

ELSEVIER

International Journal of Mass Spectrometry 200 (2000) 627–630

Subject index

- Anion chemistry
An introduction to the gas phase chemistry of anions, 79
- Aromaticity
Carbon clusters, 423
- Binding energies
Carbon clusters, 423
- Blackbody radiation
Carbon clusters, 423
- Bond energies
Kinetic energy dependence of ion-molecule reactions: guided ion beams and threshold measurements, 219
- Breakdown curves
Carbon clusters, 423
- Buckminsterfullerene
 C_{60} and carbon: a postbuckminsterfullerene perspective, 253
- C_{60}
 C_{60} and carbon: a postbuckminsterfullerene perspective, 253
- CAD and SID
Carbon clusters, 423
- Capillary electrophoresis
Evolution of ESI-mass spectrometry and Fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
- Carbon
 C_{60} and carbon: a postbuckminsterfullerene perspective, 253
- Carbon clusters
Carbon clusters, 423
- Charge-remote fragmentation
Charge-remote fragmentation: an account of research on mechanisms and applications, 611
- Chemical ionization
Development of chemical ionization mass spectrometry, 243
- Clusters
Frontiers in the spectroscopy of mass-selected molecular ions, 545
- Collisional activation
Development of tandem mass spectrometry: one perspective, 495
- Collisional excitation
Translational-energy spectroscopy: a personal perspective of its development, 403
- Collision-induced decomposition (CID)
The changing impact of the collision-induced decomposition of ions on mass spectrometry, 479
- Complexation
Probing molecular recognition by mass spectrometry, 57
- Correlation schemes
Correlating thermochemical data for gas-phase ion chemistry, 277
- Crossed-beam
Development of tandem mass spectrometry: one perspective, 495
- Delayed ionization and thermionic emission
Carbon clusters, 423
- Density functional theory
Carbon clusters, 423
- Detection
Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Dissociation
Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Drug discovery
Electrospray ionization mass spectrometry: a technology for studying noncovalent macromolecular complexes, 175
- Electron transfer
Inner-sphere electron transfer in metal-cation chemistry, 163
- Electronic spectroscopy
Frontiers in the spectroscopy of mass-selected molecular ions, 545
- Electrospray ionization
Electrospray ionization mass spectrometry: a technology for studying noncovalent macromolecular complexes, 175
Electrospray mass spectrometry of organometallic compounds, 387
Evolution of ESI-mass spectrometry and fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
Probing molecular recognition by mass spectrometry, 57
Quadrupole ion trap mass spectrometry: a view at the turn of the century, 285
Timing the flight of biomolecules: a personal perspective, 597
- Endohedral fullerenes
Carbon clusters, 423
- Energy loss
Translational-energy spectroscopy: a personal perspective of its development, 403
- Evaporative ensemble model
Carbon clusters, 423
- Excitation
Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Excited states
Translational-energy spectroscopy: a personal perspective of its development, 403
- Fatty acids
Charge-remote fragmentation: an account of research on mechanisms and

