

LIST OF CONTENTS

NUMBER 1

Arnold D. Kerr: On the derivation of well posed boundary value problems in structural mechanics	1
D. J. Chang, R. Muki and R. A. Westmann: Double cantilever beam models in adhesive mechanics	13
R. D. Mindlin: Low frequency vibrations of elastic bars	27
David Bushnell: Buckling of elastic-plastic shells of revolution with discrete elastic-plastic ring stiffeners	51
M. Shmuely and D. Peretz: Static and dynamic analysis of the DCB problem in fracture mechanics	67

NUMBER 2

Bernard Budiansky and Richard J. O'Connell: Elastic moduli of a cracked solid	81
R. D. Mindlin: Note on axial-shear and contour vibrations of prisms	99
Warren S. Edelstein: On bounds for primary creep in symmetric pressure vessels	107
J. P. Hirth and R. H. Wagoner: Elastic fields of line defects in a cracked body	117
S. A. Ramu and K. J. Iyengar: Plastic response of orthotropic circular plates under blast loading	125
Robert Reiss: The method of stress variation applied to minimal design for multiple loading	135
R. W. Ogden: Local and overall extremal properties of time-independent materials and non-linear elastic comparison materials	147

NUMBER 3

A. Phillips and M. Ricciuti: Fundamental experiments in plasticity and creep of aluminum—Extension of previous results	159
G. Diener and F. Käseberg: Effective linear response in strongly heterogeneous media—self-consistent approach	173
Alan Needleman and Viggo Tvergaard: An analysis of the imperfection sensitivity of square elastic-plastic plates under axial compression	185
E. F. Masur and C. H. Popelar: On the use of the complementary energy in the solution of buckling problems	203
R. J. DiMelfi and W. D. Nix: Hole growth in plane viscous creep including interaction effects	217
J. N. Reddy: Modified Gurtin's variational principles in the linear dynamic theory of viscoelasticity	227
Erratum	237

NUMBER 4

G. G. Adams and D. B. Bogy: The plane solution for bending of joined dissimilar elastic semi-infinite strips	239
T. B. Moodie and D. W. Barclay: Torsional-mode transients in variable-thickness shells of revolution	251
N. V. Banichuk and B. L. Karihaloo: Minimum-weight design of multi-purpose cylindrical bars	267
N. V. Banichuk: Optimization of elastic bars in torsion	275
Osamu Tamate: Two arbitrarily situated cracks in an elastic plate under flexure	287
P.-O. Boström: An analysis of the effect of tension induced damage on creep buckling of columns	299
H. M. Irvine and G. B. Sinclair: The suspended elastic cable under the action of concentrated vertical loads	309

NUMBER 5

Robert Reiss: Optimal compliance criterion for axisymmetric solid plates	319
Morris Stern and Mohan L. Soni: On the computation of stress intensities at fixed-free corners	331
M. F. Beatty and K. J. Cheverton: Some theorems in the theory of small deformations superimposed on a finite deformation of a hyperelastic material of grade 2	339
R. K. Kaul and G. Herrmann: A note on critical reflections of waves in an isotropic elastic plate	353
R. Harnach and H. Rother: On the theory of inextensional bending of shell structures	359
P. S. Theocaris: The evolution of caustics from holes to cracks	377
M. J. Lowrey: Discussion of: Finite strip-difference calculus technique for plate vibration problems	391
C. Sundararajan and D. V. Reddy: Authors' closure to discussion by M. J. Lowrey	393

NUMBER 6

Denos C. Gazis: Equivoluminal, Lamé-type waves in composite hollow cylinders	397
R. A. Schapery and D. P. Skala: Elastic stability of laminated elastomeric columns	401
Nagyoung Chang and Daniel W. Haines: Pulse propagation in bounded helical coil assemblies	419
J. C. Small, J. R. Booker and E. H. Davis: Elasto-plastic consolidation of soil	431
R. K. Kaul and G. Herrmann: Free torsional vibrations of an elastic cylinder with laminated periodic structure	449

