Effect of penetration enhancers on permeation of the thyrotrophin releasing hormone analogue pGlu-3-methyl-His-Pro amide through human epidermis

B.M. Magnusson and P. Runn

Defence Research Establishment, Division of NBC, Department of Biomedicine, S-901 82 Umea, Sweden and the Department of Dermatology, Umea University Hospital, S-901 Umea, Sweden

Dr Julia Kelly of the Department of Biochemistry, Trinity College, Dublin has pointed out that in the introduction and other sections of the above paper, there are verbatim quotations from her review Thyrotropin-releasing hormone: basis and potential for its therapeutic use, *Essays in Biochemistry* 30 (1995) 133–149. These quotations are without attribution to Dr Kelly's review.

The editors deplore this carelessness on the part of the authors in the preparation of this paper for publication.
