

CONTENTS OF NEXT ISSUE

VOLUME 2, No. 3

JULY 1966

- J. L. BLEUSTEIN: Thickness-twist and face-shear vibrations of a contoured crystal plate
- R. FRISCH-FAY: On the stability of a strut under uniformly distributed axial forces
- S. NEMAT-NASSER: On the response of continuous media to random excitations
- O. W. DILLON, JR. and T. R. TAUCHERT: The experimental technique for observing the temperatures due to the coupled thermoelastic effect
- T. S. COOK and Y. WEITSMAN: Strain-gradient effects around spherical inclusions and cavities
- R. A. SCHAPERY: An engineering theory of nonlinear viscoelasticity with applications
- R. J. EVANS and K. S. PISTER: Constitutive equations for a class of nonlinear elastic solids
- F. ERDOGAN: Elastic-plastic anti-plane problems for bonded dissimilar media containing cracks and cavities
- M. ANLIKER and K. R. RAMAN: Karotkoff sounds at diastole—a phenomenon of dynamic instability of fluid-filled shells
- J. A. KÖNIG and J. RYCHLEWSKI: Limit analysis of circular plates with jump non-homogeneity
- P. C. YANG, C. H. NORRIS and Y. STAVSKY: Elastic wave propagation in heterogeneous plates
- MARIO COMO: Lateral buckling of a cantilever subjected to a transverse follower force
