

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXIII, No. 1

July, 1972

	<i>Page</i>
A. I. BASKAKOV, B. V. BERG, E. YA. GIMPELMAN, V. V. KHOROSHAVTSEV and V. P. EVSEEV: Low-temperature generation in a fluidized bed using natural gas	5
V. K. SHCHUKIN, A. F. KOVALNOGOV and V. I. GOLDOBEEV: Experimental investigation of the effect of local flow swirl on the thermal efficiency of tube surface	10
E. K. KALININ, G. A. DREITSER and V. A. KUZMINOV: Heat transfer intensification in annular channels	15
G. I. FUKS, A. V. FURMAN and A. P. TSYGANOK: Laws of regular thermal regime in solids under unsteady radiative interaction	20
A. G. ZENKOVSKY and A. I. ZYULKOV: Calculation of universal radiative transfer functions	26
D. P. LEBEDEV and E. F. ANDREEV: Optimum conditions of ice desublimation in vacuum and dependence of ρ and λ for ice on these conditions	33
P. A. NOVIKOV and E. K. SNEZHKO: Experimental investigation of water vapour condensation kinetics on a cylindrical surface in rarefied gas	42
E. I. NESIS: On the mechanism of boiling sites action	51
S. V. RUBINSHTEIN, V. A. IVANOV and A. K. KARALYUK: Phase transformations in an evaporating liquid flow	59
YU. A. BERMAN: Statement of some class of problems on mass transfer in a granular bed including phase and chemical transformations	63
V. T. MUSTYATSA and E. V. VERLAN: Calculation of temperature and moisture fields with internal pulse heat source	71
B. I. SAVCHENKO and I. N. TAGANOV: The mechanism of fluctuation occurrence in the solid phase of a fluidized bed	76
R. YA. ZAKHARKIN and A. V. PUSTOGAROV: Hydrogen plasma generator of 1 MW power	82
P. B. BEGOULEV and YU. I. SHMAKOV: Rheological state equations for weak polymer solutions with rigid ellipsoidal macromolecules in the presence of an electric field	88
V. M. EROSHENKO, A. L. ERMAKOV, A. A. KLIMOV, V. P. MOTULEVICH and YU. N. TERENTIEV: Critical parameters of turbulent boundary layer displacement	94
L. I. SKURIN: Calculation of a plane wake behind a body	104
A. D. REKIN: Velocity distribution in a boundary layer for a supersonic gas flow	112
ENRICO LORENZINI: Heat conduction with temperature-dependent thermal conductivity. II. About variational formalism validity	121
G. S. KIT and O. V. POBEREZHNY: Steady-state temperature field estimation in a cracked plate with heat transfer from sides	126

Shorter Communications

A. YA. LISTOPAD and M. A. GRISHIN: Heat-transfer coefficients of citric fruits	132
G. N. DULNEV and N. V. PILIPENKO: Method of determining the dehydration heat of cement	136
V. G. SURIN, B. M. MOGILEVSKY and A. F. CHUDNOVSKY: Admixture effect on cyclohexane thermal conductivity	139
E. V. BEZDETKINA: Methods of modelling ventilation systems	141
YU. D. YASIN and O. V. DEGTYAREV: Comparative estimation of the methods of determination of cryogenic moisture transformations in building materials	143

Survey

D. P. LITEVCHUK, M. F. KAZANSKY and P. P. LUTSIK: Different methods of definition of macropore structure of capillary porous bodies	145
---	-----

Letter to the Editor

I. M. MINKOV: On the paper "Temperature distribution in a torroidal electrically heated coil" by V. V. IVANOV and on correct solution of the problem stated	151
---	-----

