

LIST OF CONTENTS

NUMBER 1

T. Hueckel and G. Maier: Incremental boundary value problems in the presence of coupling of elastic and plastic deformations: a rock mechanics oriented theory	1
Harry E. Williams: Axisymmetric thermal stress in a thin circular disk by the method of matched asymptotic expansions	17
Ronald L. Roth and Thomas R. Kane: Simulation of attitude motions of torque-free, deformable spacecraft	39
I. K. McIvor, W. J. Anderson and M. Bijak-Zochowski: An experimental study of the large deformation of plastic hinges	53
Kazumi Watanabe: Transient response of a layered elastic half space subjected to a reciprocating anti-plane shear load	63
Kazumi Watanabe: Transient contact shear stress in a layered elastic quarter space subjected to anti-plane shear loads	75

NUMBER 2

D. Turhan and Y. Mengi: The propagation of initially plane waves in nonhomogeneous viscoelastic media	79
James M. Hill: Radial deflections of thin precompressed cylindrical rubber bush mountings	93
D. A. Isherwood and R. W. Ogden: Towards the solution of finite plane-strain problems for compressible elastic solids	105
K. S. Chi and T. H. Lin: Slope-deflection method for elastic-plastic multistorey frames	125
J. R. Booker and J. C. Small: Finite element analysis of primary and secondary consolidation	137
L. E. Goodman and L. M. Keer: Near field stress analysis of a spot weld between elastic plates	151

NUMBER 3

E. R. de Arantes e Oliveira: The patch test and the general convergence criteria of the finite element method	159
G. H. Schmidt: On anti-symmetric waves in an unbounded piezoelectric plate with axisymmetric electrodes	179
I. K. McIvor, A. S. Wineman and H. C. Wang: Plastic collapse of general frames	197
Nuri Akkas: Transient response of a moving spherical shell in an acoustic medium	211
B. L. Karihaloo: Spread of plasticity from stacked stress concentrations	221
Marc Dahan and Joseph Zarka: Elastic contact between a sphere and a semi infinite transversely isotropic body	229
Yannis F. Dafalias: Il'iusin's postulate and resulting thermodynamic conditions on elasto-plastic coupling	239
P. D. Panagiotopoulos: On the unilateral contact problem of structures with a non quadratic strain energy density	253
R. K. Kaul and G. Herrmann: A note on critical reflections of axially symmetric waves in an isotropic, elastic hollow cylinder	263

NUMBER 4

N. I. Ioakimidis and P. S. Theocaris: The problem of the simple smooth crack in an infinite anisotropic elastic medium	269
Piero Villaggio: Two-sided estimates in unilateral elasticity	279
Franz Ziegler: Wave propagation in periodic and disordered layered composite elastic materials	293
J. B. Alblas: Optimal strength of a compound column	307
John Weaver: Three-dimensional crack analysis	321
Subrata Mukherjee: Corrected boundary-integral equations in planar thermoelastoplasticity	331
Hans Obrecht: Creep buckling and postbuckling of circular cylindrical shells under axial compression	337
A. P. S. Selvadurai: Axisymmetric flexure of an infinite plate resting on a finitely deformed incompressible elastic halfspace	357
B. L. Karihaloo: Spread of plasticity from a stack of cracks under mode I conditions	367
I. Herrera and J. Bielak: Comments on the paper "Modified Gurtin's variational principles in the linear dynamic theory of viscoelasticity"	377
J. N. Reddy: Author's closure	379

NUMBER 5

R. Frisch-Fay: Stability functions for structural masonry	381
K. S. Havner and C. Singh: Application of a discrete polycrystal model to the analysis of cyclic straining in copper	395
Alan Needleman: Inflation of spherical rubber balloons	409
T. J. Delph, G. Herrmann and R. K. Kaul: On coalescence of frequencies and conical points in the dispersion spectra of elastic bodies	423
G. J. Turvey: Uniformly loaded, simply supported, antisymmetrically laminated, rectangular plate on a Winkler–Pasternak foundation	437
Pauli Pedersen: Influence of boundary conditions on the stability of a column under non-conservative load	445
David H. Y. Yen and Janice Gaffney: On the response of an elastic membrane to a travelling ring load	457
J. P. Carter, J. C. Small and J. R. Booker: A theory of finite elastic consolidation	467
J. P. Benthem: State of stress at the vertex of a quarter-infinite crack in a half-space	479

