

INTERNATIONAL JOURNAL OF PHARMACEUTICS

AIMS AND SCOPE

The INTERNATIONAL JOURNAL OF PHARMACEUTICS provides a medium for the publication of research results dealing with all aspects of Pharmaceutics including physical, chemical, analytical, biological and engineering studies related to drug delivery in its broadest sense. Such areas include:

1. Drug delivery systems
2. Physical pharmacy
3. Biopharmaceutics
4. Pharmacodynamics and pharmacokinetics
5. Membrane function and transport
6. Biotechnology
7. Drug and prodrug design
8. Radiopharmaceuticals
9. Sterility and sterilization
10. Quality control of pharmaceuticals
11. Pharmaceutical analysis
12. Drug stability
13. Pharmaceutical technology
14. Descriptions/reviews of computer programs relating to the above areas
15. Application of cell and molecular biology in drug delivery

EDITORIAL POLICY

The over-riding criteria for publication are originality, high scientific quality and interest to a multidisciplinary audience. Papers not sufficiently substantiated by experimental detail will not be published. Any technical queries will be referred back to the author, although the Editors reserve the right to make alterations in the text without altering the technical content.

Manuscripts submitted under multiple authorship are reviewed on the assumption that all listed authors concur with the submission and that a copy of the final manuscript has been approved by all authors and tacitly or explicitly by the responsible authorities in the laboratories where the work was carried out. If accepted, the manuscript shall not be published elsewhere in the same form, in either the same or another language, without the consent of the Editors and Publisher.
