

ERRATUM

RICHARD J. TALBOT and J. S. PRZEMIENIECKI, Finite element analysis of frequency spectra for elastic waveguides. *Int. J. Solids Structures* 11, 115–138 (1975).

The numerical values for vertical and horizontal scales in Fig. 13 should be reduced by a factor 1.27, i.e. $2.54/2.0$. Inadvertently, the original line drawing for Fig. 13 in the paper was traced on two centimeter instead of one inch grid. Figure 13 with corrected scales is reproduced below:

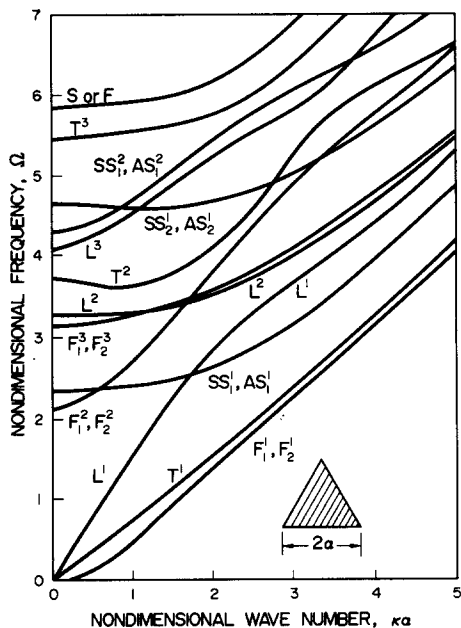

Fig. 13. First thirteen branches of the complete spectra for an equilateral triangle waveguide (Poisson's ratio $\nu = 1/3$, 45 element half-bar model).
