

## CONTENTS LISTS

### JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R in Russian with English abstracts)

Volume XXII, No. 1

January, 1972

	<i>Page</i>
YU. A. KIRICHENKO: Some problems of vapour bubbles dynamics under the conditions of weak mass force fields	5
L. I. ROIZEN and G. R. RUBIN: Heat transfer at liquid boiling on finned surfaces	13
E. N. BUKHARKIN: Heat transfer at cooling moist unsaturated vapour–gas mixtures	19
M. E. PODOLSKY: One space heat transfer problem for a forced convective flow	25
S. YU. BAPAT, I. A. BELOV and P. S. JANE: Calculation of nonstationary interaction of jet flows and a flat wall	31
L. YU. ARTYUKH, T. K. KRASILNIKOVA, T. K. MIRONENKO and A. T. TROFIMENKO: Experimental study of average and fluctuational characteristics of a jet moving along a porous cylinder	39
M. S. ZOLOTOGOROV: The study of film cooling efficiency in application to the real conditions of some engines	46
I. A. BELOV and B. N. PAMADI: Interaction of a jet and a flat normal obstacle	50
I. L. POVKH and A. B. STUPIN: Experimental study of a turbulent flow of aqueous polymer solutions in a tube	59
F. E. SPOKOINY and Z. R. GORBIS: Schlieren-diffusional method of determining turbulence characteristics of a carrying agent in rarefied gas-dispersed flows	66
A. M. MAKAROV, L. A. ZHDANOVA and O. N. POLOZOVA: Unsteady viscoplastic fluid flow in a flat channel	73
A. V. LUIKOV, B. M. BERKOVSKY and VU ZUI KUANG: Convection excited by high-frequency electric current	80
P. A. NOVIKOV and G. L. MALENKO: Heat and mass transfer between horizontal plates at sublimation in rarefied gas	87
B. M. KOVALEV, P. P. KULIK and V. A. RYABY: The similarity of Coulomb components of nonideal (dense) plasma properties	92
L. G. GALPERIN and A. P. BASKAKOV: Calculation of recovery steel carburization	103
V. K. DURNOV and V. N. TIMOFEEV: The effect of cooling wall roughness on head losses and relative distribution of air superficial velocities in fixed and moving granular layers	107
A. N. ALABOVSKY: The study of thermal interaction at the gas–liquid interface in the apparatus with an immersable burner	117
G. S. KIT and I. P. LYSYI: A steady-state temperature field in a band and layer at combined boundary conditions	123
V. I. KRYLOVICH and V. I. DERBAN: Some effects connected with finite rate of heat propagation	129
L. N. RYZHKOV and Z. A. LUCHSHEVA: The choice of radiator spector for installation of infrared heating and drying	136
G. S. BELKIN, V. YA. KISELEV and I. D. FINOGENOVA: Metal destruction under the action of concentrated heat fluxes	142
T. A. SAMARINA and A. E. KRASNOSHTEIN: Step-by-step ventilation of a group of chambers at instantaneous generation of admixture in the dead end	147

#### *Abstracts of Deposited Papers*

A. L. BYCHKOVSKY and A. L. LUBNY-GERTSYK: Temperature field in pinned vapour-generator screens	152
E. A. IODKO and E. N. TRYNKINA: On alloy crystallization	154
S. O. LEKHTMAKHER, N. M. POLEV, L. S. RUZER and S. A. STOYANOVA: Diffusional precipitation of particles at tube starting length	155
V. S. VOLKENSHTEIN: The methods of two time-temperature intervals	155
B. A. ARKADIEV, S. A. DIZENKO and V. S. NEMIROV: Calculation of unsteady-state vapour (gas) flows in the system of tanks	156
V. N. GREBENSHCHIKOV: Axi-symmetrical steady-state heat conduction problem with combined temperature conditions	157
N. I. KRAVCHENKO, V. M. VOLKOV, V. D. KUKUSH and L. A. DIDYK: Thermal effect of H <sub>10</sub> wave on absorbing wall of rectangular waveguide	158
E. A. IODKO and D. M. MAKSIMENKO: Infinite plate solidification in a mould	158
V. L. CHUMAKOV: Linearization of unsteady nonlinear heat transfer problem on the basis of the disturbance method	159
N. A. KOZDOBA and V. L. CHUMAKOV: The method of small parameter in application to the solution of heat conduction problem with temperature dependent heat sources	161
E. S. GESKIN: Liquid mixing by gas bubbles	162
D. V. MALTSEV: Optimum control of hollow gas bubbles	162

