permeable wall	405
I. E. IDEL'CHIK and Y. L. GINZBURG: Mechanism of effect of inlet conditions upon the resistance of diffusors	413
T. F. BEKMURATOV: Experimental study of porous and combined cooling in turbulent flow of air in a circular tube	417
Y. P. NEKHLEBAEV, V. M. DEMENTIEV and M. S. CHABAN: On resistance of a moving dense bed blown with a gas flow from below	423
Y. I. ANDRIANOV and A. G. BOL'SHAKOV: Some laws of drying granulated superphosphate	429
G. D. PETROV, R. N. SOKOLOV, V. A. VASILIEV and A. M. KAPKOV: Measurement of size-distribution of suspended particles by the method of small angles	438
V. P. DUSHCHENKO and I. A. ROMANOVSKII: Effect of moisture bond forms on electrophysical properties of Chasov-yarsk clay	443
L. Y. VOLOSAN and V. P. ZHURAVLEVA: Study of moisture diffusion in kinetics of high-strength concrete at various methods of thermal-moisture treatment	448
R. S. MIKHAL'CHENKO, A. G. GERZHIN, V. T. ARKHIPOV and N. P. PERSHIN: Effect of thickness of laminated-vacuum insulation on its effective thermal conductivity	456
V. S. RAVIN: Criteria characterizing thermal processes in crystallization of thin melt layers on foreign backings	464
V. S. BALAKIREV and E. B. MANUSOV: Computation methods of heat transfer coefficients of the apparatuses of periodic operation on electronic digital computer	472
Y. M. MATSEVITYI and V. E. PROKOFIEV: Electric model solution of non-linear steady heat conduction problems with the use of non-linear resistances	480
N. V. DILIGENSKII and V. V. BASOV: Heat transfer in moving contacting bodies	484
B. N. TOKARSKII: Tube-pipe heating optimization	489
A. S. ZINGERMAN: Temperature field of the system of two bodies with a heat source	494
S. P. DETKOV and A. V. VINOGRADOV: Approximate angular coefficients for two-dimensional problems	499
M. P. VUKALOVICH, V. V. ALTUNIN and G. A. SPIRIDONOV: State equations and thermodynamic properties of inert gases within the range for normal boiling point to 1300°K at pressures to 1000 bars. I. Krypton	504
O. B. TSVETKOV: Thermal conductivity of gaseous difluorodichloromethane	510
V. A. VERTOGRADSKII, V. N. KIRILLOV and V. A. EFIMOV: Method and installation for simultaneous determination of thermal properties of sheet non-metallic materials	516
A. I. ZHIDOVICH and O. I. YAS'KO: Some problems of generalization of voltage-current characteristics in blown electric arcs	521
G. A. AKSEL'RUD and D. D. DRAGOMERETSKII: Hydrodynamics of a centrifugal fluidized bed in the system solid-fluid	526
I. P. BASINA and I. A. MAKSIMOV: The effect of changes in the boundary layer of a spherical particle upon its aerodynamic drag at non-isothermal conditions	531
M. B. YAVEL'SKII: Some characteristics of monodisperse decay of a liquid jet	536

Book Reviews

V. E. AEROV, V. A. BUBNOV, P. M. KOLESNIKOV, B. A. KOLOVANDIN and O. G. MARTYNEKO: On the book by E. Y. Blume, M. V. Zake, U. I. Ivanov and Y. A. Mikhailov <i>Heat and Mass Transfer in an Electromagnetic Field</i>	539
A. G. SHASHKOV, V. I. KRYLOVICH and A. D. SOLODUKHIN: On the book by N. I. Brazhnikov <i>Ultra-Sonic Methods</i> Energia, M.-L. (1965)	542

Reader's Guide

Heat and Mass Transfer Bibliography	544
-------------------------------------	-----

