

ANNOUNCEMENT

International Symposium on Innovative Numerical Analysis in Applied Engineering Science

23–27 May 1977 in Paris, France

Papers are solicited for this International Symposium in all areas of engineering science with particular emphasis on “non-standard” numerical analysis techniques. Traditional applications of state-of-the-art techniques such as finite elements or finite differences are not encouraged; reports on innovations in integral equations, hybridization of analysis methods, and new technology are strongly encouraged. The Symposium further seeks to emphasize the *application* of numerical analysis rather than the mathematical foundations of various procedures. For further information or submission of abstracts please contact either of the Symposium coordinators:

Dr. T. A. Cruse
Pratt & Whitney Aircraft
400 Main Street—EB3S-2
East Hartford, CT 06108
U.S.A.
Tel: 203/565-3040

Dr. J. C. Lachat
Centre Technique des Industries Mécaniques
52, Avenue Félix-Louat 60304
Boîte Postal No. 67
Senlis Cedex
France
Tel: (4) 453.12.60
