

## LIST OF CONTENTS

### *Number 1*

- |  |     |  |
|--|-----|--|
| <b>I. Kim, S. Elghobashi<br/>and W. A. Sirignano</b> | 1   | Unsteady flow interactions between a pair of advected vortex tubes and a rigid sphere  |
| <b>A. Adrover and M. Giona</b>                       | 25  | Hydrodynamic properties of fractals: application of the lattice Boltzmann equation to transverse flow past an array of fractal objects |
| <b>R. W. Rite and<br/>K. S. Rezkallah</b>            | 37  | Local and mean heat transfer coefficients in bubbly and slug flows under microgravity conditions                                       |
| <b>M. Nädler and D. Mewes</b>                        | 55  | Flow induced emulsification in the flow of two immiscible liquids in horizontal pipes  |
| <b>V. Bontozoglou<br/>and G. Papapolymerou</b>       | 69  | Laminar film flow down a wavy incline  |
| <b>T. D. Papathanasiou</b>                           | 81  | On the effective permeability of square arrays of permeable fiber tows   |
| <b>T. Ludwig and P. Roth</b>                         | 93  | Modeling of laminar combustion wave propagation in reactive gas/particle mixtures  |
| <b>P. Szabo and O. Hassager</b>                      | 113 | Displacement of one Newtonian fluid by another: density effects in axial annular flow  |
| <b>L. Nilsson and S. Stenström</b>                   | 131 | A study of the permeability of pulp and paper  |
| <b>E. Gavze and M. Shapiro</b>                       | 155 | Particles in a shear flow near a solid wall: effect of nonsphericity on forces and velocities  |
| <b>A. N. Kornilovsky<br/>and A. A. Harms</b>         | 183 | Pellet dynamics in a gas-filled vertical column  |
| <i>Brief Communication</i><br><b>H. Chanson</b>      | 193 | Air bubble entrainment in open channels: flow structure and bubble size distributions  |

### *Number 2*

- |   |     |   |
|---|-----|---|
| <b>C. Lorencez,<br/>M. Nasr-Esfahany,<br/>M. Kawaji and M. Ojha</b> | 205 | Liquid turbulence structure at a sheared and wavy gas-liquid interface                            |
| <b>J. L. Marié, E. Moursali<br/>and S. Tran-Cong</b>                | 227 | Similarity law and turbulence intensity profiles in a bubbly boundary layer at low void fractions |

- |   |     |   |
|---|-----|---|
| <b>M. Iguchi, K. Okita,<br/>T. Nakatani and N. Kasai</b>      | 249 | Structure of turbulent round bubbling jet generated by premixed gas and liquid injection                          |
| <b>G. Costigan<br/>and P. B. Whalley</b>                      | 263 | Slug flow regime identification from dynamic void fraction measurements in vertical air–water flows               |
| <b>J. Schmidt and L. Friedel</b>                              | 283 | Two-phase pressure drop across sudden contractions in duct areas  |
| <b>L. B. Fore, L. C. Witte<br/>and J. B. McQuillen</b>        | 301 | Heat transfer to two-phase slug flows under reduced-gravity conditions  |
| <b>P. Doron, M. Simkhis<br/>and D. Barnea</b>                 | 313 | Flow of solid–liquid mixtures in inclined pipes   |
| <b>Y. S. Chen, Y. L. Lu,<br/>Y. M. Yang and J. R. Maa</b>     | 325 | Surfactant effects on the motion of a droplet in thermocapillary migration  |
| <b>F. Mashayek, F. A. Jaber,<br/>R. S. Miller and P. Givi</b> | 337 | Dispersion and polydispersity of droplets in stationary isotropic turbulence                                      |
| <b>C. W. M. van der Geld</b>                                  | 357 | Measurement and prediction of solid sphere trajectories in accelerated gas flow                                   |
| <b>M. Chacha, S. Radev,<br/>L. Tadrist and R. Occelli</b>     | 377 | Numerical treatment of the instability and the breakup of a liquid capillary column in a bounded immiscible phase |
| <i>Brief Communications</i>                                   |     |   |
| <b>F. Mao, F. K. Desir<br/>and M. A. Ebadian</b>              | 397 | Pressure drop measurement and correlation for three-phase flow of simulated nuclear waste in a horizontal pipe    |
| <b>V. M. Kenning<br/>and C. T. Crowe</b>                      | 403 | On the effect of particles on carrier phase turbulence in gas–particle flows                                      |

### ***Number 3***

- |   |     |  |
|---|-----|--|
| <b>A. Averbakh, A. Shauly,<br/>A. Nir and R. Semiat</b>                                     | 409 | Slow viscous flows of highly concentrated suspensions—part I: laser–Doppler velocimetry in rectangular ducts |
| <b>D. Z. Zhang<br/>and A. Prosperetti</b>   | 425 | Momentum and energy equations for disperse two-phase flows and their closure for dilute suspensions          |
| <b>U. Schaflinger, T. Aihara,<br/>T. Gruber, U. Weingerl,<br/>T. Ohara and W. Schneider</b> | 455 | Analysis of particle motion in a very shallow fluidized bed  |
| <b>A. Britan, G. Ben-Dor,<br/>T. Elperin, O. Igra and<br/>J. P. Jiang</b>                   | 473 | Gas filtration during the impact of weak shock waves on granular layers                                      |

