The pressure difference Δp_f was improperly defined on pages 202 and 204. In the fourth paragraph on page 202 it should read: $\Delta p_f = (p_0 - p_H) - \rho_f g H$, and near the end of page 204 it should be: $\Delta p_f = (p_y - p_H) - \rho_f g (H - y)$.