- applications, 611
- FHBT
 - Carbon clusters, 423
- Field ionization kinetics
 - The role of mass spectrometric methods in ionic reaction mechanistic studies, 27
- Fission reactions
 - Carbon clusters, 423
- Flow-tube mass spectrometry
 - Experimental studies of positive ion chemistry with flow-tube mass spectrometry: birth, evolution, and achievements in the 20th century, 97
- Fragmentation
 - Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Fragmentation mechanisms
 - Charge-remote fragmentation: an account of research on mechanisms and applications, 611
- FTICR
 - Evolution of ESI-mass spectrometry and fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
 - Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
 - The role of mass spectrometric methods in ionic reaction mechanistic studies, 27
- FTMS
 - Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Fullerenes
 - C₆₀ and carbon: a postbuckminsterfullerene perspective, 253
 - Carbon clusters, 423
- Gas chromatography
 - Quadrupole ion trap mass spectrometry: a view at the turn of the century, 285
- Gas phase
 - An introduction to the gas phase chemistry of anions, 79
 - Correlating thermochemical data for gas-phase ion chemistry, 277
 - Gas phase ion thermochemistry based on ion-equilibria from the ionosphere to the reactive centers of enzymes, 313
- Gaseous ion-molecules
 - Thermochemical ladders scaling the ramparts of gaseous ion energetics, 187
- Gaseous ions
 - Quadrupole ion trap mass spectrometry: a view at the turn of the century, 285
- Gspann parameter
 - Carbon clusters, 423
- Guided ion beams
 - Kinetic energy dependence of ion-molecule reactions: guided ion beams and threshold measurements, 219
- High pressure mass spectrometry (HPMS)
 - Mass spectrometric implications of high-pressure ion sources, 459
 - Thermochemical ladders scaling the ramparts of gaseous ion energetics, 187
- Host-guest chemistry
 - Probing molecular recognition by mass spectrometry, 57
- Intramolecular vibrational redistribution (IVR)
 - Landmarks in the theory of mass spectra, 43
- Ion chromatography
 - Carbon clusters, 423
- Ion cyclotron resonance
 - Development of tandem mass spectrometry: one perspective, 495
 - Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
 - Photodissociation of trapped ions, 571
- Ion dissociation
 - Ion dissociation dynamics and thermochemistry by photoelectron photoion coincidence (PEPICO) spectroscopy, 443
- Ion implantation
 - Carbon clusters, 423
- Ion optics
 - SIMION for the personal computer in reflection, 3
- Ion spectroscopy
 - Photodissociation of trapped ions, 571
- Ion trap
 - Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Ion/ion reaction
 - Novel quadrupole ion trap methods for characterizing the chemistry of gaseous macro-ions, 137
- Ionization
 - Correlating thermochemical data for gas-phase ion chemistry, 277
 - Electrospray mass spectrometry of organometallic compounds, 387
- Ion-molecule equilibria
 - Gas phase ion thermochemistry based on ion-equilibria. From the ionosphere to the reactive centers of enzymes, 313
- Ion-molecule reactions
 - Development of chemical ionization mass spectrometry, 243
 - Novel quadrupole ion trap methods for characterizing the chemistry of gaseous macro-ions, 137
 - The role of mass spectrometric methods in ionic reaction mechanistic studies, 27
- Ion-molecules
 - Some reflections on characterizing potential surfaces for gas-phase ionic reactions, 591
- KERDs
 - Carbon clusters, 423
- LAMMA
 - Matrix-assisted laser desorption/ionization, an experience, 71
- Laser desorption
 - Matrix-assisted laser desorption/ionization, an experience, 71
- Lipid mediators
 - Lipid mediators and mass spectrometry: an historical perspective, 201
- Lipids
 - Charge-remote fragmentation: an account of research on mechanisms and applications, 611

