

## Announcement

### **Controlled release technology: polymeric delivery systems for drugs, pesticides and foods**

The above-mentioned one-week summer program is to be held at the *Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.* on July 19–22, 1983.

The program will explore recent advances in controlled release technology and cover polymer systems as they relate to achieving appropriate design of controlled release formulations.

The course will be presented by faculty at MIT and other universities who are currently active in the topics to be covered.