YU. F. BLINOV and D. A. SECHENOV: Admixture atom distribution in a semiconductor volume with diffusion into a slit in camouflage film	163
YU. F. BLINOV and D. A. SECHENOV: Admixture atom distribution at local diffusion from a constant source to a narrow slit	164
G. K. KOTYRLO and G. M. SHCHEGOLEV: Analysis of the temperature profile effect in permeable thermoelectric cooling battery on its power characteristics	164
A. S. UMANSKY and YU. A. GORSHKOV: Effect of radiation and temperature drop on thin wire cooling in a gas bed	165
V. S. SEVERYANIN and S. G. USHAKOV: The rate of solid particle blowing out in a fluctuating gas flow	166
YU. G. ERSHOV and V. I. KHRENOV: To the role of adsorbed gas in boiling	167
K. S. ADZERI KHO and V. P. NEKRASOV: Calculation of illumination characteristics of light-dissipating media—I	168
K. S. ADZERI KHO and V. P. NEKRASOV: Calculation of illumination characteristics of light-dissipating media—II	169
R. V. TEDEEV: Stressed state of a body in the form of a wedge with the force concentrated inside	170
A. A. MEN and O. A. SERGEEV: On the criterion of radiation component effect on heat transfer in semi-transparent media	171
YU. A. POPOV: Radiation heat transfer in a bed with large particle concentration	172
D. T. KARPUKHOVICH and K. F. IVANOV: Calculation of particles path in curvilinear channels	173

*Book Review*

V. I. KRYLOVICH and A. D. SOLODUKHIN: Review of the book " <i>Ultrasonic Phasometry</i> " by N. I. BRAZHNIKOV. Izd. Energiya, M.-L. (1968).	
---	--

*Reader's Guide*

Heat and Mass Transfer Bibliography	177
-------------------------------------	-----

## JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXII, No. 2

February, 1972

	<i>Page</i>
M. S. ZOLOTOGOROV: Study of heat transfer at film cooling	201
Z. I. GELLER, V. Z. GELLER and V. P. EIZENBEIS: Experimental study of thermal conductivity of brominated freons F-113 B2 and F-114 B2	209
A. V. LUIKOV, Z. P. SHULMAN, B. I. PURIS, G. Z. PLAVNIK, I. V. PROKHOROV and B. I. SMIRNOV: Experimental study of centripetal air pumping at reduced pressure	215
E. K. IORDANISHVILI, B. E. S. MALKOVICH and M. N. VEITS: Experimental study of unsteady thermoelectric cooling—II Extremum current regime	220
E. N. BEZRUKOVA and A. A. MEN: Radiation-conduction heat transfer under second-kind regular regime	227
N. F. FILIPPOVSKY and A. P. BASKAKOV: The study of temperature field in a fluidized bed near a heated plate and heat transfer between them	234
E. K. KALININ, G. A. DREITSER and A. K. KOZLOV: The study of heat transfer intensification in tube bundles with different pitches in a longitudinal flow	242
V. K. MIGAI: Heat transfer in tubes with annular discrete roughness	248
M. I. RABINOVICH, V. A. KALENDARIAN, YU. G. KLIMENKO and YU. B. TARTAKOVSKY: Heat transfer of a spherical probe and counter-blow gravity bed	254
