

ANNOUNCEMENT

SIXTH NATIONAL HEAT AND MASS TRANSFER CONFERENCE

29, 30 and 31 December 1981

Organized by: Indian Institute of Technology
Madras-600 036
India

The main objective of the conference is to bring together members of the heat and mass transfer community in the country and abroad for a thorough exchange of ideas in the various areas of heat and mass transfer. The focus of the conference would be on new areas of basic and applied research with special reference to energy.

During the conference, papers will be presented in various technical sessions and there will be some invited lectures.

Call for papers

Papers not published so far and concerned with original research or design are invited. Some of the topics on which papers may be contributed are listed below

Conduction heat transfer	Design of heat transfer equipment
Convective heat and mass transfer	Design of mass transfer equipment
Radiative heat transfer	Case studies
Two phase flow	Thermal insulation
Thermophysical properties	Measurement techniques
Renewable Energy systems	

Authors intending to submit papers for consideration should send an abstract (in duplicate) by 30 April 1981 so as to enable the local committee to organize the review work and to plan the technical sessions. Instructions for preparing papers according to a prescribed format will be sent to authors after receiving abstracts. Authors are requested to submit their manuscripts in triplicate (one original and two copies) by 30 June 1981.

All manuscripts will be reviewed. Only those accepted will be presented at the conference and subsequently published in the proceedings.

The abstract and the manuscript are to be sent to:

Dr. V. M. K. Sastri
Organising Secretary
6th National Heat and
Mass Transfer Conference
Department of Mechanical Engineering
Indian Institute of Technology,
Madras-600 036, India.

The registration form and other details regarding the technical sessions, accommodation etc., will be sent on application to the Organising Secretary.