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XVI, No. 4

April, 1969

A. A. GUKHMAN, V. A. KIRPIKOV, V. V. GUTAREV and N. M. TSIRELMAN: Study of heat transfer and hydrodynamic drag for a turbulent gas flow in the field of longitudinal pressure gradient with variable sign (Part I)	581
A. V. LUIKOV and Z. P. SHULMAN: The method of determining the coefficients of diffusion and friction drag in fluids	592
V. M. BUZNIK, Z. I. GELLER and A. K. PIMENOV: Heat transfer at the initial length of a rotary tube for a turbulent gas flow	597
A. I. LEONTIEV, B. P. MIRONOV and A. V. FAFURIN: Experimental study of turbulent heat transfer in the starting and stabilized regions of a cylindrical tube under the conditions of considerable nonisothermity	603
N. Y. TOBILEVICH, I. I. SAGAN and N. A. PRYADKO: On transient regime from bubble boiling to film boiling for water and water-alcohol mixtures with vapour heating of heat transfer surface	610
D. I. POLISHCHUK and N. V. FEDOSEVA: Burning of system of drops in liquid fuel	617
M. M. MAKAROV and L. A. LUKIN: Experimental method of studying the kinetics of convective drying with variable parameters of a drying agent	622
I. I. KALTMAN and A. I. TAMARIN: Study of heat transfer between a vibro-fluidized bed of disperse material and a body cooled by it	630
G. L. BABUKHA, M. I. RABINOVICH, G. I. SERGEEV and A. A. SHRAIBER: Experimental study of disperse material motion in ascending gas suspension	639
V. V. RIS, Y. A. SOKOVISHIN and V. F. STEPANOV: Free convection in a submerged plane jet	647
M. P. OVSYANNIKOV: Blowing effect on super-sonic flow around a cone	653
P. M. KOLESNIKOV and N. N. STOLOVICH: Energy relationships and coefficient of energy transformation for electrodynamic plasma acceleration with regard for mass transfer processes	659
A. S. PARKHOMENKO: Some results of studying energy parameters of electric-arc plasma installations	666
A. F. GANDEL'SMAN, B. A. KADER and G. G. KATSNEL'SON: Calculation of integral characteristics of a compressible ideal gas flow under adiabatic conditions	673
B. A. VASILIEV: Solution of a plane stationary heat conduction problem at the boundary condition of the 3rd kind for the regions bounded by cycloidal curves	680
P. Z. LIVSHITS: Thermo-elastic stresses in a long cylinder for heat transfer between the surface and external medium at variable temperature	687
I. B. TSESARSKII and E. A. MOTIN: Calculation of heat removal from finned and porous surfaces for parabolic distribution of a heat flux	694
N. V. PAVLYUKEVICH, V. G. LEITSINA and G. E. GORELIK: Account for interphase resistance for condensation of pure saturated vapours	700
F. M. MITENKOV, B. I. MOTOROV and E. A. MOTOROVA: On modelling of active water-moderated water-cooled reactor zone with variable number of boiling channels	707
E. V. SMIRNOV and E. S. SHKLYAREVSKII: Specific electric resistance of alumina put on backing by means of plasma and gas-flame pulverization	713
I. B. LEVITIN and A. I. KONTSEVICH: To the problem of accuracy of radiation pyrometers	717
V. S. PIKASHOV, A. E. ERINOV and V. N. RUSLOV: Determination of emissivity and real temperature of the surface by a pyrometer with packing	723
V. S. SEDACH and K. M. DYADICHEV: Pressure losses in a conduit with Venturi pipe	731
V. V. KHARITONOV: Thermal conductivity at finite velocity of heat distribution	737
D. I. ZAKS: Determination of thermal resistance	742
B. N. BIRGER: Relationship between different flows in a conducting system	746
P. G. DOBRYGIN, L. K. VASANOVA and V. I. DAVYDOV: Experimental distribution of gas-liquid torch dimensions in a fluidized bed	749
B. I. LEONCHIK: Method of complex analysis of the processes of spray drying	754

JOURNAL OF ENGINEERING PHYSICS*(Published in the U.S.S.R. in Russian with English abstracts)**Volume XVI, No. 5**May, 1969*

	<i>Page</i>
Y. A. GOSTINTZEV, V. M. ZAITZEV and P. F. POKHIL: Onset of turbulence in a boundary layer at a thermally destructing surface	773
A. V. LUIKOV and B. M. BERKOVSKII: Thermoconvective waves in viscoelastic fluids	780
V. B. TZUKANOV: Experimental study of circular Couette flow in a complanar magnetic field	786
A. M. MAKAROV, L. K. MARTINSON and K. B. PAVLOV: Stability of a plane flow of non-Newtonian fluid with power rheological law	793
V. M. KAZANSKII, P. P. LUTZIK and M. F. KAZANSKII: Energetic bonds of film-meniscus moisture in macropores of a disperse body	798
M. V. ALEKSANDROV: The problem of bubble boiling onset in a forced fluid flow	804
A. M. GRISHIN: Ignition of reacting gas by a heated surface	811
A. E. ERINOV and A. G. GOLUBCHIN: Analytic and experimental study of radiation heat transfer in muffle space of multi-channel furnaces	817
V. A. SHVAB: Compressible dust-gas flow in tubes under some thermal and structural conditions	826
M. M. NAZARCHUK and V. N. PANCHENKO: Surface friction for an adiabatic compressible gas flow in tubes	835
R. S. MIKHAL'CHENKO, V. F. GET'MANETZ and V. T. ARKHIPOV: Temperature field of a plate immersed into solidified gas	842
G. G. SCHASTIVYI, A. I. TITKO and V. N. NIKOLAEV: One temperature field problem	849
A. M. FAIN: Variational method for calculating temperature fields in construction elements	854
N. Y. TAITZ, Y. F. GORSHKOV and S. V. RYABUSHKO: Solution of unsteady heat conduction problems for a hollow cylinder on a discrete electronic model	858
K. M. SHLYAKHTINA: Conjugate heat transfer problem in a thick-wall channel	866
B. L. KRIVOSHEIN, A. A. KOSHELEV, K. Y. ROGOZHINA and L. E. SIDLER: The study of thermal interaction between a gas well and everfrozen rocks	872
G. E. VISHNEVSKII and V. M. YUDIN: Determination of the kinetic parameters of thermal decomposition process by the method of inverse problem solution	878
A. N. TEMCHIN: One method of studying the state of a rarefied gas	885
R. O. NAIDENOV, V. S. KOREN'KOV and B. I. FEDOROV: Measurement of moisture in a vapour-gas medium by a capacitive probe	892
I. E. IDEL'CHIK: On hydraulic resistance of cyclones	899
P. Y. NEDVIGA and S. I. KULIKOVSKII: Resistance to a gas flow in a rotary diffuser	902
I. I. GALYUN and Y. A. IVANOV: Turbulence intensity in a core of a submerged jet and behind grids	905
K. M. AREFIEV: Thermodiffusion effect on the condensation of small vapour additions out of a gas flow	909
V. TOMCHAK: Temperature waves in a cylinder	914
I. A. KUZNETZOVA, A. M. ANDREEV, Y. A. SOKOVISHIN and V. F. STEPANOV: Temperature distribution in a rod with regard for the variable physical parameters and radiation
