

ANNOUNCEMENT AND CALL FOR PAPERS**MULTI PHASE FLOW & HEAT TRANSFER**

to be held at the
23rd ASME/AIChE/ANS National
Heat Transfer Conference
Denver, Colorado
August 4-7, 1985

Understanding of multiphase flow and heat transfer is important in many fields of engineering and science. Keeping in mind the current interest and activity in this complex area, the ASME, AIChE and ANS are jointly sponsoring a technical symposium on "Multiphase Flow and Heat Transfer" at the 1985 NHTC. These sessions are planned to include papers dealing with basic and applied aspects of such topics as:

- Heat and mass transfer at vapor/liquid interfaces
- Boiling and condensation under free and forced flow conditions on external and internal surfaces
- Phase change heat transfer in porous media
- Multi phase heat transfer in reacting and non-reacting flows
- Enhancement of heat transfer in the presence of a discontinuous phase

In submitting abstracts and papers, the following schedule must be followed:

- 400/500 word Abstract (4 copies) due: November 15/84
- Authors notified of Abstract acceptance: December 1/84
- Four (4) copies of Manuscript due to Session Co-Chairman for review: January 15/85
- Authors notified of paper acceptance: March 1/85
- Author-prepared mats due: April 7/85

All accepted papers will be published in a bound volume available at the meeting. Papers of archival value will be recommended for possible publication in an appropriate journal.

Send all abstracts or inquiries to either Session Co-chairman:

Professor O. C. Jones, Jr.
Department of Nuclear Engineering
Rensselaer Polytechnic Institute
Troy, NY 12180-3590

Professor G. Hetsroni
Department of Mechanical Engineering
Technion-Israel Institute of Technology
Haifa, Israel 32000