Abstracts of Deposited Papers

M. E. PODOLSKY: Calculation of heat transfer in a turbulent boundary layer of viscous liquid at large Pr numbers	154
V. N. KOCHERGIN, V. N. VOITALYUK, O. A. BALYSHEV and V. D. PAMPURA: Energy and substance transfer with regard for pressure and effects of chemical conversions in natural hydrothermal systems	155
M. KH. KISHINEVSKY and A. A. MOSYAK: Mass transfer in a transverse flow around a circular cylinder	156
E. I. MIKULIN and YU. A. SHEVICH: Experimental investigation of heat transfer in lattice matrices	157
I. YA. KOLESNIK: Estimation of effects due to unsteady evaporation and condensation processes	157
V. G. ANDREEV and P. I. ULYAKOV: Three-dimensional thermal shock of finite duration in a transparent plate	158
KH. I. AMIRKHANOV, B. G. ALIBEKOV and G. V. STEPANOV: On the value of isochoric heat capacity at a critical point	159
B. M. ABRAMSON: The effective diameter and minimum Nusselt number for an ellipsoid at $Re = 0$	159
V. I. YANKOV, L. M. BEDER, S. A. BOSTANDZHIYAN, V. I. BOYARCHENKO and V. V. KISELEV: Dimensionless pressure-flow rate characteristics of non-Newtonian flows in the channel of a screw pump under conditions of combined displacement	160
V. I. YANKOV, L. M. BEDER, S. A. BOSTANDZHIYAN and V. I. BOYARCHENKO: Adiabatic flow of non-Newtonian fluid in the channel of a screw pump under conditions of combined displacement	161
YU. V. RZHEZNIKOV and E. V. LIFSHITS: Account for the second flow dimension in a dust flow meter	161
YA. P. BOIKOVA and N. P. GLAZKOV: Estimation of the accuracy of measuring suspended deposits by gamma-raying	163
R. I. BLYAKHMAN: Temperature distribution in a cylinder for the case of a moving heat source	163
L. A. SAVINTEVA, E. D. STRELOVA and N. N. TARNOVSKY: Quadripole theory in application to analysis of temperature fields in compound objects	163
A. V. RASHKIN, N. G. SHUVALOV and YU. M. VEDYAEV: Measurement of bulk ice content in rocks	164
D. P. KOLODNY: Symmetry of main values and relations in thermodynamics	165

Chronicle

P. D. LEBEDEV: Doctor dissertations on thermal engineering, 1971	167
--	-----

Book Review

I. MASLENNIKOV: Review of the book <i>Dynamics of Control Processes and Systems</i> by WEN JEI YANG and MASAMI MASABUCHI, Gordon and Breach, N.Y., 1970	175
---	-----

Reader's Guide

Heat and Mass Transfer Bibliography	178
-------------------------------------	-----

JOURNAL OF ENGINEERING PHYSICS*(Published in the U.S.S.R. in Russian with English abstracts)*

Volume XXIII, No. 2

August, 1972

	<i>Page</i>
V. A. GOLUBEV, V. V. KURILIN, I. S. MAKAROV, K. A. MALINOVSKY and A. M. SHCHEGLOV: Outflow of liquid jets with thermodynamic parameters close to critical	201
I. F. MIKHAILOV, N. A. KOSIK and G. P. GLAZUNOV: Heat transfer at high temperature heads in case of cooling with a dispersed liquid nitrogen flow	207
B. I. BROUNSHTEIN, V. B. BROUNSHTEIN, V. YA. RIVKIND and I. N. SVENTITSKAYA: Saturated vapour condensation on a spherical drop in a near-critical region	212
YU. M. KULAGIN and A. A. TOCHIGIN: Experimental investigation of vapour-water flow hydrodynamics in horizontal tubes	217
E. V. STEKOLSHCHIKOV, M. P. ANSIMOVA, I. A. YATCHENI and O. I. KONDRATIEV: Experimental investigation of motion and breaking of liquid drops in a gas flow	226
G. T. SERGEEV: Distribution of transfer parameters including reaction of the surface material of a body and injected substance with a laminar boundary layer	234
V. B. REZNIKOV: High-concentration power-air mixture outflow from a vessel under pressure	243
E. I. IVLEV: Frequency properties of temperature integrator	250

