

Acknowledgement of reviewers contribution to IJP

The work of reviewers should not go unsung. The views of independent peers on work submitted to the journal are absolutely vital in ensuring the maintenance of quality. Quality is an intangible property, so we rely heavily as editors on corroborative opinions from researchers world-wide. We are fortunate to have a large data base of reviewers' names. The editors are grateful for the work that goes into each assessment, often at busy times in work schedules and often competing with requests from other journals. The reports are anonymous, but it is reassuring that we do get messages from authors thanking the reviewers for pointing out flaws or potential improvements in manuscripts. Not only is this work anonymous, but also it is unpaid, but as small recognition we list here those who have supported IJP through their work of manuscript review. On behalf of the editorial team, Thank You!

A.T. Florence