<b>Y. Taitel and D. Barnea</b>	493	Simplified transient simulation of two phase flow using quasi-equilibrium momentum balances
<b>M. Nordsveen and A. F. Bertelsen</b>	503	Wave induced secondary motions in stratified duct flow
<b>J. Rovinsky, N. Brauner and D. Moalem Maron</b>	523	Analytical solution for laminar two-phase flow in a fully eccentric core-annular configuration
<b>M. S. Malashetty and J. C. Umavathi</b>	545	Two-phase magnetohydrodynamic flow and heat transfer in an inclined channel
<b>S. Ramaswamy and L. G. Leal</b>	561	A note on inertial effects in the deformation of Newtonian drops in a uniaxial extensional flow
<b>C. K. K. Lun and H. S. Liu</b>	575	Numerical simulation of dilute turbulent gas-solid flows in horizontal channels
<i>Brief Communication</i>		
<b>N. Fueyo, J. Ballester and C. Dopazo</b>	607	The computation of particle size in Eulerian-Eulerian models of coal combustion

#### ***Number 4***

<b>A. Shauly, A. Averbakh, A. Nir and R. Semiat</b>	613	Slow viscous flows of highly concentrated suspensions—part II: particle migration, velocity and concentration profiles in rectangular ducts
<b>Z. Liu and R. D. Reitz</b>	631	An analysis of the distortion and breakup mechanisms of high speed liquid drops
<b>W.-H. Chou, L.-P. Hsiang and G. M. Faeth</b>	651	Temporal properties of drop breakup in the shear breakup regime
<b>M. C. Ruzicka, J. Drahoř, J. Zahradník and N. H. Thomas</b>	671	Intermittent transition from bubbling to jetting regime in gas-liquid two phase flows
<b>S. Vaccaro, D. Musmarra and M. Petrecca</b>	683	Evaluation of the jet penetration depth in gas-fluidized beds by pressure signal analysis
<b>K. Chen and H. J. Richter</b>	699	Instability analysis of the transition from bubbling to jetting in a gas injected into a liquid
<b>H. Z. Li, Y. Mouline, L. Choplin and N. Midoux</b>	713	Chaotic bubble coalescence in non-Newtonian fluids
<b>S. Marti and O. Shoham</b>	725	A unified model for stratified-wavy two-phase flow splitting at a reduced T-junction with an inclined branch arm
<b>Q. Wang, K. D. Squires, M. Chen and J. B. McLaughlin</b>	749	On the role of the lift force in turbulence simulations of particle deposition

- F. Frishman, M. Hussainov, A. Kartushinsky and A. Mulgi** 765 Numerical simulation of a two-phase turbulent pipe-jet flow loaded with polydispersed solid admixture
- E. G. D. Cohen, R. Verberg and I. M. de Schepper** 797 Newtonian viscosity and visco-elastic behavior of concentrated neutral hard-sphere colloidal suspensions
- Brief Communication*  
**S. Tang and J. Kubie** 809 Further investigation of flow in single inlet/outlet vessels

### ***Number 5***

- K. J. Elkow and K. S. Rezkallah** 815 Void fraction measurements in gas-liquid flows under  $1-g$  and  $\mu-g$  conditions using capacitance sensors
- K. J. Elkow and K. S. Rezkallah** 831 Statistical analysis of void fluctuations in gas-liquid flows under  $1-g$  and  $\mu-g$  conditions using a capacitance sensor
- N. A. Vlachos, S. V. Paras and A. J. Karabelas** 845 Liquid-to-wall shear stress distribution in stratified/atomization flow
- J. J. Sutherland, P. E. Sojka and M. W. Plesniak** 865 Entrainment by ligament-controlled effervescent atomizer-produced sprays
- S. H. Khor, M. A. Mendes-Tatsis and G. F. Hewitt** 885 One-dimensional modelling of phase holdups in three-phase stratified flow
- K. Harstad and J. Bellan** 899 Behavior of a polydisperse cluster of interacting drops evaporating in an inviscid vortex
- A. Boemer, H. Qi and U. Renz** 927 Eulerian simulation of bubble formation at a jet in a two-dimensional fluidized bed
- M. Gopal and W. P. Jepsen** 945 Development of digital image analysis techniques for the study of velocity and void profiles in slug flow
- P. Gospodinov and A. L. Yarin** 967 Draw resonance of optical microcapillaries in non-isothermal drawing

E. Loth, M. Taeibi-Rahni and G. Tryggvason 977 Deformable bubbles in a free shear layer

Book Reviews 1003

### **Number 6**

A. L. Samways, L. J. S. Bradbury and H. H. Bruun 1007 Pressure measurements and convection velocity evaluations in two-phase flow

S. K. Park, M. H. Kim and K. J. Yoo 1031 Effects of a wavy interface on steam-air condensation on a vertical surface

M. D. Mat and O. J. Ilegbusi 1043 Kinematic mixing of two fluids with valve perturbation

S. M. Ghiaasiaan, X. Wu, D. L. Sadowski and S. I. Abdel-Khalik 1063 Hydrodynamic characteristics of counter-current two-phase flow in vertical and inclined channels: effects of liquid properties

T.-J. Liu 1085 Investigation of the wall shear stress in vertical bubbly flow under different bubble size conditions

Y. T. Kang, R. Stout and R. N. Christensen 1111 The effects of inclination angle on flooding in a helically fluted tube with a twisted insert

A. Liné and D. Lopez 1131 Two-fluid model of wavy separated two-phase flow

C. C. Hsieh, S. B. Wang and C. Pan 1147 Dynamic visualization of two-phase flow patterns in a natural circulation loop

G. Cinar, B. S. Yilbas and M. Sunar 1171 Study into nucleation of steam during expansion through a nozzle

T. Van Den Moortel, R. Santini, L. Tadriss and J. Pantaloni 1189 Experimental study of the particle flow in a circulating fluidized bed using a Phase Doppler Particle Analyser: a new post-processing data algorithm