N. P. NOVIKOV, V. P. PERMINOV and A. A. KHOLODILOV: Stationary one-dimensional destruction of thermoplastics affected by high-power radiation fluxes	257
S. G. ILIASOV and V. V. KRASNNIKOV: Radiation energy transfer in absorbing and emitting materials irradiated by a flow under some angle	267
I. F. PIKUS and V. D. KONONENKO: Thermophysical properties of multilayer condenser dielectric	278
D. P. LEBEDEV, I. A. GINZBURG and V. V. ALEKSEEV: Estimation of the heat capacity of tea extraction under freeze-drying	284
V. K. SAFONOV and A. Z. VOLYNETS: Pure water vapour desublimation on a flat surface	288
D. P. LITEVCHUK and M. F. KAZANSKY: Estimation of size-distribution function of macropores in capillary-porous bodies	294
V. P. GANIN: Pore pressure effect on structure formation of capillary-porous bodies under heating	298
G. A. AKSELRUD, E. M. SEMENISHIN and R. P. DATSKO: Mass transfer of sulphur extraction from sulphuric ores	304
YU. A. BERMAN and R. F. NAGAEV: Solution of mass transfer equations for a fixed granular bed	308
V. A. KIRPIKOV and I. I. LEIFMAN: Calculation of temperature distribution in perforated fin	316
A. V. SUDAREV and V. A. MAEV: Length of separation region behind a bluff body in a finite flow	322
K. D. VACHAGIN, V. I. BOLSHAKOV and G. V. VINOGRADOV: Polymer melt flow in triangular channels	328
I. P. GRINCHIK and A. KH. KIM: Axial nonlinear viscous plastic flow in cylindrical tubes	336
P. B. BEGOULEV and YU. I. SHMAKOV: Rheological state equations for diluted polymer solution with rigid ellipsoidal macromolecules	340
V. N. RODIONOV, L. L. SAVVIN and V. M. KUZNETSOV: Joule heat effect on current distribution in a cylindrical conductor	345
I. A. IOFFE: One unsteady-state heat conduction problem for a semi-infinite body with internal cylindrical heat source	351
A. M. GRISHIN and N. A. IGNATENKO: Bilateral approximation method for solution of some nonlinear boundary-value problems	356

Shorter Communications

A. A. BARANOV and V. L. KOLPASHCHIKOV: The Predvoditelev hydrodynamics for high velocities	364
--	-----

Abstracts of Deposited Papers

V. V. ALTUNIN: Thermophysical properties of carbon dioxide at the liquid-vapour equilibrium lines	367
E. D. KURTSMAN and L. YA. SUVOROV: Integrated measurement of bubble properties in liquid	368
R. K. NIKULSHIN and E. F. PETRIMAN: Parameters of intermolecular Lennard-Jones (12-6), Stockmayer (12-6-3), 6-EXP and Kihor potentials for dichlorodifluoromethane	368
A. L. SURIS and S. N. SHORIN: Temperature and heat flux fields in a hot cathode of an electric-arc heater	369
V. I. VORONIN and V. V. FALIEV: Power-law filtration through porous semi-space created by a source	370

Obituary

YU. P. SHLYKOV (1918-1972)	373
----------------------------	-----

Book Review

A. V. LUIKOV and P. S. KUTS: On the textbook <i>Fundamental Theory of Convective Drying and Specified Method of Dryer Calculation</i> by V. I. MUSHTAEV, EDITED BY PROF. A. N. PLANOVSKY, Izd. MIKhM, 1971	375
--	-----

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XXIII, No. 3

September, 1972

Page

R. S. MIKHALCHENKO, V. F. GETMANETS and V. T. ARKHIPOV: Heat transfer peculiarities in porous solid nitrogen	393
A. V. LUIKOV, P. S. KUTS and A. I. OLSHANSKY: Heat transfer kinetics in drying moist materials	401