V. M. KAZANSKY, R. V. LUTSYK and A. F. MELNIKOVA: Drying thermograms for dispersed bodies wetted with various liquids. Communication I. Drying thermograms of friable gels	259
V. M. VERKHUNOV and N. N. MAKSIMOV: Interferential methods of study optical inhomogeneities on the bases of IAB-451 device	267
L. S. SLOBODKIN and V. E. LOPATENTO: The study of thermal radiation characteristics of pressurizing polymer systems by the method of mirror semi-sphere	257
O. N. BUSHMARIN and B. YA. BASIN: Parametric method of laminar unsteady boundary layer calculation	282
A. L. STASENKO: Prandtl-Meyer flow anisotropy	293
L. K. TSABEK: Invariant solutions to equations of equilibrium sorption dynamics and kinetics	298
V. E. PROKOFIEV: Solution to reverse unsteady heat conduction problems on electric models	310
I. I. NOVIKOV: Characteristic turbulent constants	317
YU. I. MIRONOV and S. V. SHPANSKY: Distribution of heat fluxes on internal surface of a heated tube with outer turn	325
I. A. STRAKHOV: Heat transfer problems for a semi-infinite body heated by thin parallel plates	331
G. I. BOBKOVA and M. A. BUKHTILOVA: Determination of transfer coefficients	339
E. E. BIBIK and A. A. SIMONOV: The study of ferromagnetic particle interaction in a constant rotating magnetic field	343
YU. YA. MAKSIMOV and S. A. ABRUKOV: Effect of an electric field on diffusion oscillations	346
<i>Survey</i>	
L. A. DORFMAN: Heat and mass transfer near rotating surfaces	350
<i>Abstracts of Deposited Papers</i>	
V. M. DEMENTIEV, L. S. BOLIKHOVA, A. N. VANZHA, N. T. MOISEENKO and I. A. LUGOVSKY: The study of particles adhesion in a fluidized bed on a cold model	363
A. G. GORELIK: Interphase heat transfer in a fluidized bed with heat generation	363
T. K. GLADKOVSKY, V. P. DMITRIEV and B. A. KALINKIN: The effect of concrete sample temperature on its strength	364
G. V. SHCHERBEDINSKY and L. A. KONDRACHENKO: Solution of diffusion equations for $n$ -component system	365
G. M. KRASTOSHEVSKY: The use of heat balance integral for solving some problems of ground freezing	367
B. F. TRAKHTENBERG, M. S. KENIS and M. YA. NATANZON: Temperature field of an instrument with heat fluxes of compound structure and unstable cycle	368
YA. N. KANYA: Accuracy of substituting a cylindrical heat source by a point one when measuring temperature field in a semiinfinite body	369
V. S. EGOROV and A. G. LANIN: Determination of cylindrical sample thermal strength by the method of axial heat flux	370
A. G. SABELNIKOV, N. YU. TAITs and V. V. MOSHURA: Thermoelastic stresses when heating simple bodies	371
V. I. MARTYNYENKO and V. A. ORLOV: Temperature calculation of medium in a closed volume with a periodic changing of external medium	371