NUMBER 6

J. Zarka and J. Frelat: On a description of a new “hardness” test	493
W. L. Ko, H. G. Pennick and W. E. Baker: Elasto–plastic response of a multi-layered spherical vessel to internal blast loading	503
C. R. Calladine: Thin-walled elastic shells analysed by a Rayleigh method	515
James L. Klemm and Rocque Fernandes: The non-axisymmetric end loading of a truncated cone	531
Fred Nilsson: Steady mode III crack propagation followed by non-steady growth	543
Zvi Hashin: Vibration analysis of viscoelastic bodies with small loss tangents	549
F. Farhad, R. Muki and R. A. Westmann: The role of the adhesive layer in a double cantilever joint	561
V. Sanchez-Moya and A. C. Pipkin: Energy release rate for cracks in ideal composites	571
M. A. Biot: Variational Lagrangian-thermodynamics of non-isothermal finite strain mechanics of porous solids and thermomolecular diffusion	579
Warren S. Edelman: On uniqueness of solutions for nonlinear creep problems in symmetric pressure vessels	599
Announcement	603

NUMBER 7

Niels Olhoff and Steen Højlund Rasmussen: On single and bimodal optimum buckling loads of clamped columns	605
L. M. Keer, D. A. Mendelsohn and J. D. Achenbach: Crack at the apex of a loaded notch	615
K. S. Havner: On unification, uniqueness and numerical analysis in plasticity	625
Taijiro Nonaka: Approximation of yield condition for the hysteretic behavior of a bar under repeated axial loading	637
H. Ishikawa: Transient thermoelastoplastic stress analysis for a hollow sphere using the incremental theory of plasticity	645
Ü. Lepik and Z. Mróz: Optimal design of plastic structures under impulsive and dynamic pressure loading	657
U. Gamer: Dynamic stress concentration in an elastic half space with a semi-circular cavity excited by SH waves	675
M. Gellert and M. E. Laursen: A new high-precision stress finite element for analysis of shell structures	683

NUMBER 8

Nagesh Basavanahally and R. D. Marangoni: Measurement of mechanical vibration damping in orthotropic, composite and isotropic plates based on a continuous system analysis	699
Albert B. Ku: Upper and lower bounds of buckling loads	709
A. Ertepinar: Large amplitude radial oscillations of layered thick-walled cylindrical shells	717
N. V. Banichuk and B. L. Karihaloo: On the solution of optimization problems with singularities	725
Eiji Matsumoto: Singular surfaces in a linear thermo-elastic dielectric material	735
Harry E. Williams: Axisymmetric thermal stress in a thin spherical shell by the method of matched asymptotic expansions	747
B. K. Min, H. Kolsky and A. C. Pipkin: Viscoelastic response to small deformations superposed on a large stretch	771
Announcement	783

NUMBER 9

Michael P. Cleary: Fundamental solutions for a fluid-saturated porous solid	785
Warren S. Edelstein: On uniqueness of solutions for secondary creep problems	807
James M. Hill: Self-adjoint differential equations arising in finite elasticity for small superimposed deformations	813
Linda Shaw and A. J. M. Spencer: Impulsive loading of ideal fibre-reinforced rigid-plastic beams—I. Free beam under central impact	823
Linda Shaw and A. J. M. Spencer: Impulsive loading of ideal fibre-reinforced rigid-plastic beams—II. Beam with end supports	833
Linda Shaw and A. J. M. Spencer: Impulsive loading of ideal fibre-reinforced rigid-plastic beams—III. Cantilever beam	845
C. Atkinson and D. L. Clements: On some crack problems in anisotropic thermo-elasticity	855

