## **ACTBP2 alleles: correction of the sequenced fragment lengths**

Dear Sir,

we would like to make an amendment to data published in the Int J Legal Med. Due to a counting error of the bases in the 5'-flanking region of the ACTBP2 alleles in the publications Möller and Brinkmann (1994) and Möller et al. (1995), the fragment lengths quoted are incorrect. The correct fragment lengths of all the ACTBP2 alleles are 10 bp longer than those originally given.