M. F. KAZANSKY, V. M. KAZANSKY, R. V. LUTSYK and A. F. MELNIKOVA: Drying thermograms for disperse bodies wetted with various liquids. Communication 2. Thermograms of drying clayish minerals	407
R. P. RILO, M. S. PANCHENKO, P. F. TURCHIN, A. L. PANASYUK and A. S. MOSIEVICH: Determination of hygroscopic properties and mass transfer coefficients when moisture is sorbed by water-soluble bodies	414
Z. R. GORBIS and V. V. KUKLINSKY: Heat transfer study between disperse material and solid heat transfer agent	419
D. P. LEBEDEV and V. V. SAMSONOV: External heat transfer in vacuum in sublimation processes	424
V. K. SHCHUKIN, A. F. KOVALNOGOV and V. S. KOLKUNOV: Study of local heat transfer coefficients in tube with local swirl of flow with blade turbulizers	430
V. A. KULIKOV, V. I. DAVYDOV and L. L. MURAVIEV: Heat and mass transfer region of air-water jet in sodium nitrate melt	435
V. A. KIRPIKOV and I. I. LEIFMAN: Some peculiarities of hydrodynamics and heat transfer of stream along the system of parallel channels with overflows	441
S. S. BUDNEVICH and S. USKENBAEV: Heat transfer of liquified gases at supercritical state	446
B. G. SEMILETENKO and V. N. USKOV: Experimental relationships determining position of shock waves in a jet impinging onto an obstacle normal to its axis	453
YU. P. KONAKOV: Radiative-conductive heat transfer in optically dense media	459
I. M. SHTER: Interrelated thermal elasticity with finite rate of heat propagation	465
L. I. SELEZNEV, V. K. SHANIN and G. V. TSIKLARI: Investigation of spontaneous condensation in a wide initial pressure range	472
E. I. NESIS, I. I. MARKOV and T. S. CHIGAREVA: On the separation mechanism of bubbles growing from cylindrical pores in liquid boiling	479
V. P. YASHCHERITSYN: Viscometric nonlinear visco-plastic flow between two coaxial cylinders as applied to the study of magnetorheological effect	482
V. N. KIRILLOV, YU. B. DUBINKER, V. A. EFIMOV and A. A. DONSKOI: Thermal conductivity of silicone elastomer—powdery mineral filler system	486
A. M. MAMEDOV and T. S. AKHUNDOV: Relationship between equations for transfer coefficients and state equation for liquid	492
E. K. IORDANISHVILI and B. E.-SH. MALKOVICH: Experimental investigation of unsteady thermoelectric cooling	498
M. K. KLEINER: Approximate solution to the problem of heating massive bodies at variable water number of gases	505
G. I. PAVLOVSKY and V. V. SOLOVEI: Effect of thermal instability on convective heat transfer rate	514
V. A. ZHURAVLEV and V. R. FIDELMAN: Thermal stress in continuous flat ingot	519
S. YA. YAREMA, M. P. SAVRUK and YA. K. NECHAEV: Temperature distribution at heat-insulated slot in a plate under various boundary conditions	528
G. E. KLENOV: A steady temperature field of disk at convective heat transfer on its surface	533
V. V. ZLOBIN: The study of jet system mixing with a transverse flow in a channel	541
E. M. GOLDFARB and V. S. IBRYAEV: Variational problem of thin body heating	545
V. V. KRYUCHKOVSKY and P. I. KHRISTICHENKO: Conjugated heat conduction equation for an isotropic linear elasto-viscous body	550
G. A. DOMBROVSKY and R. B. NUDELMAN: Some exact solutions of steady heat conduction problems for nonuniform bodies	554

Prominent Soviet Scientists

GEORGY IVANOVICH PETROV (To his 60th Birthday)	557
BORIS SERGEEVICH PETUKHOV (To his 60th Birthday)	559

Book Review

YA. D. RUDAKOV, V. M. MELENTIEV and YU. M. AGEEV. On A. S. NEVSKY's book <i>Radiative Heat Transfer in Furnaces and Burners</i> , M., "Metallurgiya", 1971	561

V. S. MIKHAILOV, A. M. KRAPIVIN, P. I. BYSTROV and G. I. ANOFRIEV: On hydrodynamics of ducts with porous walls	589
--	-----