- Macro-ion
 Novel quadrupole ion trap methods for characterizing the chemistry of gaseous macro-ions, 137
- Magic shells
 Carbon clusters, 423
- MALDI
 Matrix-assisted laser desorption/ionization, an experience, 71
 Timing the flight of biomolecules: a personal perspective, 597
- Mass spectra
 Carbon clusters, 423
- Mass spectrometry
 The changing impact of the collision-induced decomposition of ions on mass spectrometry, 479
 Characterisation of synthetic polymer systems, 261
 Evolution of ESI-mass spectrometry and fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
 Gas phase ion thermochemistry based on ion-equilibria. From the ionosphere to the reactive centers of enzymes, 313
 Lipid mediators and mass spectrometry: an historical perspective, 201
 Mass spectrometric implications of high-pressure ion sources, 459
 Matrix-assisted laser desorption/ionization, an experience, 71
 Quadrupole ion trap mass spectrometry: a view at the turn of the century, 285
 Timing the flight of biomolecules: a personal perspective, 597
- Maximum entropy method
 Landmarks in the theory of mass spectra, 43
- Metal ions
 Inner-sphere electron transfer in metal-cation chemistry, 163
- Metallation
 Electrospray mass spectrometry of organometallic compounds, 387
- Metastable peaks
 The role of mass spectrometric methods in ionic reaction mechanistic studies, 27
- Molecular ions
 Frontiers in the spectroscopy of mass-selected molecular ions, 545
- Molecular recognition
 Probing molecular recognition by mass spectrometry, 57
- MS/MS
 Development of tandem mass spectrometry: one perspective, 495
- Noncovalent complexes
 Electrospray ionization mass spectrometry: a technology for studying noncovalent macromolecular complexes, 175
- Octopole
 Kinetic energy dependence of ion-molecule reactions: guided ion beams and threshold measurements, 219
- Organometallic
 Electrospray mass spectrometry of organometallic compounds, 387
- Orthogonal injection
 Timing the flight of biomolecules: a personal perspective, 597
- Penning trap
 Milestones in Fourier transform ion cyclotron resonance mass spectrometry technique development, 331
- Phase space
 Landmarks in the theory of mass spectra, 43
- Photodissociation
 Photodissociation of trapped ions, 571
- Photoelectron
 Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- Photoelectron-photoion coincidence
 Ion dissociation dynamics and thermochemistry by photoelectron photoion coincidence (PEPICO) spectroscopy, 443
 Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- Photoionization
 Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- millennium: recent developments and applications, 357
- Positive ions
 Development of chemical ionization mass spectrometry, 243
- Positive-ion chemistry
 Experimental studies of positive ion chemistry with flow-tube mass spectrometry: birth, evolution, and achievements in the 20th century, 97
- Potential surfaces
 Some reflections on characterizing potential surfaces for gas-phase ionic reactions, 591
- Potential-energy surfaces
 Inner-sphere electron transfer in metal-cation chemistry, 163
- Proteins
 Electrospray ionization mass spectrometry: a technology for studying noncovalent macromolecular complexes, 175
 Evolution of ESI-mass spectrometry and Fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
- Proteomics
 Evolution of ESI-mass spectrometry and Fourier transform ion cyclotron resonance for proteomics and other biological applications, 509
- Protonation
 Electrospray mass spectrometry of organometallic compounds, 387
- Pulsed field ionization
 Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- Quadrupole ion trap
 Novel quadrupole ion trap methods for characterizing the chemistry of gaseous macro-ions, 137
 Quadrupole ion trap mass spectrometry: a view at the turn of the century, 285
- Quadrupole-time-of-flight
 Electrospray ionization mass spectrometry: a technology for studying noncovalent macromolecular complexes, 175

- Quasi-Equilibrium Theory (QET)
The changing impact of the collision-induced decomposition of ions on mass spectrometry, 479
- Quaternization
Electrospray mass spectrometry of organometallic compounds, 387
- Reaction intermediate
Electrospray mass spectrometry of organometallic compounds, 387
- Reaction mechanisms
Inner-sphere electron transfer in metal-cation chemistry, 163
The role of mass spectrometric methods in ionic reaction mechanistic studies, 27
- RRKM
Carbon clusters, 423
- Statistical theory
Landmarks in the theory of mass spectra, 43
- Synchrotron radiation
Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- Synthetic polymer systems
Characterisation of synthetic polymer systems, 261
- Tandem mass spectrometry
The changing impact of the collision-induced decomposition of ions on mass spectrometry, 479
Charge-remote fragmentation: an account of research on mechanisms and applications, 611
Development of tandem mass spectrometry: one perspective, 495
- Thermochemical ladders
Thermochemical ladders scaling the ramparts of gaseous ion energetics, 187
- Thermochemistry
Gas phase ion thermochemistry based on ion-equilibria. From the ionosphere to the reactive centers of enzymes, 313
Ion dissociation dynamics and thermochemistry by photoelectron photoion coincidence (PEPICO) spectroscopy, 443
Kinetic energy dependence of ion-molecule reactions: guided ion beams and threshold measurements, 219
- Thresholds
Kinetic energy dependence of ion-molecule reactions: guided ion beams and threshold measurements, 219
- Time-of-flight
Matrix-assisted laser desorption/ionization, an experience, 71
Timing the flight of biomolecules: a personal perspective, 597
- Transition metals
Inner-sphere electron transfer in metal-cation chemistry, 163
- Transition state
Landmarks in the theory of mass spectra, 43
- Translational-energy spectroscopy
Translational-energy spectroscopy: a personal perspective of its development, 403
- Unimolecular dissociation
Novel quadrupole ion trap methods for characterizing the chemistry of gaseous macro-ions, 137
- Vacuum environment
Mass spectrometric implications of high-pressure ion sources, 459
- Vacuum ultraviolet
Vacuum ultraviolet photoionization and photoelectron studies in the new millennium: recent developments and applications, 357
- Vibrational spectroscopy
Frontiers in the spectroscopy of mass-selected molecular ions, 545
