

## ANNOUNCEMENT

### INTERNATIONAL SYMPOSIUM ON FLOW VISUALIZATION

The Institute of Space and Aeronautical Science, University of Tokyo, has organized "Symposium on Flow Visualization" every year since 1973. In commemoration of the fifth anniversary of the symposium the Organizing Committee of the Symposium has planned an international symposium on flow visualization in the autumn of 1977 at Tokyo, under the sponsorship of the Japan Society for the Promotion of Science and the Japan Society for Aeronautical and Space Sciences. The Committee considers that anyone who is interested in flow visualization will be welcome to join the Symposium.

#### *Scope and aim of the Symposium*

The techniques of flow visualization have been continually developed and applied to various fields as the most powerful means to understand complicated flow phenomena in nature. The International Symposium, which is interdisciplinary in scope, aims to attract the participation of experts and users of flow visualizing techniques in furthering the development of the methods and its applications.

#### *History and background of Symposium*

The Symposium on Flow Visualization in Japan was initiated by Professor Tsuyoshi Asanuma in 1973, and has

been held on every July at Tokyo under the sponsorship of the University of Tokyo. The Symposium was attended by some 400 people during every session, drawn from a wide variety of special fields, such as aerospace and mechanical sciences, architecture, agriculture, medical science, etc. It is noted that overseas presentation of papers was made in the last two symposia, although they were planned to be domestic. As a result of these, the Organizing Committee agreed to plan an international symposium on flow visualization immediately following the domestic symposium in 1977.

Date: October 1977.

Place: Tokyo.

Topics: Current topics concerning flow visualization in any special field.

Languages: The Symposium languages are English and Japanese.

Registration fee: Will be free of charge for foreign authors.

Publication: The proceedings of the Symposium in English will be published.

Correspondence: Please address all inquiries concerning the Symposium to Professor Y. Tanida, Institute of Space and Aeronautical Science, University of Tokyo, Komaba, Meguro-ku, Tokyo 153, Japan.
