## FORTHCOMING ARTICLES

### **Formation of C<sub>7</sub>H<sub>7</sub><sup>+</sup> ions from ethylbenzene and o-xylene ions: Fragmentation versus isomerization**

*Susanne Schulze, Anna Paul and Karl-Michael Weitzel (Germany)*

### **Structures and stability of B-doped Al anions: Al<sub>n</sub>B<sup>-</sup> and Al<sub>n</sub>B<sub>2</sub><sup>-</sup> (n = 1–7)**

*Zhen-Yi Jiang, Xiao-Min Luo, Sheng-Tao Li and San-Yan Chu (China, Taiwan)*

### **Determination of the location of positive charges in gas-phase polypeptide polycations by tandem mass spectrometry**

*Frank kjeldsen, Mikhail M. Savitski, Christopher M. Adams and Roman A. Zubarev (Sweden)*

### **Ionization of W and W<sup>+</sup> by electron impact**

*Duck-Hee Kwon, Yong-Joo Rhee and Yong-Ki Kim (South Korea, USA)*

### **The isotopic composition and atomic weight of ytterbium**

*John R. de Laeter and Nino Bukilic (Australia)*

### **Electron impact ionization of alanine: Appearance energies of the ions**

*I. Ipolyi, P. Cicman, S. Denifl, V. Matejčík, P. Mach, J. Urban, P. Scheier, T.D. Märk, S. Matejcik (Austria, Slovakia)*
