

SOME OF THE PAPERS TO BE PUBLISHED IN FUTURE ISSUES OF THE JOURNAL

- C. D. BABCOCK, JR.: The influence of the testing machine on the buckling of cylindrical shells under axial compression
- D. S. GRIFFIN and R. B. KELLOGG: A numerical solution for axially symmetrical and plane elasticity problems
- F. A. LECKIE and R. K. PENNY: Shakedown loads for radial nozzles in spherical pressure vessels
- J. DUNDERS and M. STIPPES: Nature of singularity for a point load at the edge of a plane in bending
- D. B. BOGY and E. STERNBERG: The effect of couple-stresses on singularities due to discontinuous loadings
- E. KRÖNER: Elasticity theory of materials with long range cohesive forces
- N. J. FREEMAN and L. M. KEER: Torsion of elastic cylinders in contact
- M. STERN: An appropriate shell theory for unrestricted elastic deformations
- L. H. N. LEE: Inelastic column stability subjected to time-dependent load
- T. H. H. PIAN and L. L. BUCCIARELLI: Buckling of a radially constrained circular ring
- H. H. BLEICH and A. T. MATTHEWS: Step load moving with super-seismic velocity on the surface of an elastic-plastic half-space
- D. J. MCGILL and K. H. LENZEN: Circumferential axisymmetric free oscillations of thick hallowed tori
- T. WAH: Buckling of thin circular rings under uniform pressure
- T. R. ROBE and T. R. KANE: Dynamics of an elastic satellite—III
- E. KOSSECKA and H. ZORSKI: Linear equations of motion of a concentrated defect
- E. R. FITZGERALD and J. TASI: The Schroedinger equation and momentum transfer in crystals
- P. TONG and T. H. H. PIAN: The convergence of the finite element method in solving linear elastic problems
- E. P. POPOV, M. KHOJASTEH-BAKHT and S. YAGHMAI: Bending of circular plates of hardening material
- J. L. BLEUSTEIN: A note on the boundary conditions of Toupin's strain-gradient theory
