

ANNOUNCEMENT

An international seminar on "Safety of Structures under Dynamic Loading" will take place 23 June–1 July 1977, at The Norwegian Institute of Technology, Trondheim. The seminar will cover the modern probability based theories of Structural Reliability and Stochastic Dynamics. Recent applications to Wind and Ocean Engineering will be stressed.

Ten internationally recognized experts have been invited to give a unified presentation of the topics involved. Also the participants will be encouraged to deliver short papers. Discussion following each session will be an important part of the seminar. To encourage the exchange of ideas, the lecturers will all be participating for the entire eight days.

The deadline for registration is 30 April 1977. Since the number of participants is limited to 100, it is advised to make reservations early. The conference fee of Nkr. 1200 (approx. US\$ 216) includes preprints of the lectures and lunch.