NUMBER 10

A. Sperling and Y. Partom: Numerical analysis of large elastic-plastic deformation of beams due to dynamic loading	865
S. F. Felszeghy, W. Goldsmith and J. L. Sackman: Forced axisymmetric motions of viscoelastic cylindrical shells	877
R. S. Srinivasan and S. V. Ramachandran: Linear and nonlinear analysis of stiffened plates	897
John E. Taylor and Mark P. Rossow: Optimal truss design based on an algorithm using optimality criteria	913
Richard W. Young: Thermomechanical response of a viscoelastic rod driven by a sinusoidal displacement	925
A. Maewal and W. Nachbar: A perturbation analysis of mode interaction in post-buckling behavior and imperfection sensitivity	937
Peter J. Chen and Stephen T. Montgomery: Normal mode responses of linear piezoelectric materials with hexagonal symmetry	947
Viggo Tvergaard: Buckling of elastic-plastic cylindrical panel under axial compression	957
R. A. Ainsworth: Bounding solutions for creeping structures subjected to load variations above the shakedown limit	971
R. A. Ainsworth: Application of bounds for creeping structures, subjected to load variations above the shakedown limit	981
Jacob Aboudi: The dynamic indentation of an elastic half-space by a rigid punch	995

NUMBER 11

J. F. Silva Gomes and S. T. S. Al-Hassani: Internal fractures in spheres due to stress wave focusing	1007
Poul V. Lade: Elasto-plastic stress-strain theory for cohesionless soil with curved yield surfaces	1019
R. L. Ramkumar, M. P. Kamat and A. H. Nayfeh: Vibrations of highly prestressed anisotropic plates via a numerical-perturbation technique	1037
Yu. A. Melnikov: Some applications of the Greens function method in mechanics	1047
P. W. Brothers, G. B. Sinclair and C. M. Segedin: Uniform indentation of the elastic half-space by a rigid rectangular punch	1059
P. R. S. Speare and K. O. Kemp: A simplified reissner theory for plate bending	1073
Marcelo Epstein and Peter G. Glockner: Nonlinear analysis of multilayered shells	1081
A. L. Florence: Response of circular plates to central pulse loading	1091
C. Atkinson and F. G. Leppington: The effect of couple stresses on the tip of a crack	1103
Gerald Wempner and Chao-Meng Hwang: A derived theory of elastic-plastic shells	1123
Fred L. Nilsson: Steady crack propagation followed by non-steady growth-mode I solution	1133
D. J. Dawe: Finite strip buckling analysis of curved plate assemblies under biaxial loading	1141
J. D. Achenbach and R. P. Khetan: Elastodynamic response of a wedge to surface pressures	1157
K. L. Chowdhury and P. G. Glockner: On thermoelastic dielectrics	1173

NUMBER 12

Kikuaki Tanaka, Tsuneyuki Horie and Tsuyoshi Sekiya: On coupled mean fields in heterogeneous linear thermoelastic media	1183
J. Tani: Bulking of a ferromagnetic circular ring in a radial magnetic field	1197
R. de Boer: On non-isothermal elastic-plastic and elastic-viscoplastic deformations	1203
K. K. Lo: Finite-deformation crack in an infinite body under anti-plane simple shear	1219
John Han-Hsiung Wu and Frederick Reyes Norwood: Transient analysis of a three-dimensional plate by the ray grouping technique	1225

Martin A. Eisenberg, Chong-Won Lee and Aris Phillips: Observations on the theoretical and experimental foundations of thermoplasticity	1239
Ole Fabian: Collapse of cylindrical, elastic tubes under combined bending, pressure and axial loads	1257
R. D. Parbery and B. L. Karahaloo: Minimum-weight design of hollow cylinders for given lower bounds on torsional and flexural rigidities	1271
P. S. Theocaris: Caustics created from simply supported plates under uniform loading	1281
E. Reissner: On small bending and stretching of sandwich-type shells	1293
A. Paglietti: Discussion on the paper: Il'iushin's postulate and resulting thermodynamic conditions on elasto-plastic coupling	1301
Yannis F. Dafalias: Author's closure on the paper: "Il'iushin's postulate and resulting thermodynamic conditions on elastoplastic coupling"	1305
Announcement	1309