M. I. VERBA, V. YA. SASIN and A. YA. SHCHELGINSKY: Physical heat transfer conditions and heat pipe calculation under evaporation in the moderate temperature range	597
L. L. VASILIEV, Z. N. KOSTKO and S. V. KONEV: Study of capillary-porous wick characteristics for low-temperature heat pipes	606
YU. A. GAVRILOV and G. N. DULNEV: Approximate estimation of heat transfer coefficient in laminar and turbulent flows of liquid in plane ducts	612
YU. M. VOLFKOVICH, V. E. SOSENKIN and V. S. BAGOTSKY: Self-regulation of water outflow in hydrogen-oxygen fuel cell. II. Width of self-regulation regions	618
L. A. VADACHKORIYA: Screen effect on radiation heat transfer in the region of penetrating radiation	627
A. I. TAMARIN, D. M. GALERSHTEIN, S. S. ZABRODSKY, R. R. KHASANOV and V. P. BORISENKO: Some problems of heat transfer and hydrodynamics of a fluidized bed with a small packing	635
I. S. TUROVSKY and L. L. GOLDFARB: Study of material drying parameters in gas suspension counter-jets	641
I. D. LARIONOV and N. I. SYROMYATNIKOV: On the structure of wall disperse longitudinal flow over a plane plate	646
N. P. SELEZNEVA: Investigation results of air ejector operation with movable disperse materials	650
V. E. DAVIDSON and A. P. TOLSTOPYAT: On filtration outflow of loose material from bunkers	655
B. A. LISHANSKY, B. P. OSMACHKIN and N. V. MIKHAILOV: Radioisotope method for determination of effective viscosity of vibrated disperse systems	659
SH. M. BILIK and N. N. SLYUDIKOVA: Vibrational fluidization of powdery polymer beds for formation of coatings	664
T. B. BUZOVKINA and A. A. MEN: Use of molten quartz as a standard in comparative methods of thermal conductivity measurements	669
V. A. VASHKEVICH and O. I. YASKO: On heat transfer mechanism in electric arc moved by magnetic field	673
V. K. GLEB and S. A. DEMCHUK: Electric field effect on characteristics of polydisperse system outflow from a vertical parallel plane shot	681
V. I. BLINOV and L. P. DOBROVOLSKAYA: On temperature effect on droplet evaporation in an air flow	686
K. V. DEMENTIEVA, A. M. MAKAROV, V. R. ROMANOVSKY and M. R. ROMANOVSKY: Study of heat transfer at vapour condensation on free jets of cold liquid	692
V. V. MALYSHEV and E. P. ZLOBIN: Liquid hydrocarbon evaporation in heated closed vessels	701
YU. A. BUEVICH: On convective diffusion to particles of concentrated polydisperse cloud of solid spheres	709
L. V. NOVOSELSKAYA, A. I. ERSHOV, L. M. GUKHMAN and A. V. NOVOSELSKY: On a particular approximate physical model of heat transfer	713
V. YA. SHKADOV and VU ZUI QUANG: Boundary layer at a plate with arbitrary injection law	720
K. I. BOGATYRENKO, O. T. ILCHENKO and V. E. PROKOFIEV: Solution of the problem on unsteady heat transfer of a body and liquid flow around it	727
V. F. KRAVCHENKO and A. V. TOKARENKO: Solution of one combined boundary-value problem by the Bubnov-Galerkin method	732
P. A. NOVIKOV and L. A. SHCHERBAKOV: Heat and mass transfer in droplet condensation of steam from rarefied air flow in narrow rectangular ducts	737

Abstracts of Deposited Papers

G. L. SAKSAGANSKY: Semigraphical method for efficiency estimation of sorbed geometries with finite conductance	743
A. T. CHUB: On a particular convective mass transfer problem	743
N. N. MEDVEDEV and G. V. GRISHCHENKO: Determination of thermophysical properties by differential method	745
A. G. BEINUSOV, A. N. KHOZE and E. K. YADRIKHINSKY: Heat and mass transfer at air-transpiration cooling of a rotating cylinder in an annular channel	746
V. P. ALEKSEEV and A. V. DOROSHENKO: Estimation of thermal resistance for heat and mass transfer between water and air	747
A. N. ALABOVSKY: Estimation of criteria accounting for the mass transfer effect on heat transfer rate in apparatuses of submerged burning	748
E. I. TREBUKHIN: Solution of a heat transfer equation for an annuli in a rotating muffle furnace by the Kulikov method	748
YU. P. RASPUTIN: Heat transfer of movable bodies in contact at metal cutting	750
N. I. NIKITENKO: The mechanism of heat conduction and expansion of bodies under heating	751
M. YA. PEKARSKY, N. YU. TAITTS and Z. N. GOLOVINA: Unsteady thermal conductivity of bi-layer cylinder	752
E. P. TROFIMOV: Steady-state temperature field of a rectangular plate at combined boundary conditions at one of its sides	754
A. L. GOLDIN: An approximate solution to the problem of growing ground bed packing with regard for creep	756
V. S. VOLKENSHTEIN, N. N. MEDVEDEV, Z. M. LEONTIEVA and S. A. SHALATSKAYA: An interpolational method of estimating the thermal conductivity of phases composing two-phase heterogeneous system	757
F. R. SHKYLAR, M. I. AGAFONOVA and V. M. MALKIN: Re-radiation in high-temperature heat exchangers	758
YU. P. KOTELNIKOV: To the study of regular regime relations for temperature fields and thermoelastic stresses	758
E. N. BUKHARKIN: Experimental determination of wet-bulb temperature of high-temperature gases	769

A. G. BOLSHAKOV and E. V. STEPANOVA: Equilibrium moisture content of zinc tetraoxichromate	760
E. P. SUKHOVICH: Study of vortex chamber gas dynamics	762
