## Aims and Scope

The *International Journal of Multiphase Flow* publishes theoretical, numerical and experimental investigations of multiphase flow which are of relevance and permanent interest. Topics appropriate to the journal include fluid mechanics and rheological studies of problems involving:

Multiphase flow and heat transfer  
Cavitation phenomena  
Bubbly flows  
Slurries (such as ceramics, catalysts, filled polymers etc.)  
Suspensions  
Particle-flow interactions  
Bubble and drop dynamics  
Fluidization  
Porous media

The journal includes full papers, brief communications covering reports, current investigations and discussions of previous publications, and conference announcements.

---

## Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>