V. A. DUBOVIK and V. P. KHARITONOV: Analytical solution to the problem on unsteady interaction of free and forced convection in a rectangular tube	372
E. S. LOBOVA and S. A. MALYI: Identification of thermochemical interaction processes	373
V. G. PETROV-DENISOV and G. A. ZHILKOV: The study of three-dimensional temperature field of a finned panel using small grid model	374
P. A. VORONIN: Electric line as analog of unsteady thermal conductivity of flat, cylindrical and spherical bodies	374
YU. E. KROT and V. I. GRUSHKO: The effect of thermodynamic properties of cryogenic liquids on their destructive action at cavitation	375

## JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXII, No. 3

March, 1972

	<i>Page</i>
R. R. KHASANOV, S. S. ZABRODSKY, A. I. TAMARIN and D. M. GALERSHTEIN: Heat transfer between a surface and fluidized bed with packing	397
E. M. TOLMACHEV and N. I. SYROMYATNIKOV: Heat transfer between a liquid flow and polydisperse material in a fluidized bed	403
A. S. SUKHOMEL, F. F. TSVETKOV and R. V. KERIMOV: Some peculiarities of heat transfer for a gas-suspension flow in a horizontal tube	408
E. V. GRUBSKY: Heat transfer of vertically finned slabs under free convection	413
I. F. PIKUS, L. S. GIMPELEVA and L. A. KOSHEPAVO: Basic laws of vacuum drying of current-insulating cellulose materials	420
A. A. SARKISOV, I. A. POPOV and A. A. LUKIYANOV: Mechanism of vapour bubble condensation in vapour-water mixture with interaction of shocks	429
D. M. POPOV: Some problems of phase transition thermodynamics	435
Z. P. SHULMAN, N. A. POKRYVAILO, V. I. KORDONSKY, V. D. LYASHKEVICH and A. K. NESTEROV: Unsteady convective mass transfer of a disc revolving in non-Newtonian fluid	441
P. A. NOVIKOV and L. A. SHCHERBAKOV: The study of heat transfer and hydraulic resistance for an air flow in narrow rectangular channels	450
V. S. VOLKENSHTEIN: Determination of thin-layer material thermal conductivity by the interpolation method	456
B. P. MIRONOV and P. P. LUGOVSKI: The study of a flow in a wall region of the boundary layer with injection	460
A. S. KOMPANEETS: Motion of continuum with inner correlation of revolutions	467
V. K. LYAKHOV: Similarity numbers for a turbulent shear fluid flow	474
V. N. STROKIN: Analysis of self-ignition of a turbulent gas jet in an oxide flow	480
U. P. KUVANYSHV and R. L. NASIBULLIN: The study of a moving burning front in the oil bed model	488
V. I. KHOLOSTYKH, I. G. BLYAKHER and A. A. SHEKHTMAN: Liquid film flow along a vertical surface	494
N. M. DRACHEV, V. I. MOROZKIN and I. N. POTAPOV: The study of the fine high-speed particles penetration into various materials	499
E. U. REPIK: Velocity measurements in a boundary layer with a total-pressure tube	505
A. L. STASENKO: Solid-gas suspension outflow into vacuum	511
A. D. LEBEDEV, A. S. SERGIENKO, B. A. URYUKOV and A. G. SHASHKOV: Dynamic characteristics of d.c. electric arc	514
V. A. ZRAZHEVSKY and V. S. GVOZDETSKY: One application of a problem on heat transfer in a disperse layer	520
I. V. MEN and O. A. SERGEEV: Calculation of translucent material emissivity	526
O. V. DOMANSKY, V. V. KONSETOV, L. V. LILYA and R. I. RUBASHKINA: Experimental study of heat transfer for a laminar non-Newtonian fluid flow in tubers	531
L. A. BRICHKIN, YU. V. DARINSKY and L. M. PUSTYLNIKOV: Temperature field in a hollow finite cylinder from a source moving by an arbitrary law	537
A. S. DOLGOV: Application of the 'straight lines method' to solution of a one-dimensional heat conduction equation with localized inhomogeneities	544
N. A. FRIDLENDER: Solution of nonlinear heat and mass transfer problems on electronic computers	548
I. F. ZHEREBYATIEV and A. T. LUKIYANOV: Simulation of multidimensional heat conduction problems with phase transitions	553
<i>Prominent Soviet Scientists</i>	
E. I. KIM (to his 60th Birthday and 35th Anniversary of the Scientific and Pedagogical Activity)	560
<i>Reader's Guide</i>	
Heat and Mass Transfer Bibliography	562

## JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXII, No. 4

April, 1972

	Page
O. M. TODES and L. S. SHEININA: Fluctuational method of determining the coefficient of mixing of solid phase in a two-dimensional fluidized bed model	589
A. S. SUKOMEL, F. F. TSVETKOV and R. V. KERIMOV: Experimental study of resistance when air-graphite suspension is moving in tubes	597
V. K. ABRAMYAN and R. Kh. BEKYASHEV: Measurement of electrostatic potential in 'fluidized-bed' apparatuses with a bed-immersed probe	603
E. K. KALININ, I. I. BERLIN, V. V. KOSTYUK, Yu. S. KOCHELAEV and S. A. YARKHO: The study of heat transfer at film boiling of sub-cooled fluid under forced flow conditions in channels	610
V. P. SKRIPOV and N. V. BULANOV: Convective heat transfer of metastable fluid at boiling delay	614
N. P. NOVIKOV and A. A. KHOLODILOV: Destruction of thermoplastics under simultaneous action of gas and powerful heat fluxes	618
A. E. AFANASIEV, N. I. GAMAYUNOV, N. V. CHURAEV and N. E. YASHCHENKO: Effect of entrapped air and anomalous condensate on water evaporation from capillaries	627
P. P. LUTSIK, E. A. STRASHKEVICH and M. F. KAZANSKY: Determination of the heat and moisture diffusivity of porous body by drying kinetics curves	635
A. P. IVANOV, S. M. REPRINTSEVA, N. V. FEDOROVICH and V. L. DRAGUN: True absorption power of some chemical pharmaceuticals	640
L. N. LINNIK, V. S. BATALOV and K. I. LOBACHEV: Correctness of the boundary conditions from the method of measuring heat transfer coefficient by the rate of thermal deformation of samples	645
V. F. GETMANETS, R. S. MIKHALCHENKO and V. T. ARKHIPOV: The study of cryogenic fluid solidification at evacuation	648
V. S. KRYLOVSKY, V. I. OVCHARENKO and V. I. KHOTKEVICH: Heat capacity of fluoroplastic-40 and glue BF-2 at 10-300°K	656
A. I. LYUBARSKY, Yu. S. SKOROPANOV and V. P. POPOV: Heat transfer and resistance for a laminar gas flow with variable properties in an annular channel	658
V. V. KONSETOV and F. M. KUDRYAVITSKY: Hydrodynamics and heat transfer for gas bubbling through viscous and anomalous-viscous fluids	667
E. A. ROMASHKO: Partial problem of eigenvalues in hydrodynamic stability problem at free convection	675
Z. P. SHULMAN, N. A. POKRYVAILO and N. V. ZHDANOVICH: Effect of vortex wake on friction fluctuations in the wall region of the front critical point of a cylinder in a transverse flow	683
E. E. BIBIK and V. E. SKOBOCHKIN: Friction moment in the field of revolution and magnetorheological effect in colloidal ferromagnetics	687
A. AKAEV and G. N. DULNEV: Solution of boundary-value heat conduction problems by the method of successive averaging the unknown function	693
A. I. UZDALEV and L. M. SEREBRYAKOVA: Heat conduction problem for a double-bond plate in the presence of heat transfer to medium	701
G. F. IVANOVA: Calculation of thermal and electric fields of large diameter ingots under variable conditions of electric slag melting	706
Ya. A. LEVIN and L. V. POVOLOTSKY: Temperature field of a working blade of gas turbine being externally cooled with water-liquid mixture	711
G. N. SURKOV: Determination of temperature dependence of thermophysical properties of solids by the method of successive approximations	718
<i>Shorter Communications</i>	
F. N. YASINSKY: The Monte Carlo method in application to the problem of a plane turbulent jet flow in the boundary layer	725
B. A. ARUTYUNOV: Generalized relationship for thermal conductivity of amorphous polymers	729
M. M. NAZARCHUK and S. S. STELMAKH: Some peculiarities of the critical point	732
I. A. OVSYANNIKOVA, E. M. MOROZ and A. I. PLATKOV: Effect of shock compression on the structure of mercury oxide	735
<i>Abstracts of Deposited Papers</i>	
R. A. BURTSEVA and A. T. LITVINOV: Calculation of optimum dimensions and operational conditions of spraying apparatuses	739
G. M. BARTENEV and A. I. ZHORNIK: Temperature stresses in a hollow finite cylinder	740
V. A. ZHURAVLEV: Melt solidification in an annular-shaped water-cooled gap	741

V. M. SHEVELEV: Calculation of heat transfer in an irregular-operation furnace	742
I. M. ABDURAKHMANOV: Effect of a thin foreign inclusion on a flat stationary field	743
B. A. VASILIEV: Steady-state temperature distribution on wedge surface under mixed boundary conditions	744
R. G. ISAEV: Use of extremum principles of irreversible thermodynamics for grounding basic laws of filtration	744
V. D. FIKHMAN, V. M. ALEKSEEVA and G. V. VINOGRADOV: Uni-axial extension of polyvinyl chloride in highly elastic state	745
M. G. STRUNSKY: One heat conduction problem with mixed boundary conditions and point heat source	746
O. T. ILCHENKO and L. I. SHIFAN: Determination of heat transfer coefficient in unsteady-state heat-conduction problems by measured surface temperature	748
I. M. SHNAID: Heat conduction rod in the medium with irregular changing temperature	749
R. S. KUZNETSKY: Distribution of temperature and electric field in a flat layer with temperature-dependent resistance	751
G. A. AKSELRUD and A. I. DUBYNIN: Mass transfer including chemical interaction of solid and liquid with gaseous phase generation	752
R. S. KUZNETSKY: Distribution of pressure and velocity of liquid in a punched tube with laminar outflow	754
V. V. FROLOV: Temperature field in multi-layer translucent coatings under radiation pulse heating	755

*Chronicle*

YU. P. CHIRKUN and I. N. KONOPELKO: Modern state of art in experimental and theoretical investigations of combined heat transfer	757
--	-----

*Book Review*

P. K. KONAĀKOV and V. T. KUMSKOV: Review of the book <i>Heat and Mass Transfer and Friction Gradient Liquid Flow</i> by P. N. Romanenko, izd. Energia (1971).	
---	--

