
FORTHCOMING ARTICLES

Honour Issue: William L. Hase in celebration of his 60th birthday, including among others, the following articles

Proton migration and its effect on the MS fragmentation of *N*-Acetyl OMe proline: MS/MS experiments and *ab initio* and density functional calculations

Istvan Komáromi (Debrecen, Hungary)

Thermal decomposition of ethylbenzene cations ($C_8H_{10}^+$): experiments and modeling of falloff curves

Abel I. Fernandez, A.A. Viggiano (Hanscom, MA, USA), A.I. Maergoiz, J. Troe (Goettingen, Germany) and V.G. Ushakov (Goettingen, Germany and Chernogolovka, Russia)

Forward

Michael T. Bowers (Santa Barbara, CA, USA)

A celebration of the scientific and personal contributions of William L. Hase

Mary T. Rodgers (Detroit, MI, USA)

Dissociation reactions of diatomic silver cations with small alkenes: experiment and theory

Manuel J. Manard, Paul R. Kemper, Catherine J. Carpenter and Michael T. Bowers (Santa Barbara, CA, USA)

Temperature dependence of the oxide ion/ozone reaction in the gas phase

Jane M. Van Doren (Worcester, MA, USA), Skip Williams (Massachusetts, MA, USA and Wright Patterson, OH, USA) Anthony J. Midey, Thomas M. Miller and A.A. Viggiano (Massachusetts, MA, USA)