NUMBER 7

David H. Y. Yen and Sing-Chih Tang: Nonlinear waves generated by a steadily moving line load on an elastic plate	467
J. Kiusalaas and B. Moustakakis: A two-dimensional continuum theory for angle-ply laminates	479
Thein Wah: Plane stress analysis of a scarf joint	491
R. A. Ainsworth and I. W. Goodall: Creep life predictions for structures subject to variable loading	501
A. Ertepinar and H. U. Akay: Radial oscillations of nonhomogeneous, thick-walled cylindrical and spherical shells subjected to finite deformations	517
A. Kumar and S. T. Ariaratnam: Uniqueness and stability of rigid-plastic cylinders under internal pressure and axial tension	525
R. M. Christensen: Asymptotic modulus results for composites containing randomly oriented fibers	537

NUMBER 8

E. Reissner: On the theory of transverse bending of elastic plates	545
Robert J. Hayduk and Robert G. Thomson: Static load-carrying capacity of circular rigid-plastic plates under Gaussian distribution of pressure	555
M. Mihăilescu and I. Suliciu: Finite and symmetric thermomechanical waves in materials with internal state variables	559
Aviv Rosen and Josef Singer: Vibrations and buckling of axially loaded stiffened cylindrical shells with elastic restraints	577
J. R. Booker, J. P. Carter and J. C. Small: An efficient method of analysis for the drained and undrained behaviour of an elastic soil	589
B. Tabarrok and M. Farshad: On dualities in the oscillations of naturally curved and pretwisted rods	601
Announcement	611

NUMBER 9/10

M. A. Biot: Hodograph method of nonlinear stress analysis of thick-walled cylinders and spheres, including porous materials	613
Peter K. Chiu, Shyam N. Prasad and Suman Dasgupta: Indentation of an elastic rectangle by a pair of rough punches with finite friction	619
Pavel A. Zhilin: Mechanics of deformable directed surfaces	635
K. Firoozbakhsh: Mechanics of deformation of porous elastic media with microstructure	649
M. Hlaváček: On the effective moduli of elastic composite materials	655
J. N. Flavin and J. P. Gallagher: A rigid elliptic inclusion in an anisotropic elastic whole space	671
Viggo Tvergaard: Buckling of elastic-plastic oval cylindrical shells under axial compression	683
C. H. Yew and P. N. Jogi: A Study of wave motion in fiber-reinforced medium	693
G. Wempner and J. Aberson: A formulation of inelasticity from thermal and mechanical concepts	705

NUMBER 11

L. M. Keer and H. A. Watts: Mixed boundary value problems for a cylindrical shell	723
David S. Malkus: A finite element displacement model valid for any value of the compressibility	731
A. O. Awojobi: On the hyperbolic variation of elastic modulus in a non-homogeneous stratum	739
Thomas J. R. Hughes, Hans M. Hilber and Robert L. Taylor: A reduction scheme for problems of structural dynamics	749
S. Minagawa and S. Nemat-Nasser: Harmonic waves in three-dimensional elastic composites	769
Lewis Wheeler: On the role of constant-stress surfaces in the problem of minimizing elastic stress concentration	779
D. M. Richards: Optimum design of stiffened shear webs with supplementary skin stabilisation	791

NUMBER 12

Vikram Kinra: Stress pulses emitted during fracture in tension	803
A. R. S. Ponter: The analysis of cyclically loaded creeping structures for short cycle times	809
A. R. S. Ponter: The creep deformation of vibrating structures	827
T. M. Edmunds: An elastic-plastic analysis of an asymmetric cracked specimen subjected to longitudinal shear	839
E. Reissner: On stretching, bending, twisting and flexure of cylindrical shells	853
Marcelo Epstein and David W. Murray: Three-dimensional large deformation analysis of thin walled beams	867
Announcements	877
Errata	879

AUTHOR INDEX

- Aberson, J., 705
Adams, G. G., 239
Ainsworth, R. A., 501
Akay, H. U., 517
Ariaratnam, S. T., 525
Awojobi, A. O., 739