V. D. FIKHMAN, V. M. ALEKSEEVA and G. V. VINOGRADOV: Generalization of thermal and strain properties of polyvinyl chloride under stress	1031
I. L. POVKH and D. F. SHTOPKO: The influence of protection coating on frequency responses of film transformers in thermoanemometers	1036
E. M. LYUBAVIN: Dynamic characteristics of thermoanemometers with glass-covered transformers	1042
V. YA. CHEKHOVSKOI, R. A. BELYAEV and YU. V. VAVILOV: Installation for measuring thermal conductivity and thermal diffusivity of solid materials	1049
M. I. ALIEV, R. E. GUSEINOV and D. G. ARASLY: Measurement of semiconductor thermal diffusivity by the method of a light pulse	1055
V. M. KAZANSKY, E. D. BREITMAN, T. I. ROZENBERG and M. F. KAZANSKY: The study of concrete solidification at temperatures below zero	1060
V. K. BENZAR and I. M. RIMKEVICH: A laboratory plant for measurement of the moisture content of capillary-porous materials by the method of super-high frequency absorption	1068
L. S. SLOBODKIN and N. A. PRUDNIKOV: Determination of irradiation coefficients by light modelling in dryers	1072
V. I. SOKURENKO, V. K. SHCHERBAKOV and YU. P. SHCHERBAKOV: Determination of local angular radiation coefficients in some two-body systems	1080
A. V. DONSKOI, V. S. KLUBNIKIN and A. S. PARKHOMENKO: Experimental study of electric and thermal properties of stabilized arcs	1089
V. L. VERESHCHAGIN: Estimation of mass content and energy spectrum of a plasma jet in a pulse conic accelerator	1096
S. N. KAPELYAN and Z. M. YUDOVIN: Temperature field of metals after action of pulse heat fluxes	1100

### *Shorter Communications*

E. YA. LITOVSKY: Well-defined results of investigation of ceramic thermal conductivity and thermal diffusivity	1105
K. A. KHAIRUTDINOV: Variability of index in real gas processes	1107
G. E. GORELIK and S. G. ROZIN: Calculation of heat source shape by the Monte Carlo method while electron beams affect substance	1110

### *Letter to the Editor*

V. L. LELCHUK: One solution to the problems on the effect of a variable heat flux along a heating surface on heat transfer of a turbulent flow	1114
--	------

### *Abstracts of Deposited Papers*

E. I. MIKULIN and YU. A. SHEVICH: Experimental study of heat transfer in latticed matrices	1116
--	------

CONTENTS LISTS

239

A. G. MERZHANOV, YU. M. GRIGORIEV, YU. A. GALCHENKO and V. V. BARELKO: Thermophysical method of measuring temperature dependence of metal electric resistance	1117
B. A. SOLOVIEV: Determination of the time of heat transfer agent melting within a section of a conduit with face heating	1118
B. YA. LYUBOV and N. I. YALOVOI: Internal heat transfer in a plate at nonlinear boundary conditions	1120
B. YA. LYUBOV, N. I. YALOVOI and I. N. MANUSOV: Heat conduction at arbitrary periodic variation of heat transfer coefficient and ambient temperature	1121

CONTENTS LISTS

237

V. V. USHAKOV, A. S. LAGUNOV and V. I. GUSEV: Measurement of dispersion and velocity of droplets in the Venturi pipe nozzle by the method of light dissipation	932
B. N. STADNIK, M. F. KAZANSKIY and L. N. BELYI: The effect of porous structure on ultrasound propagation in capillary-porous models	933
I. D. KONOPLEV, R. V. MERKT and S. B. TISHECHKIN: Choice of time interval when solving boundary-value problems by the Libmann method	934
V. S. PETROVSKY and E. E. DENISOV: The efficient numerical integration method of the two-dimensional unsteady heat conduction problem for the gas turbine disk of variable profile	935
K. I. BOGATYRENKO, O. T. ILCHENKO, V. E. PROKOFIEV and O. N. SUETIN: To solution of some thermophysical problems on analog computing systems	937
I. K. NAVAL and P. E. SABODASH: Cylindrical and spherical elastic waves at small time values with regard for the finite velocity of heat propagation	937
O. N. KHARIN and V. S. BLINOV: One theorem of Hankel integral transformation and its applications	938

*Book Review*

N. B. VARGAFK and L. D. VOLYAK: Review of the book <i>Thermophysical Properties of Alkali Metals</i> by E. E. SHPILRAIN, K. A. YAKIMOVICH, E. E. TOTSKY, D. L. TIMROT and V. A. FOMIN	941
---	-----

*Reader's Guide*

Heat and Mass Transfer Bibliography	943
-------------------------------------	-----
