SUBSCRIPTION RATES 1978

For libraries, university departments, government laboratories, industrial and other multiple-reader institutions, \$90.00 per annum (including postage and insurance).

Specially reduced rates to individuals: In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription, may purchase a second or additional subscription for personal use at the much reduced rate of U.S. \$30.00 per annum.

Microform subscriptions and back issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

All subscription enquiries should be addressed to: The Subscription Fulfillment Manager, Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means: electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the publishers.

SCOPE OF THE JOURNAL

The Journal publishes original investigations of multiphase flow (solid-fluid, fluid-fluid, etc.). All contributions are reviewed by referees prior to publication. The Journal also publishes brief communications such as findings of current investigations, discussion of previous

publications, etc. These contributions are reviewed by one referee and are generally considered for the next issue of the Journal. Occasionally the Journal may publish review articles.
