## Aims and Scope

The *International Journal of Multiphase Flow* publishes theoretical, numerical and experimental investigations of multiphase flow which are of relevance and permanent interest. Topics appropriate to the journal include fluid mechanics and rheological studies of problems involving:

Multiphase flow and heat transfer  
Cavitation phenomena  
Bubbly flows  
Slurries (such as ceramics, catalysts, filled polymers etc.)  
Suspensions  
Particle-flow interactions  
Bubble and drop dynamics  
Fluidization  
Porous media

The journal includes full papers, brief communications covering reports, current investigations and discussions of previous publications, and conference announcements.
