

Publisher's Note

The attention of authors is drawn to the requirement, mentioned in the 'Instructions to Authors', for manuscripts to be accompanied by a list of 6-8 key words. Please note that this is now considered mandatory. Key words are of great use in facilitating the coverage of published work in abstracting and information retrieval systems and from Vol. 21 onwards will also form the basis of a computer-generated subject index for the *International Journal of Pharmaceutics*.
