FORTHCOMING ARTICLES

Escape velocity and resonant ion dynamics in Paul trap mass spectrometers

Glomin Thomas Abraham, Anindya Chatterjee and A.G. Menon (Bangalore, India)

Effect of relative humidity on the detection of sulfur dioxide and sulfuric acid using a chemical ionization mass spectrometer

D. Salcedo (Pasadena, CA, USA), P.W. Villalta (Billerica, MA, USA), V. Varutbangkul (Pasadena, CA, USA), J.C. Wormhoudt, R.C. Miake-Lye, D.R. Worsnop (Billerica, MA, USA), J.O. Ballenthin, W.F. Thorn, A.A. Viggiano, T.M. Miller (Hanscom, MA, USA), R.C. Flagan and J.H. Seinfeld (Pasadena, CA, USA)

Mass spectrometric determination of partial pressures of ions in the saturated vapor over the NaF–Na₃AlF₆ system

S.V. Abramov, N.S. Chilingarov, A.Ya. Borshchevsky and L.N. Sidorov (Moscow, Russia)

Design and performance of a new FT-ICR cell operating at a temperature range of 77–438 K

Xinghua Guo, Marc Duursma, Ahmed Al-Khalili, Liam A. McDonnell (Amsterdam, The Netherlands) and Ron M.A. Heeren (Amsterdam and Utrecht, The Netherlands)

Initial velocity of secondary ions from XY-TOF technique, simultaneous calibration by residual gas ionization

T. Jalowy, Th. Weber, R. Dörner (Frankfurt am Main, Germany), L. Farenzena, V.M. Collado, E.F. da Silveira (Rio de Janeiro, Brazil), H. Schmidt-Böcking and K.O. Groeneveld (Frankfurt am Main, Germany)

Climbing the internal energy ladder: the unimolecular decomposition of ionized poly(vinyl acetate)

Marie-Soleil Giguère and Paul M. Mayer (Ottawa, Canada)
